- Your choice of 1/3-HP or 1/4-HP motor

**(1)** Wards Finest Piston Pump for Superior Operation. Top quality construction . . . modern design. 1/3-HP piston-type shallow well pump provides constant volume for any depth to 25 ft. at sea level (1 ft. less for each 1000 ft. that pump is above sea level). Pumps 400 gals. per hour. Install directly over well or offset—as far as 600 ft. with larger pipe.

No lubrication necessary—moving parts are completely water lubricated. Notched belt drives pump without slipping for maximum capacity and longer life. With foot valve, patented non-clog pressure switch, pressure relief valve and automatic air control. Tapped for 1-in. suction; 3/4-in. discharge pipes. Pump fits tanks (5) to (8)—order from Page 998. Can also be used with any regular large pneumatic tank. Order pump only or complete system.

**1/3-HP PUMP ONLY.** Overall 16 1/2 x 9 1/2 x 9 1/2 in. 81 A 3519R—Ship. wt. 65 lbs. . . . . **\$73.50**

**COMPLETE SYSTEM.** Pump with 20-gal. tank. 81 A 3517R—Ship. wt. 128 lbs. . . . . **\$96.50**

**(2)** 1/4-HP Piston-Type Pump. Has same fine features and gives same superior operation as (1) above. With standard pressure switch. Pumps 300 gallons of water per hour.

**1/4-HP PUMP ONLY.** Overall 16 1/2 x 9 1/2 x 9 1/2 in. 81 A 3518R—Ship. wt. 65 lbs. . . . . **\$67.50**

**COMPLETE SYSTEM.** Pump with 10-gal. tank. 81 A 3516R—Ship. wt. 92 lbs. . . . . **\$84.50**

See Page 998 for Other Size Tanks to use with Pumps (1) and (2) above.

## FAIRWAY Deep-Well PUMP

- Completely Automatic
- Heavy-Duty Construction
- Finest Timken Roller Bearings—All Moving Parts Lubricated
- 55 Five-In. Strokes a Minute—Built-In Equalizer

**1/2-HP  
\$194<sup>50</sup>**

**(3)** Top Quality Fairway Construction. Hardened crankshaft and crank pins. Adjustable double V-belt. Requires drop pipe, pump rod, coupling and cylinder—order from opposite page. Recommend extra-large tank (81 A 3791R or 81 A 3796F on Page 998).

Pump head must be mounted directly over well. Adjustable pressure switch set 20 to 40 lbs. Relief valve set 65 lbs. 115-230-volt, single phase 60-cycle AC. Size 27x14x31 in. Well head tapped and bushed for 2-in. or 2 1/2-in. pipe. Discharge tapped for 1-in. pipe. Rod threaded to fit 7/16-in. steel or 5/8-in. wood rod.

## SILENT DEEP-WELL Submersible Pumps FOR WELLS TO 1000 FT. . . . LOW AS \$16:

- Superior Pump Stage Design for Smoother Water Passage, Longer Wear, Greater Efficiency . . . Stainless Steel and Polypropylene Interior Construction for Increased Corrosion Resistance
- Exclusive Non-Absorbent U-Cup Seal at Impeller Eye Eliminates Recirculation, Reduces Wear . . . High Capacity Oil-Filled Motor Provides Permanent Lubrication, Greater Output Per Horsepower
- Pump Installed Below Water Surface—Needs No Frost-Protecting Housing

**(4)** Fairway Two-Wire or Three-Wire Submersible Pumps—For quiet, efficient, automatic and trouble-free operation. Two-Wire Unit has 90-ft. cable attached at factory; order cable (5) for Three-Wire Unit separately. Three-Wire Unit has more starting torque; recommended for heavier duty operation. Silent underwater operation—pump is never seen . . . never heard . . . never lubricated. For 4-in. inside diameter or larger wells up to 1000 ft. More efficient than jet pumps—delivers more water at higher head with less horsepower. Use 1-in. galvanized pipe to suspend pump in well for sizes to 3/4-HP; larger use 1 1/4-in. Guaranteed 1 year—a new pump Free if defective (not recommended for sandy wells—test your well first).

Motor is Oil Lubricated, Water Cooled—spring-loaded for constant internal oil pressure. For 1-phase, 60-cycle AC. For automatic operation use 40-lb. columns in table below.

Two-WIRE PUMPS have capacitor in motor; overload protection in pressure switch. Require no control box.

THREE-WIRE PUMPS include control box with starting condenser, overload relay, lightning arrester. Both pumps include: check valve with air snifter, tee with bleeder valve to fit pipe sizes shown above, gauge, air volume control and pressure switch. Write Wards Customer Engineering Dept. for pitless well adapter—Give well diameter. Easy credit Terms—Pg. 960.

# EASIEST TO INSTALL Copper DRAINAGE SYSTEM

**Compact and Easy to Handle**—copper fittings are lightweight, about 1/3 as heavy as iron. Often sections can be pre-assembled on floor, then lifted into position.

Joints made quickly with wire solder and blow torch. Copper stack has no protruding hubs. Fits into standard 2x4-in. stud partition.

Ideal for do it yourself installer. Check local code before ordering.

## Finest Quality Copper Tubing and Fittings

(38) (39) Fairway Flexible, Rigid Copper Tubing. Ideal for hot-water systems because it's seamless—water flows freely. Rustproof and corrosion-resistant—can't clog lines. For water, steam, gas or air lines. Connect to steel pipe with adapter. Lightweight, easy to handle. Will give years of trouble-free service.

Flexible tubing is easily bent where change in direction is required, reducing number of fittings needed and saving labor. Rigid tubing for new installations and all exposed lines—neater appearance. Size is inside diam. (1 1/2-, 3-in. sizes on Page 1005). Type L should be used indoors. Type K may be used underground. Type M for low pressure heating.

Best... Giant 18x18-inch Cast-Iron Oven \$139<sup>95</sup>

**(M) Compare Weights First—**heavier construction means longer life, more efficient performance. 12-inch high oven bakes six loaves of bread at one time, a 20-lb. turkey with all the "trimmings". Can be heated continuously. Porcelain lined, spring balanced door has 1-inch Fiberglas insulation to keep heat in oven, not in kitchen. Accurate heat indicator; easily controlled draft regulator. Heat from firebox is channeled to all corners, assures constant temperature for even browning and baking.

**Four 8-inch Cook Lids—**one sectional for fast direct heat, to accommodate any size pot or pan; one perforated for slow simmer—so important to "Gourmet" cooking. Large storage drawer doubles as warming oven. White recessed base. Most efficient, best built 5-wall firebox 16x7 1/2 x 9 in. deep, burns soft coal, with end linings out 20-inch wood—feed cover lifts easily, stays up. 5-gallon removable reservoir, porcelain enameled inside and out. Size overall: 25x42 in. wide, 39 in. high; to cooktop 32 in. Use 7-inch stovepipe.

### Non-Metallic Indoor Cable, Type NM

- Thermoplastic Insulation Resists Fire, Moisture
- Approved by Underwriters' Laboratories, REA

1 Most Widely Used Cable for Indoor Wiring in homes, shops, barns and other concealed and exposed work. May also be used on major appliance installations. Bends easily, strips clean with convenient ripcord. Each conductor is color-coded to simplify tracing circuits and is individually insulated with thermoplastic.

IMPROVED OUTER JACKET WITH GLASS YARN is not affected by sun or heat. Longer life assured by chemical treatment that helps resist fire, moisture, acid vapors. Smoother, more flexible for easier handling. Coil prices apply to exact lengths listed; for odd footage over coils, use "per ft." price. State Catalog number and length.

Permanent, Fully Steel-Enclosed Installation wherever code allows. Solid copper conductors insulated with tough rubber coating to withstand 600 volts. Rubber is fire and moisture resistant fabric insulation. Special guide mark allows up to 30% of installation time. Band wire runs under steel jacket for extra safety. Anti-short bushings included for safer installation. Use fittings below. Buy in full coil and save more. Order at "per foot" price. State Cat. No. and length.

11 to 13 For Service Line to Entrance Switch or wiring ranges, heaters, dryers, etc. Use 3-wire type (12) for 110-120/220-240 V. appliance installations; 2-wire type (11) for lighting and appliances operating on 110-120 V. circuits only. For extra-heavy duty, or where specified by local code, use armored SEA cable with armor jacket under outer covering. RHW insulation resists heat, moisture. Choice of Copper (11) (12) or Aluminum (13). Lightweight Aluminum Cable weighs only 1/4 the weight of equal copper service and costs less too. Flexible aluminum conductors and insulation bend easily. Tough Neoprene jacket protects against corrosion, rot, and moisture. Order aluminum cable one size larger than copper.

NOTE: 3-wire cable has 2 insulated wires. Make third wire by twisting wire strands wrapped around insulated wires—see (12) above. State Cat. No., length.

## Direct Burial Cable

20 Use Underground—eliminate hazardous and unsightly overhead wiring outdoors between house and barn, etc. Cable is completely waterproof... can be buried directly underground. Solid copper conductors are well insulated and enclosed in heavy lead cover. Run in conduit when subject to injury or rough treatment. Meets REA specifications. Odd footage over exact coils sold at "per ft." price. State Catalog Number, length.

## Outdoor Weatherproof, Type WP

① **Outdoor Wire with Copper Conductor.** Not for direct burial. Tough, flexible, Neoprene jacket resists fire, corrosion, abrasion, oil and acids. Insulation will not deteriorate, crack or peel. Single conductor. Odd footage over exact coils are at "per ft." price.

**Outdoor Wire with Aluminum Conductor.** Neoprene cover—weighs about half as much as copper wire of same current rating. Costs less, too! Order next size larger than you would if you were ordering copper. Both meet REA specs. *State Wire size and length wanted.*

## Acrylic-Latex House Paint

USE ON WOOD OR MASONRY

- BEST PROTECTION AGAINST BLISTERING . . . allows moisture to escape
- EASIEST OF ALL HOUSE PAINT TO APPLY . . . will not show lap marks
- CAN BE APPLIED EVEN ON DAMP SURFACES . . . or on very humid days

Acrylic-Latex House Paint lasts up to 50% longer than ordinary oil-base paints. Uniform low sheen hides surface imperfections. White is self-cleaning; colors are fade-resistant. Less chalk staining than from conventional paints; resists alkalis in masonry. Clean up hands, tools, splatters with soap and water. Dries to a tough, dust-free finish in just 30 minutes. Bugs, dust or sudden showers can't spoil paint job. Gal. covers to 500 sq. ft.

Previously painted wood, asbestos shingles, cinder and cement block, brick, stucco or other masonry surfaces in good condition (where excessive erosion and chalking do not exist) need no oil-base primer. Reduce each gal. of paint with one qt. of reducer (right) for first coat, and apply second coat of paint as it comes from can. Prime unpainted wood or painted wood in poor condition with House Paint Undercoat, Pg. 1024, finish with 2 coats of paint as it comes from the can. Painted masonry surfaces in poor condition should be primed by reducing each gallon of paint with 2 qts. of reducer and finished with 1 coat of paint at can consistency. No Reducer

or Undercoat required on unpainted masonry

# BUTYL RUBBER ROOF COATING—Save \$4.70 ON 5-GAL. CAN

## "ROLL A RUBBER RAINCOAT ON YOUR ROOF"

Ideal for preventing leaks when applied properly to mineral-surface asphalt composition shingle or roll roofing where excessive erosion does not exist, and when used with All-Purpose (Butyl) Exterior Patch

Butyl helps seal leaks... forms protective "raincoat."

Butyl aluminized to reflect heat—keeps house cooler in summer—warmer in winter.

Butyl helps seal shingle edges to withstand wind pressure.

Butyl resists weathering and hardening due to aging.

Save on shipping charges—pick up your order at your Cat. Store. See Pg. 1267.

**A Butyl Rubber Roof Coating Now at a New Reduced Price.** Can add extra life to improve its appearance. Colors are aluminized and add lustrous appearance heat rays to help keep house cooler in the summer. Butyl resists the effects of sunlight, temperatures, and chemical fumes in the atmosphere. Apply with roof roller (low). Can be applied in almost any weather as long as roof is dry. Also helps seal edges to resist wind damage.

In areas where leaking and seepage have developed, patch carefully with All-Purpose (Butyl) Exterior Patch (see below); then coat with Butyl Rubber Roof Coating. On second coat may be necessary to minimize asphalt staining. Gallon covers up to on asphalt composition shingles; up to 85 sq. ft. on asphalt composition roll roofing. Not for use on built-up roofs of tar or asphalt, composition roofs that have been coated with asphalt, or paint or where foot traffic occurs. Not for use on metal, tile, slate shingle roofs. On composition roofs where mineral surface has eroded in large areas roofing is brittle and lost its life, Butyl is not recommended. Clean hands and tools with Purpose Paint and Varnish Thinner (below). Send for Free color card 75-5589.

## Check Metal Rust and Corrosion

ON MACHINERY, ROOFS, TANKS

Aluminum Paint . . . \$3.89 Gal. in 5's

- One Coat Completely Covers
- Use on All Kinds of Metals

**K** Weather-Resistant Aluminum Paint checks corrosion and rust on farm machinery, metal roofs and buildings, water tanks, wire fencing, farm building interiors, etc. Ideal for indoor work on basement walls; gives heat- and rust-resistant finish to furnaces and pipes.

Specially-treated linseed oil and resins keep aluminum flakes overlapped to form an armor-like coating. Bright, silvery finish; one coat completely hides old surface. Reflects sun's rays, keeps surface cooler. Easy to spray or brush. Dries in 6 to 8 hours. Prime unpainted metal with (L) below. Gal. covers to 700 sq. ft., 1 coat.

## 3-D Plastic Panels 84¢ Ea.

**A B C** Transform Ordinary Walls and Ceilings into exciting 3-dimensional surfaces. Plastic panels beautify rooms with no special preparation. Apply over plaster, wallboard or open beams. Covers cracks, hides peeling or scarred paint, torn wallpaper. Textured surface creates rich, relaxing backgrounds. For a decorator touch, use brick or fieldstone patterns on the wall behind your most important furniture grouping or cover a room divider with them... then add plantings for effective contrast. Excellent for kitchens too... unaffected by hot vapors or water.

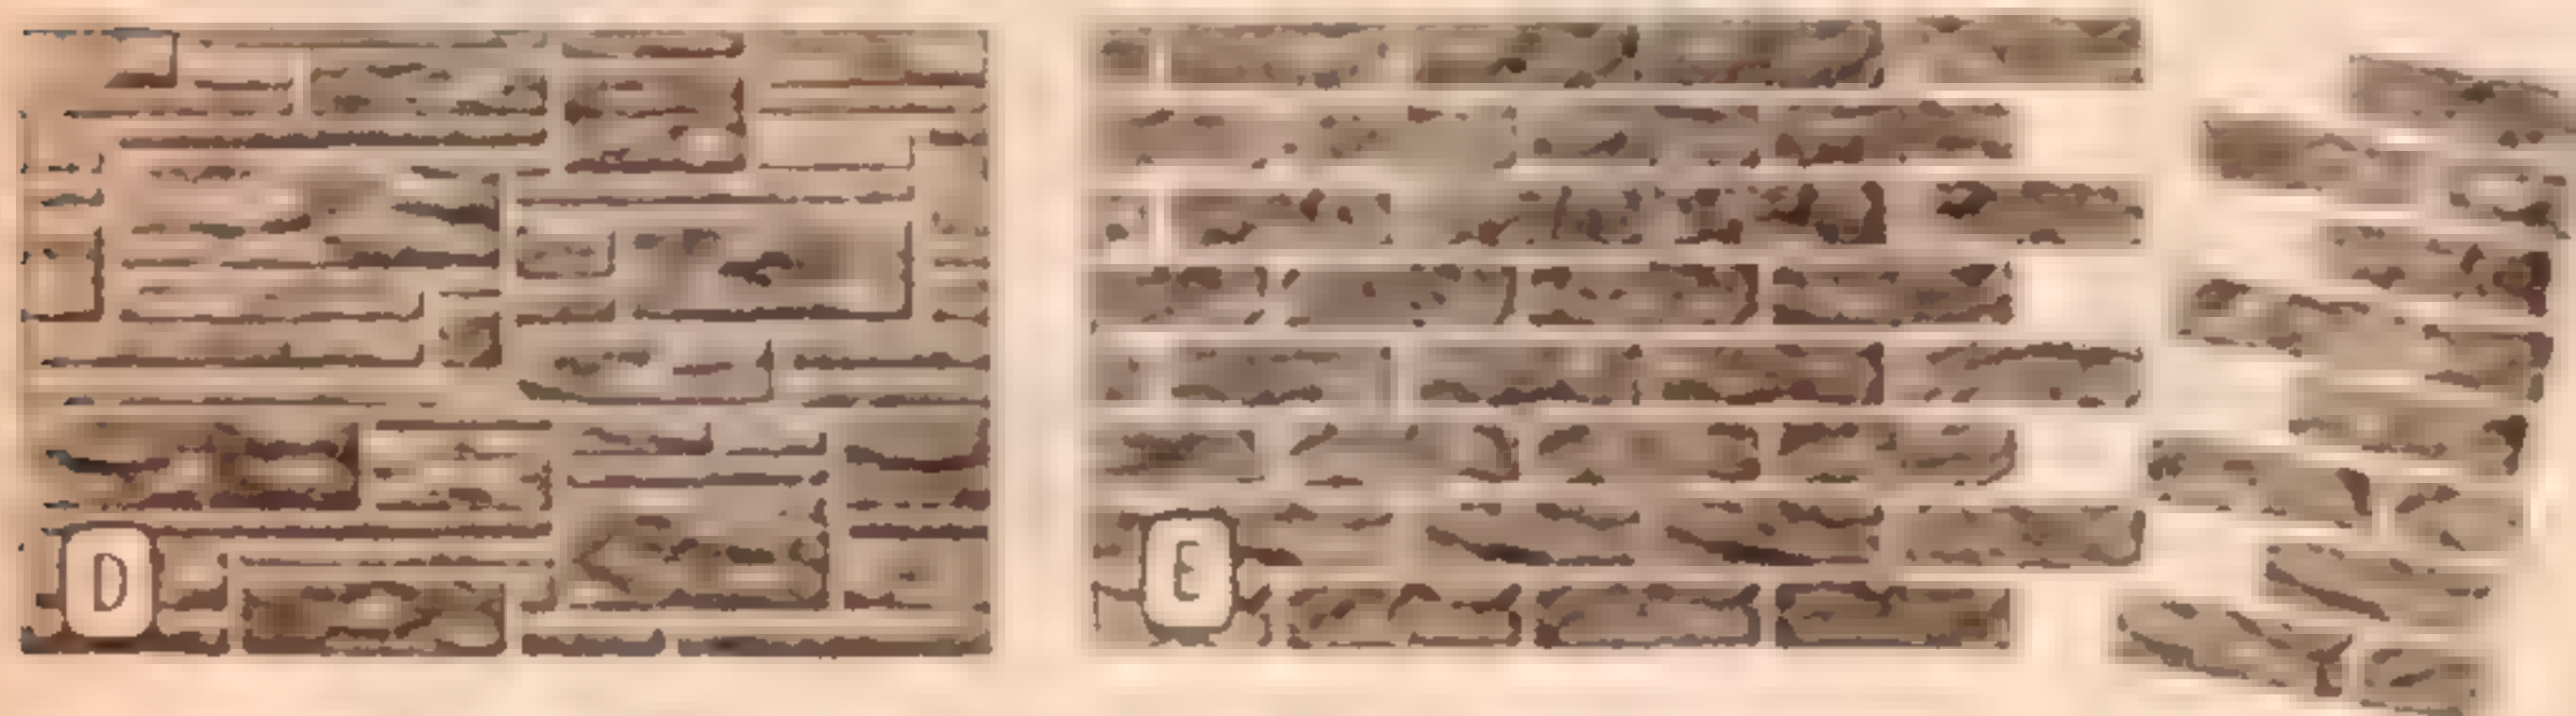

**AND IT'S SUCH A SIMPLE JOB.** Goes on quickly and easily with adhesive (below). No furring strips necessary. For fitting around cabinets, doors, windows... simply cut with ordinary scissors. You can completely re-style an average room in a few hours. Panels can be painted or sprayed, either before or after installation.

**PLASTIC PANELS ARE DURABLE AND EASY TO CARE FOR.** Will not stain or discolor; won't chip, peel, warp or sag. Completely washable... can be wiped clean with a damp cloth. Each panel contains 6 tiles, covers 4 sq. ft. Minimum order 2 panels.

## Self-Adhesive Wall Panels 32¢ Per Sq. Ft.

- Easy-to-apply... Transforms a complete wall in minutes.
- No nails or paste needed... panels have own adhesive.
- Die-cut panels interlock and overlap for perfect fit.

**D E** Look Real 3-dimensional panels are molded and colored to look and feel like real stone. Edges interlock and overlap, never show. **Decorator Right** Use them for handsome textured effects on artificial fire places, room dividers and screens. Panels can be painted to contrast dramatically or blend softly with your present decor. Especially good for living rooms, dining rooms, dens, and bars. Completely practical for kitchens and playrooms too. Surface is washable and waterproof... easy-to-clean. Will not chip, peel, warp or sag.

**Easy-to-Apply** First, punch out the pre-cut edges. Then take off the paper backing and simply press in place. No sticky pastes or fumbling for nails. No fitting problems either... panels can be cut with an ordinary scissors. And panels stick to almost every surface... raw wood, cinder blocks, cement blocks, tile, non-water base painted areas, bricks, sheet rock, asbestos, cement or plywood. Completely covers unsightly cracks and peeling paint... refreshes any room. Each panel is 18x24 1/2-in. and covers 3 sq. ft. Minimum order is 2 panels.

## Wards Finest Overhead Garage Door Hardware Sets

- Doors Swing Up Overhead Quietly on Smooth Ball Bearing Rollers
- Easy to Install—Door Construction Details Included with Hardware
- Sets for Both Single or Double Doors—Sizes up to 16 Ft. in Width

**1 2 Automatic Lifting.** Two steel coil springs do the lifting for you, the instant you unlock the door. Springs have regular and fine adjustments to balance door's exact weight. Retaining bolts are first positioned to operate doors of different weights; then fine adjustment is made with open end wrench (view above).

Doors swing overhead on full length track—completely inside garage. New type hangers make track more rigid, easier to hang. Use on old or new doors (doors not incl.). Sets include all hardware to convert hinge-type door into rigid one-piece overhead door. Steel hardware is rust-resistant black enameled finish; outside handle is zinc-plated. Single Door Sets require 2-in. overhead clearance; others need 2 1/4 in.

All require 3 5/8-in. door jamb width. Sets include: metal weatherstripping, steel bumper, cylinder-type locking bolt, two keys, instructions. Choice of 8 to 9-ft. width for single garages, and up to 16-ft. width for double garages.

## OUR FINEST Ball Bearing CAPACITOR MOTOR

① We Know of None Better! Works harder, lasts longer, looks better than any similar motor we've seen. Full powered, extremely rugged—for hard-starting jobs on power tools, air compressors, sprayers, pumps or to replace other motors. Oversize greased-for-life ball bearings—use motor in any position. Strong MYLAR insulation—8 times stronger than other insulation. Rapid reversing action; forced-through ventilation. Built-in capacitor reduces starting current—can't be accidentally damaged. Streamlined design, winner of Alcoa Award . . .

fits into tight spots. Overload protection. Shuts off motor when overloaded. Meets or exceeds performance standards. Minimum rotor perfectly balanced for even torque. Double 5/8-in. keyed shafts—operate 2 tools at once. Vibration-free. On 8-ft. cord, plug. Mounting 4 1/4 in. 110-120 V., A.C.

## Economical Capacitor Motors for Many Uses

- Performance and dimensional specifications meet NEMA standards
- Heavy-gauge frame protects windings and core, keeps bearings aligned
- "Formvar" insulated windings for protection against heat and moisture
- Drip-proof end shields keep sawdust, other foreign matter out of motor

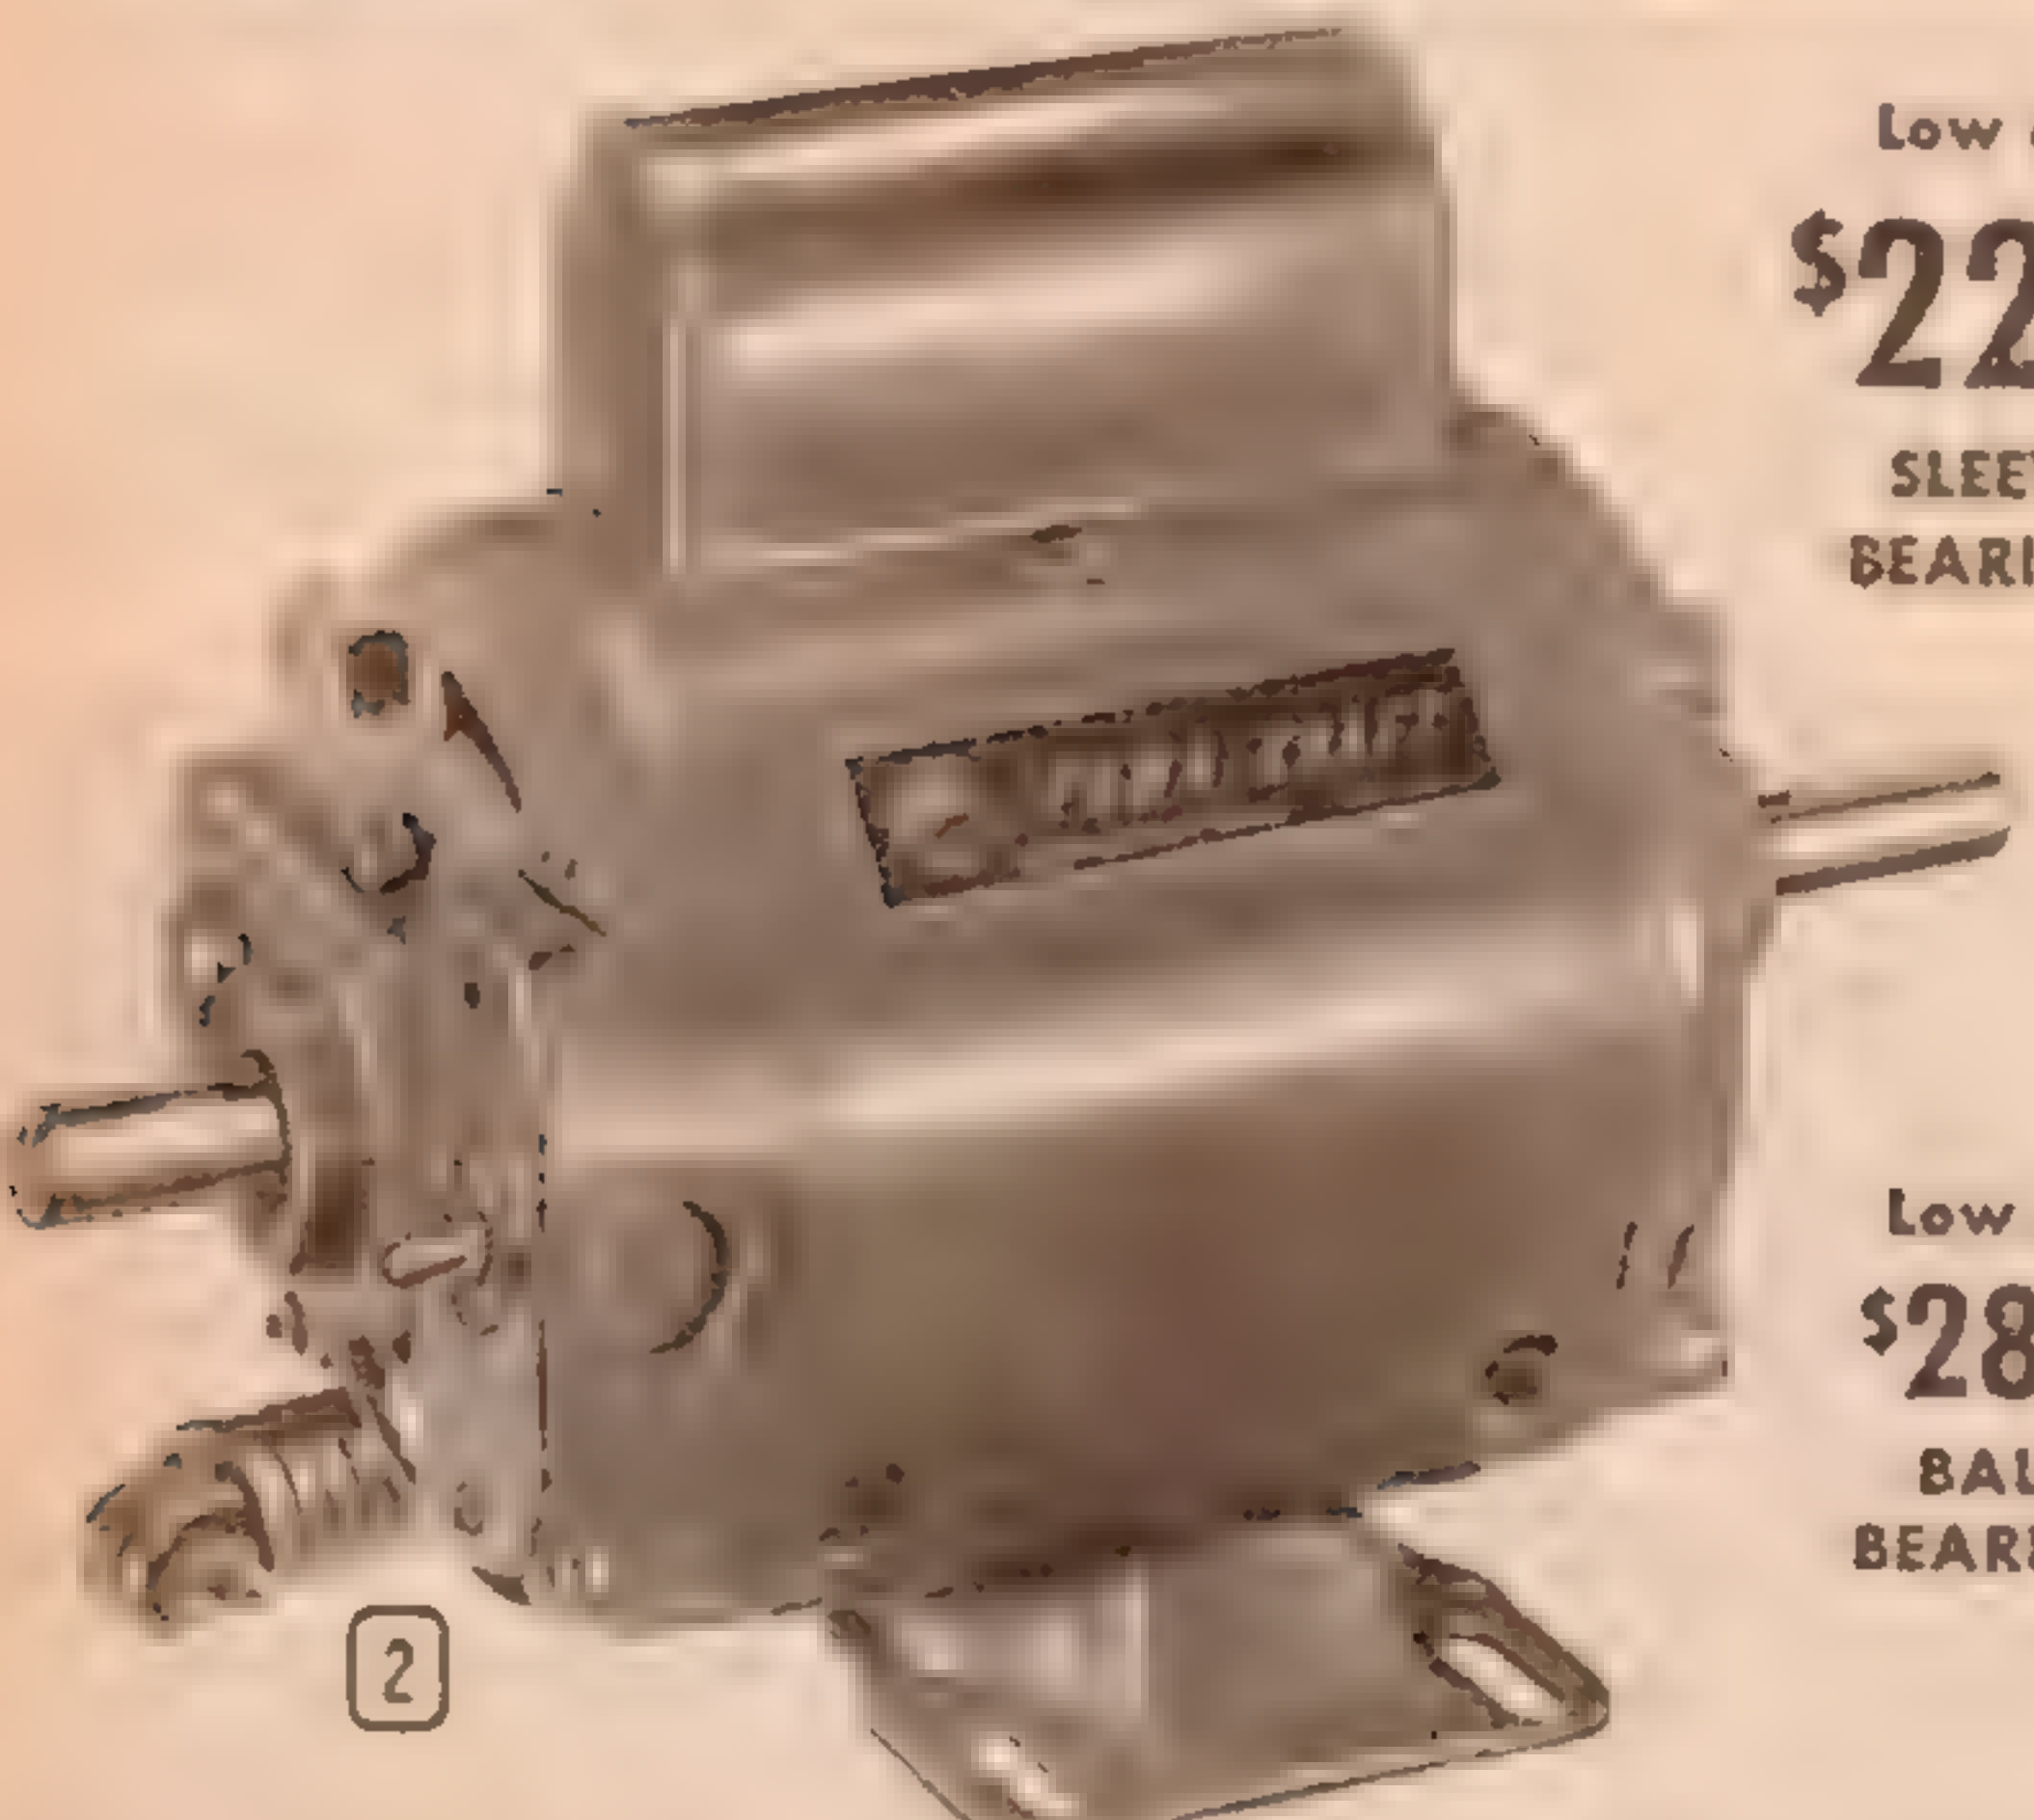

② POWR-KRAFT All-Purpose Capacitor Motors. Large overload capacity—handle tough jobs on air compressors, paint sprayers, water pumps, power tools, etc.; or replace other motors in any position. 5/8-in. keyed double shafts—operate 2 tools at once. Capacitor starts with 1/3 less starting current. Straight-through forced ventilation; continuous duty. Dynamically balanced to reduce vibration. Easily reversed. Built-in conduit box. Guaranteed.

② Low Priced Diamond Bored All-position Sleeve Bearings; lubricated for normal life. Nylon thrust washers allow vertical or horizontal mounting. Formvar insulation. Without overload protector, on-off switch or cord. 110-120 V. AC.

## POWR-KRAFT Heavy-Duty MOTORS NO BRUSHES . . . NO RADIO INTERFERENCE

③ ④ POWR-KRAFT Heavy Duty Capacitor Motors—perfect for hardest starting jobs. Meet NEMA, REA and AIEE specifications. Dependable performance on hard-to-start equipment such as pumps, fans, blowers, compressors, conveyors, machine tools, on farms, in factories, and shops. Precision construction; continuous duty. Will not exceed 40°C. temperature rise under normal operation. Ball bearings sealed and lubricated for life. Can be mounted either vertically or horizontally. Drip-proof. Mylar insulation gives twice the life expectancy of ordinary insulation. Requires low starting current and develops 3 to 4 times the rated torque for starting. Reversible; single key-way shaft. 110-120/220-240 V. (except 5 HP which is 220-240 V. only); single phase, 60-cycle, AC. 1725 RPM. See Power Co. for information about voltage before ordering.

Heavy Duty Capacitors (3) and (4) are fully guaranteed—will be repaired or replaced FREE if found defective in materials or workmanship within 1 year of purchase date.

## BUYING GUIDE

Split-Phase Motors—for easy starting loads or where maximum load is applied at full motor speed—washing machines, light power tools, fans, furnace blowers, etc.  
Mill-Type Capacitor Motors—for medium to hard-starting loads on production and farm equipment.

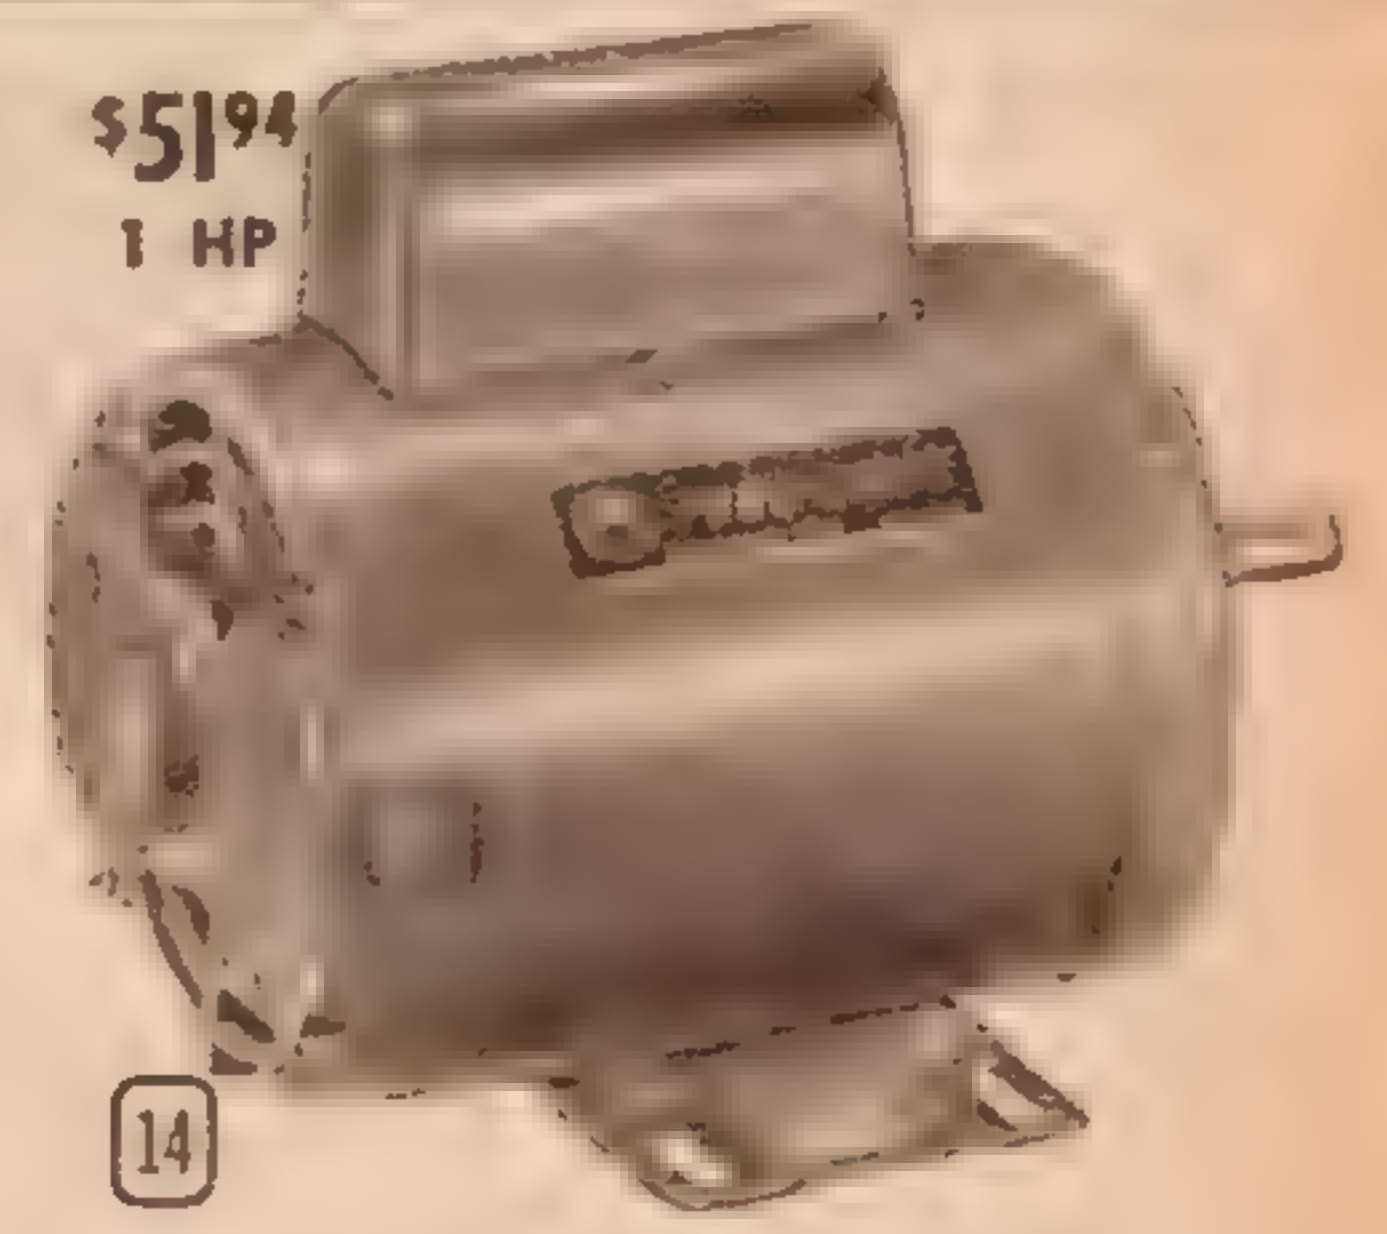

Standard Capacitor Motors—for medium loads, such as heavier power tools, paint sprayers, water pumps, feed mixers, etc.  
Heavy-Duty Capacitor Motors—for hard starting loads, such as power compressors, pumps, concrete mixers, etc.

## All POWER-KRAFT Motors have . . .

# 6 Big Features

- 1 Heavy-gauge frame to protect windings and core—motor dynamically balanced to reduce vibration
- 2 "Formvar" or "Mylar" insulated windings with baked-on thermo-setting varnish for longer motor life
- 3 Drip-proof end shields to keep foreign matter out of motor.
- 4 Slotted mounting bases to make belt adjustment easier.
- 5 Performance specifications which meet or exceed NEMA (National Electrical Manufacturers' Association).
- 6 Continuous duty; precision-built by one of the nation's foremost manufacturers . . . full "run-in" test at factory.

**POWER-KRAFT Split-Phase Motors.** For drill presses, jig saws, grinders, belt sanders and easy starting farm machinery. Heavy steel frame protects all internal parts to minimize vibration. Sleeve bearings; nylon thrust washers. Mount in any position. Greased for life. 1/2-in. shaft. Straight-through forced ventilation keeps motor cool. 110-120V., 60-cycle, AC; 1750 RPM. 2 3/4 x 4 1/4 in. cord and plug. Meets or exceeds NEMA (National Electrical Manufacturers' Association) performance specifications. \* See top of opposite page).

**(13) POWER-KRAFT 1/3-HP Appliance Type Capacitor.** Exceeds NEMA performance standards. High starting torque for stokers, pumps, refrigerators, power tools, etc. Starts about 50% heavier loads than comparable split-phase types. Sleeve bearings, nylon thrust washers, mount any position. Greased for life.

Large oil reservoir. Cradle type resilient base. Built in conduit box. Easily reversed. 5/8-in. keyway single shaft. Continuous duty. Mount. dimen. 3x4 3/8 in. 1750 RPM. 110-120 V., 60 cy. AC. Guaranteed.\*

## Replacement Motors . . . Make The Change In Minutes

**Motor, 1/3 HP, M.** split-phase, starting type. Runs efficiently. Replaces 56 frame 1/3 and 1/4-HP oil motors. Operates on 50 cycle, AC. Motor enclosed. Push-button instant change. Manual reset. Thermostat overload protector. The motor from the shaft is 1/2 in. and flatted. Terminals in conduit box. Green lug centers. Wt. 18 lbs. \$18.94

**(16) Furnace Blower and Fan Motor, 1/3-HP, 1725 RPM.** 110-120 V., 60 cycle AC. Split-phase sleeve bearing type. Replaces 56 frame 1/3, 1/4, and 1/2-HP motors. Furnace, attic, window blower. Rubber-mounted, cradle type base. Automatic reset overload protector. Rotation can easily be reversed. Single shaft is 1/2-in. diameter and flatted. Smooth, trouble-free operation. Mount. dimensions 3x4 3/8 in.  
83 A 4516 MB—Shipping wt. 21 lbs. ....\$18.94

**(17) Two-Speed Summer Cooling Fan Motor, 1/3 HP, split-phase model.** Operates at either 1140 or 1725 RPM. Pre-lubricated precision sleeve bearings. Cradle type resilient base with rubber rings for quiet operation. Push-pull leads enable rotation to be changed quickly and easily. 1/2-in. diameter flatted shaft is micro-ground to eliminate vibration. 110-120 V., 60-cycle AC. Mounting bases are slotted for easy installation. Mount. Dimensions 3x4 3/8 in.  
83A4512MB—Wt. 21 lbs. \$22.94

## With Automatic Welding Torch

- Use full flame only when actually welding . . . Use pilot flame when moving. No wasted gas!
- Constant Pressure at Torch—No Time-Consuming Adjustments
- Made by Harris-Calorific, a leader in welding for over 50 years

**(1) POWA-KRAFT Two-Stage Regulator Welding and Cutting Outfit.** This is our finest welding and cutting outfit. Made by Harris-Calorific, it gives you greater safety, accuracy, and dependability. Equipped with regulators which maintain constant delivery pressure from start to finish. This enables the operator to devote full time to welding, without adjustments. Oxygen regulator has 100 and 4000-lb. gauges. Acetylene regulator has 50 and 500-lb. gauges. The diaphragm is built to withstand the impact of full cylinder pressure. Every part is thoroughly tested by Wards own laboratories. Fine craftsmanship assures leak-proof construction. Gas exposed parts are made of non-ferrous metals to assure corrosion-free performance. All parts are fully guaranteed\*, see P. 1059.

**Automatic Welding Torch.** This torch is much safer than regular torches. It eliminates repeated lighting and continuous manipulation of valves—saves time, work and gas. The non-flash mixer handles all size tips—no extra mixing chamber is needed. Torch will not backfire.

**Cutting Attachment.** Features nickel-silver tubes and tripod construction—insures rigidity and withstands all operational abuses. The regulators pass enough volume to cut through steel up to 6 in. thick.

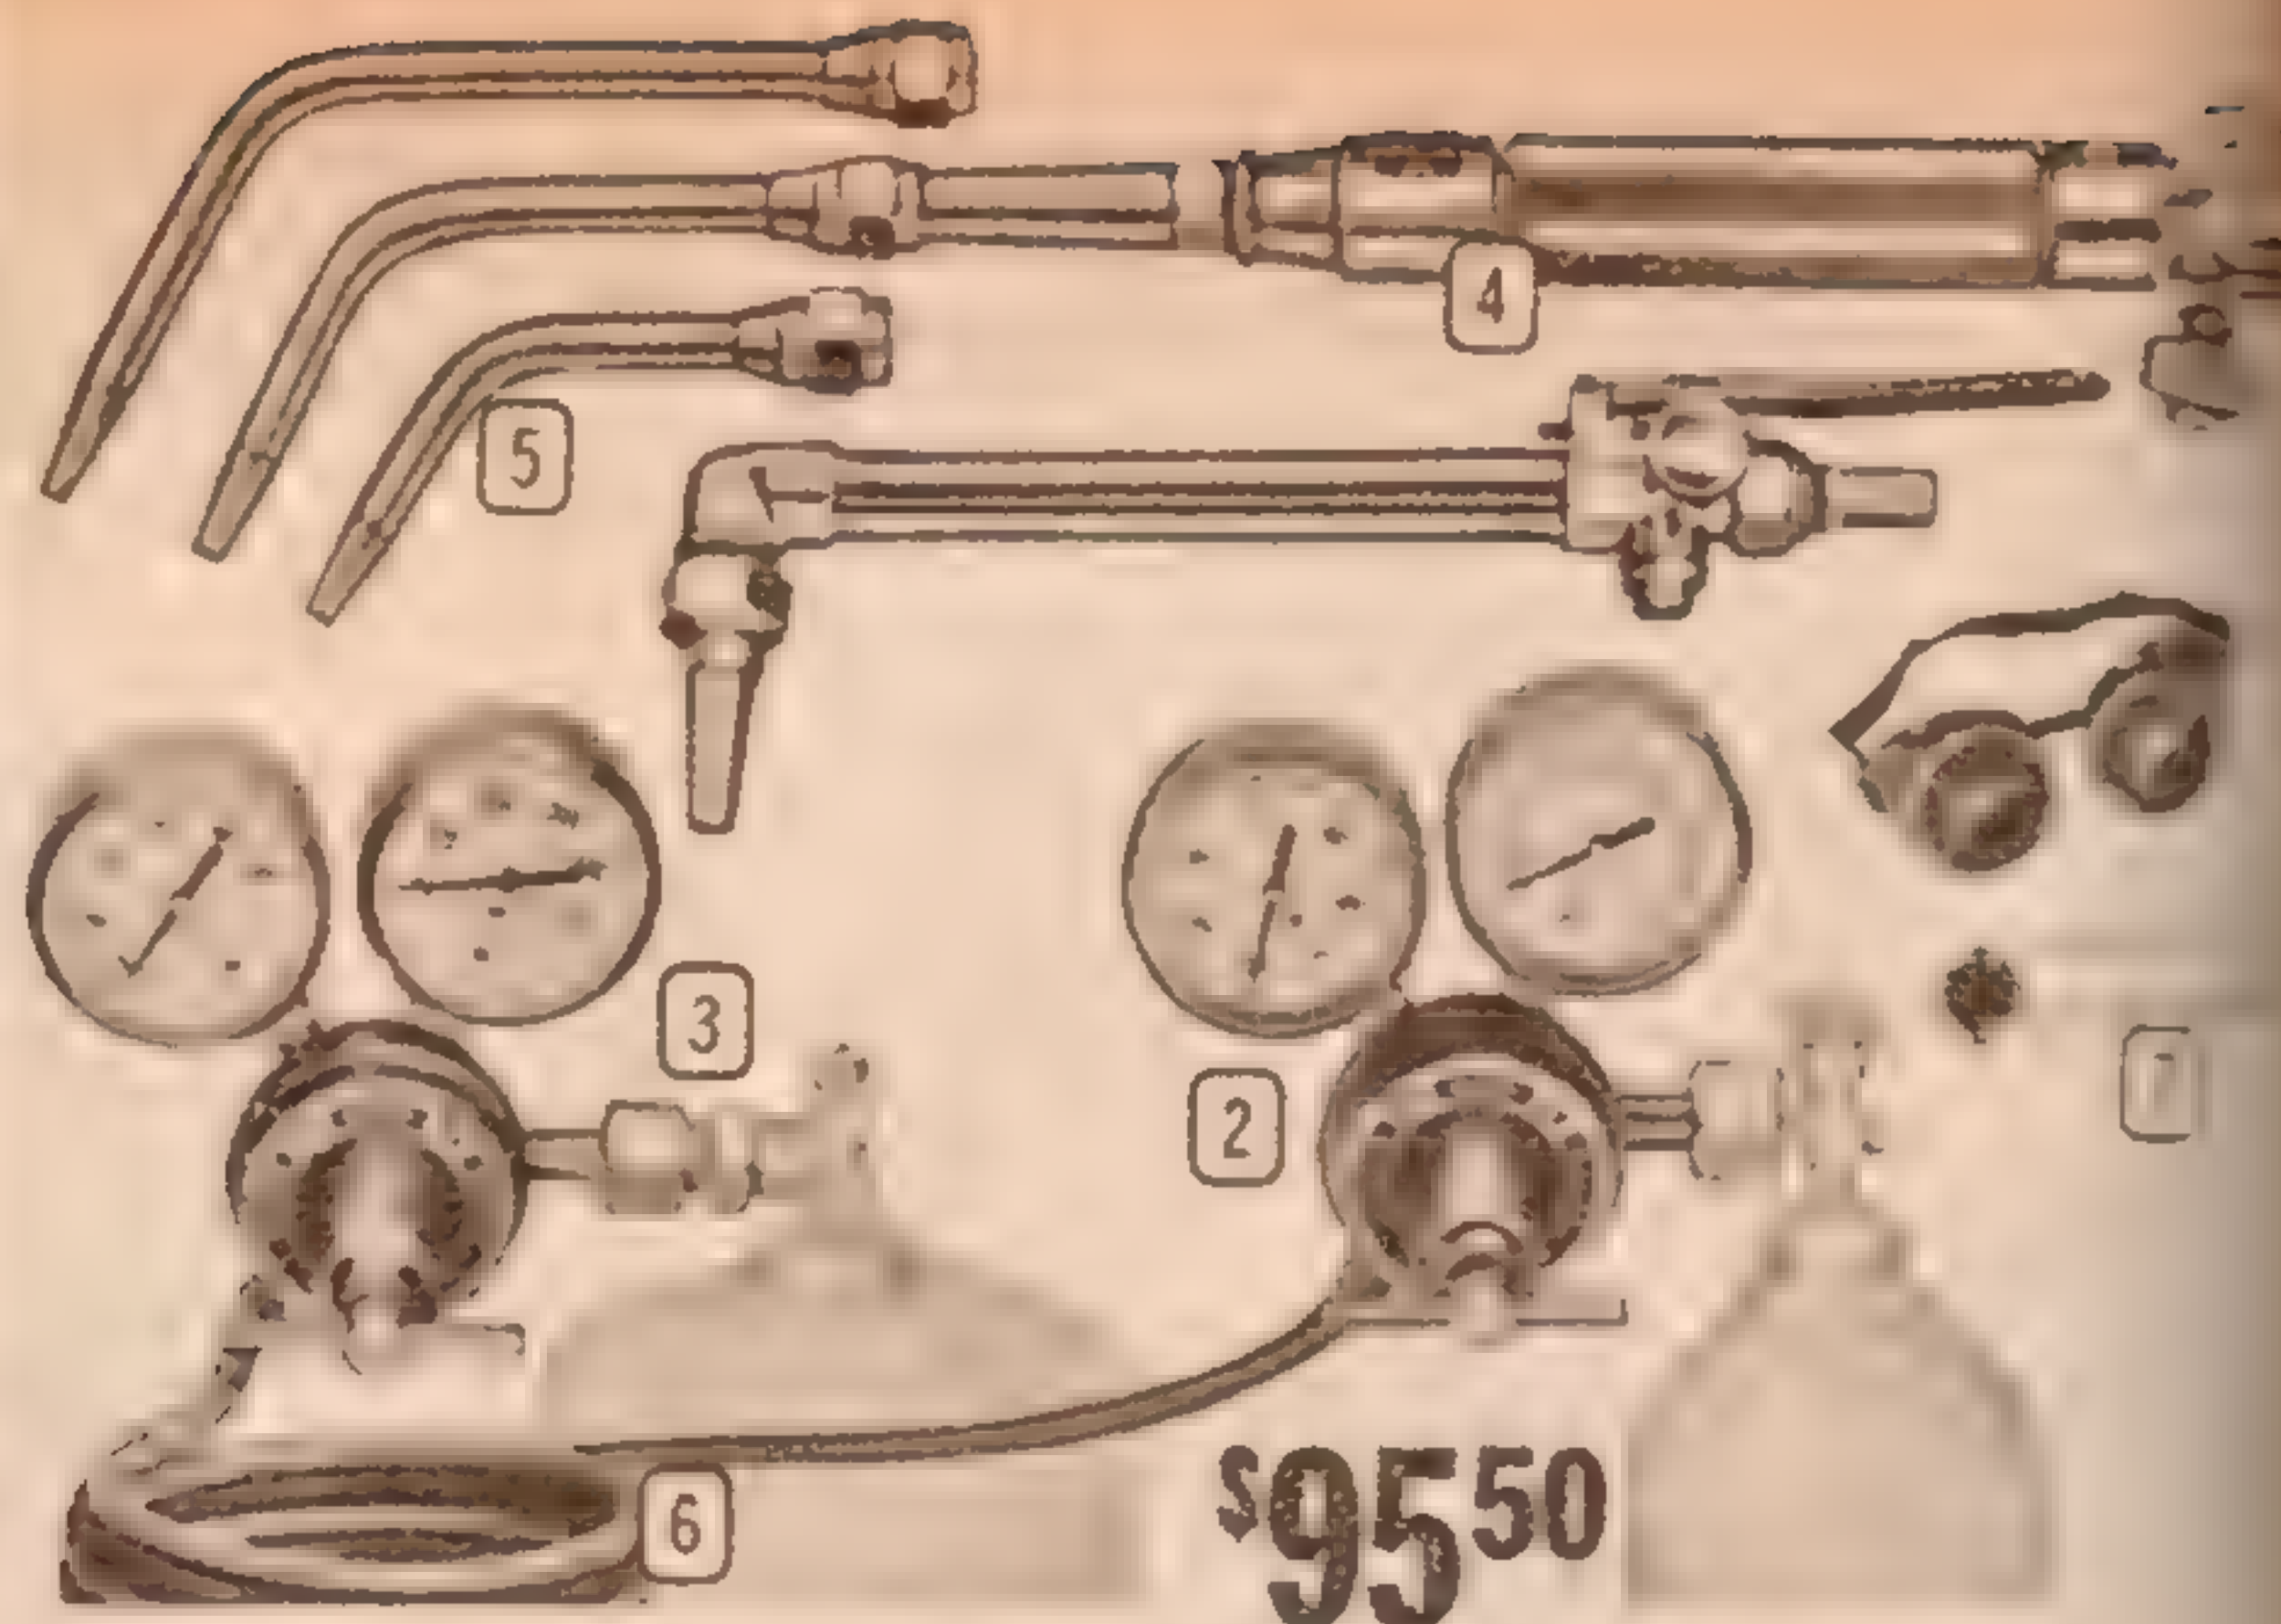

**Complete Outfit Includes:** automatic welding torch, 3 welding tips, sizes 3, 5, and 7; cutting attachment; cutting tip, size 2; two-stage oxygen and acetylene regulators; safety goggles; torch lighter; hose and instructions. Mailed promptly from Stock.

## Our Finest Single-Stage Outfit

**(2) POWA-KRAFT Gas Welding, Cutting Outfit.** Designed to give you yet quality performance. Oxygen regulator has 2 3/4-sq. in. nickel-silver phragm; 100 and 3000-lb. gauges. Acetylene regulator has 30 and gauges. Welding Torch is balanced, equal pressure type. Handles tips. Swivel-type tips permit left or right-hand operation; will not. The Cutting Attachment will cut 6-in. steel. Nickel-silver tubing. Assembly with flip-top lever. Gases are mixed in tip, stops popping and. All gas exposed parts are made of non-ferrous metal. Joints are hard to prevent leakage. Guarantee, P. 1059.

**Complete Outfit Includes:** welding torch; 3 welding tips, sizes 3, 5 cutting attachment with no. 2 tip; oxygen and acetylene regulators; goggles; torch lighter; two 25-ft. welding hoses; instructions.

## Here's Why POWR-KRAFT Sockets are Best:

**GUARANTEE.** Strongest we know of. Wards will replace Free of Charge any POWR-KRAFT alloy steel socket set parts that break for any reason, under normal use.

**POWR-KRAFT Ratchet.** Here's the heart of any tool set... features  $7^\circ$  ratchet action... a full 52 separate holds in each complete turn. Easy removal always... even from the closest jobs.

**Precision Engineering and Special Alloy Steel** for uniform, extra strong, thin wall sockets. Note POWR-KRAFT (A). Others (B) have uneven walls, a common cause of wrench failure.

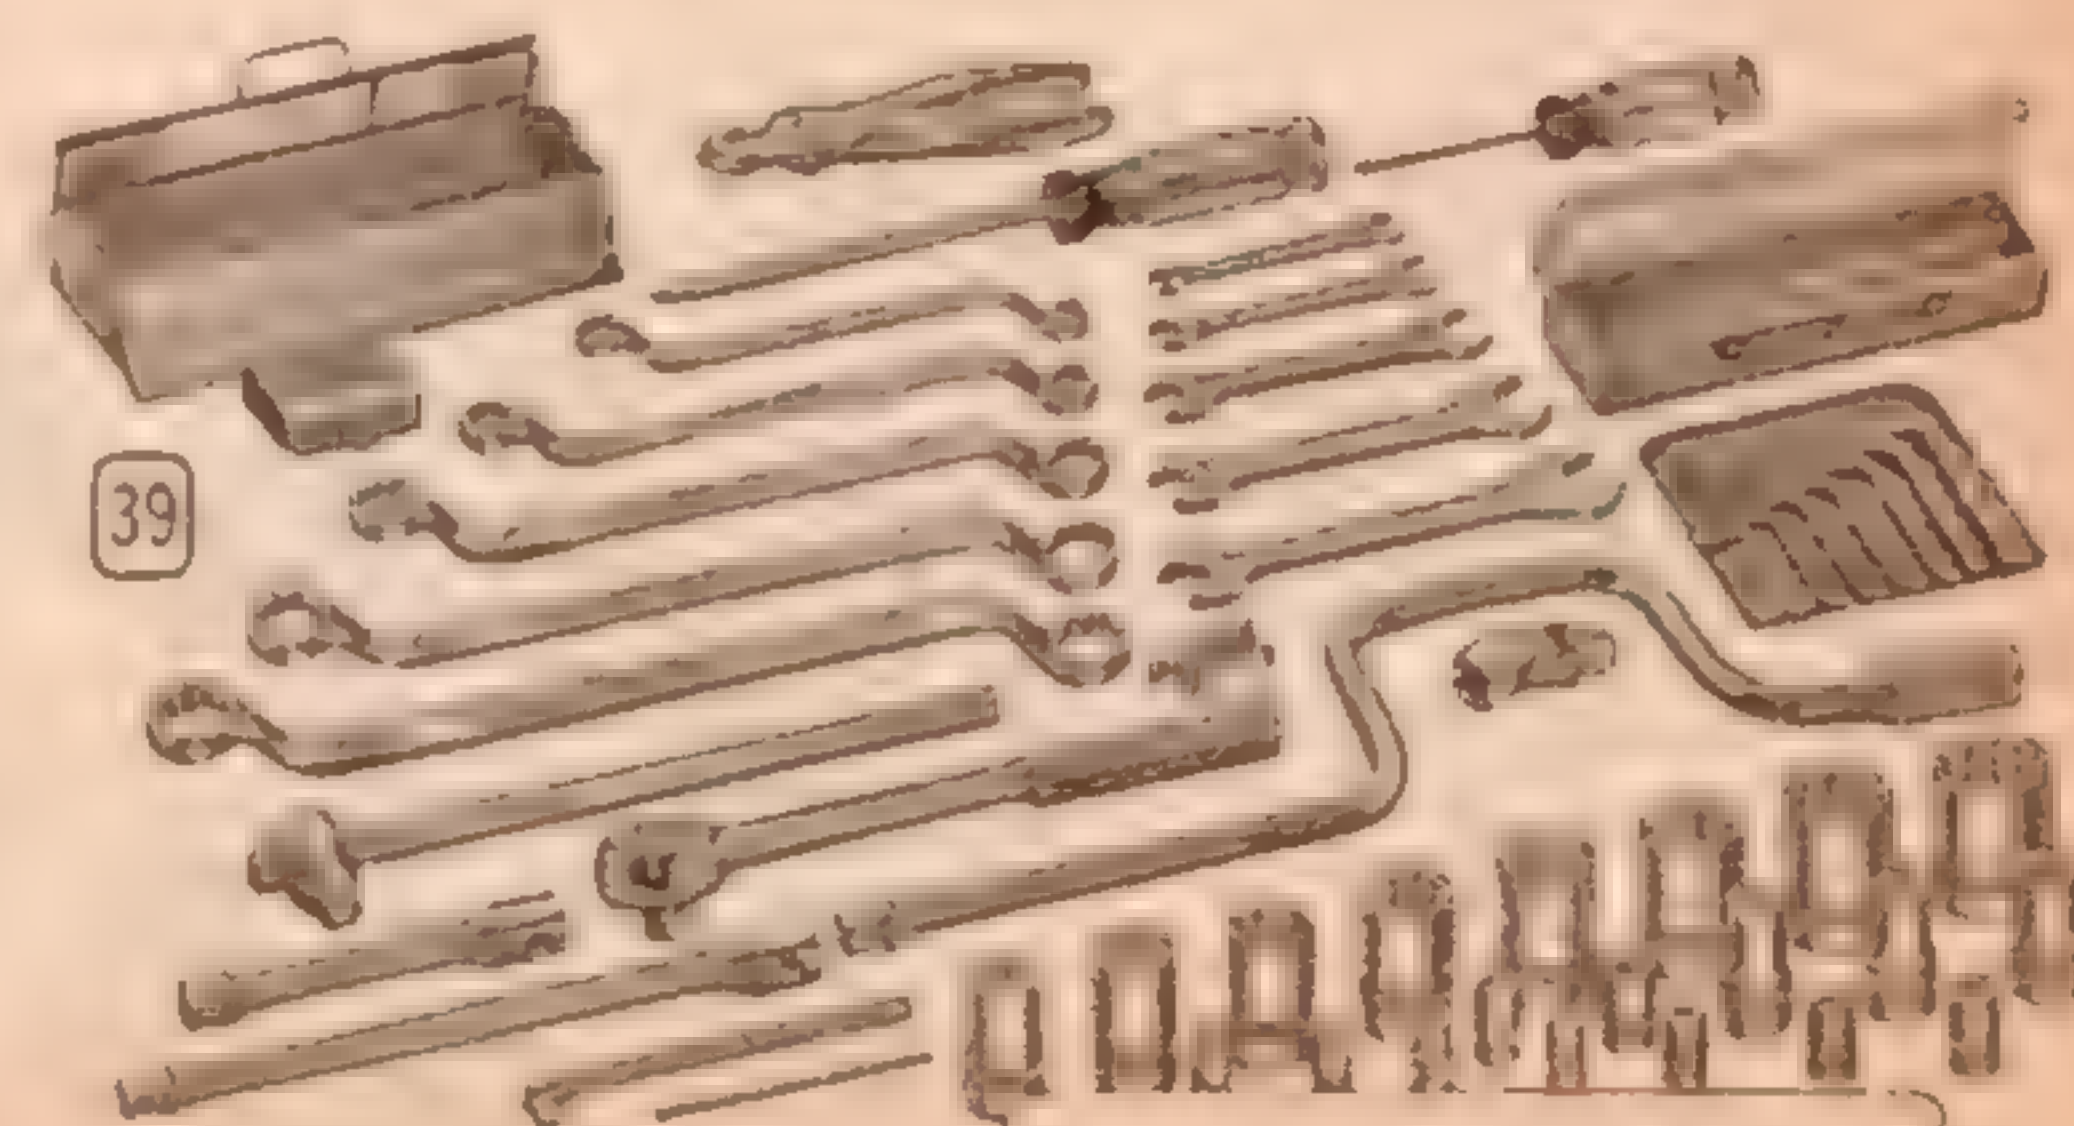

Sockets slip on, stay on. Retaining groove on all four sides of wall of sockets. Angle on other end lets socket slip easily onto nut. Saves time, saves tempers.

**POWR-KRAFT Sockets, Fittings and Handles** are a full 25% stronger—made of tough, chromed alloy steel... highly polished for brilliant rust resistant finish, longer life.

## WARDS WIRE ROPE IS Better 3 Ways

1. Extra Strong
2. Handles Easier
3. Lasts Longer

- Preformed, oiled . . . extremely flexible . . . fights "kinks"
- Improved plow steel rope with 6x19, right-hand lay
- Meets or exceeds Government Specifications RR-R 571A

**Wards Improved Plow Wire Rope With Hemp Center** needs no break-in, gives best service. Thoroughly lubricated inside, resists internal rust, corrosion, danger of temperature change and ordinary acids. Stretches less than ordinary wire rope even in hottest weather. Won't unravel when cut. Made of improved plow steel, the strongest commercial type with regular right-hand lay. Not recommended for oil or water well-drilling.

For lifting problems that demand a strong rope that is also highly flexible. Even more flexible than wire center rope because of fiber core center. Balanced tension assures strength, long life. Safe work load is 1/5 of breaking strain. All sizes shipped promptly from Stock.

## DeLuxe Models: All Of The Above Features Plus

- Non-rusting, diecast aluminum deck—rugged, yet lightweight for ease of handling.
- Self-storing handle adjusts to height of operator—has fingertip engine controls.
- Deck extends below and 8 inches behind blade—insures maximum safety when you mow.

**H Garden Mark DeLuxe Quality Rotary Mowers** in a choice of "free-wheeling" or "power-propelled" with the premium features found on the market. Attractive, stream-lined and efficient, power-packed operation makes them a pleasure to own and use. The "cinch" with wind-up, tempered steel handle does all the work (see picture above). The cast-iron cylinder sleeve means extra engine wear. Engine controls located conveniently on tubular steel handle—operate with a touch of a finger. Handle is "stow-away" design to eliminate storage space. Sloping design of housing permits

mowing under low branches.

Adjusts to four cutting heights—7/8, 1 1/2, 2 1/8, and 2 3/4 by simply moving a lever on the deck. Staggered wheels prevent scalping, wheels inset on left side for close trim—within 5/8 in. of walls, trees, flower beds.

Die-cast aluminum deck finished in bright Gold and White baked on enamel with chrome trim and chromed hub caps. Underdeck baffles improve cutting performance. Visual gas and oil gauges—check engine at a glance—no guessing. Leaf mulcher eliminates need for raking. Low-tone muffler lets you mow without disturbing the neighbors.

## 21 in. "Free Wheeling"

**H Garden Mark Power-Packed Mowers** with deluxe features. Operate. Wheels not power driven. Semi-pneumatic rubber tires have heavy, gripping lug tread, are 6x1.5-in. on front wheels, 8x1.75 in. on rear.

## 21 in. "Power Propelled"

**H Garden Mark DeLuxe self-propelled model** that does the work for you. Ease-O-Matic clutch (see picture above, right) gives the convenience of front wheel drive, plus added traction of rear wheel drive when going up grade.

3-HP 4-cycle Clinton engine has oil and gas gauge—no guessing. Enclosed direct drive mechanism and grease-sealed transmission for trouble free operation. Semi-pneumatic rubber tires have heavy lug tread, are 6x1.5 in. on front, 9x1.75 on rear.

89 A 71 R—Ship. wt. 94 lbs. \$5 Down, \$6 a Month on Terms . . . or Cash \$109.50

## FINEST QUALITY Farm Fence—HIGH COPPER CONTENT STEEL

**Wards Stock and Poultry Fence** is fabricated from top quality, low carbon steel with high Copper Content for longer fence life, extra protection from atmospheric corrosion. All wires are full gauge, meet standards of the industry and the National Bureau of Standards, U. S. Department of Commerce recommendations R9-47.

**Extra-Heavy Galvanizing**—every wire coated with quality Zinc to prevent rust. Meets standards of American Society for Testing Materials for Class A Galvanizing, fulfills Federal Specifications RR-F-221b for Zinc coating. Zinc is bonded so tightly it is practically part of the wire itself.

**Heavy-Duty Hinge-Joint Construction** means more even tension. Full 1 3/4 wrap makes a stronger joint for extra resistance to crowding by stock. Knots won't spread or slip. Added tension given by crimp in line wire allows for expansion and contraction due to temperature changes—keeps lines tight, helps drain off moisture.

### SHIPPING INFORMATION

All fence with (\*) is imported from Belgium and is comparable in quality and serviceability to domestic fence. All Stock Fence comes in bales of 20 Rods (330 ft.); all Poultry Fence in 10 Rods (165 ft.). Shipped promptly from Stock in Baltimore, Md. or Albany, N.Y. by Freight, Truck or Express. How to Choose Proper Size Generator. Check nameplates of all motors and appliances to be run at one time. Multiply amps of each by voltage, either 115 or 230. Add

result to wattage of all lamps you will burn at one time. This total is the size generator you will need. Always select a plant 25% greater than expected maximum.

Motor Requirements. 1/4-HP motor uses 400 w. running, but To Start; split phase type uses 1700 w., capacitor, 1050 w., RI type 900 w. Allow for starting under load.

## WARDS POPULAR Brush Cutter CUTS ANYWHERE

You Can Walk or Reach; Better Buy Because:

- Clears Tough Ground Growth Anywhere—Brush Or Weeds, On Roughest Terrain, In Difficult Spots Where Larger Tools Can't Go.
- Shoulder Strap Suspension Is Perfectly Balanced, Helps Keep Operator From Tiring, Allows Cutting High or Low, Down In Holes, Across Ditches.
- Gas Powered Cutter Has Automatic Safety Clutch, Prevents Stalling From Overloads
- Throttle At Handlebar For Fingertip Control, Operator Never Bends.

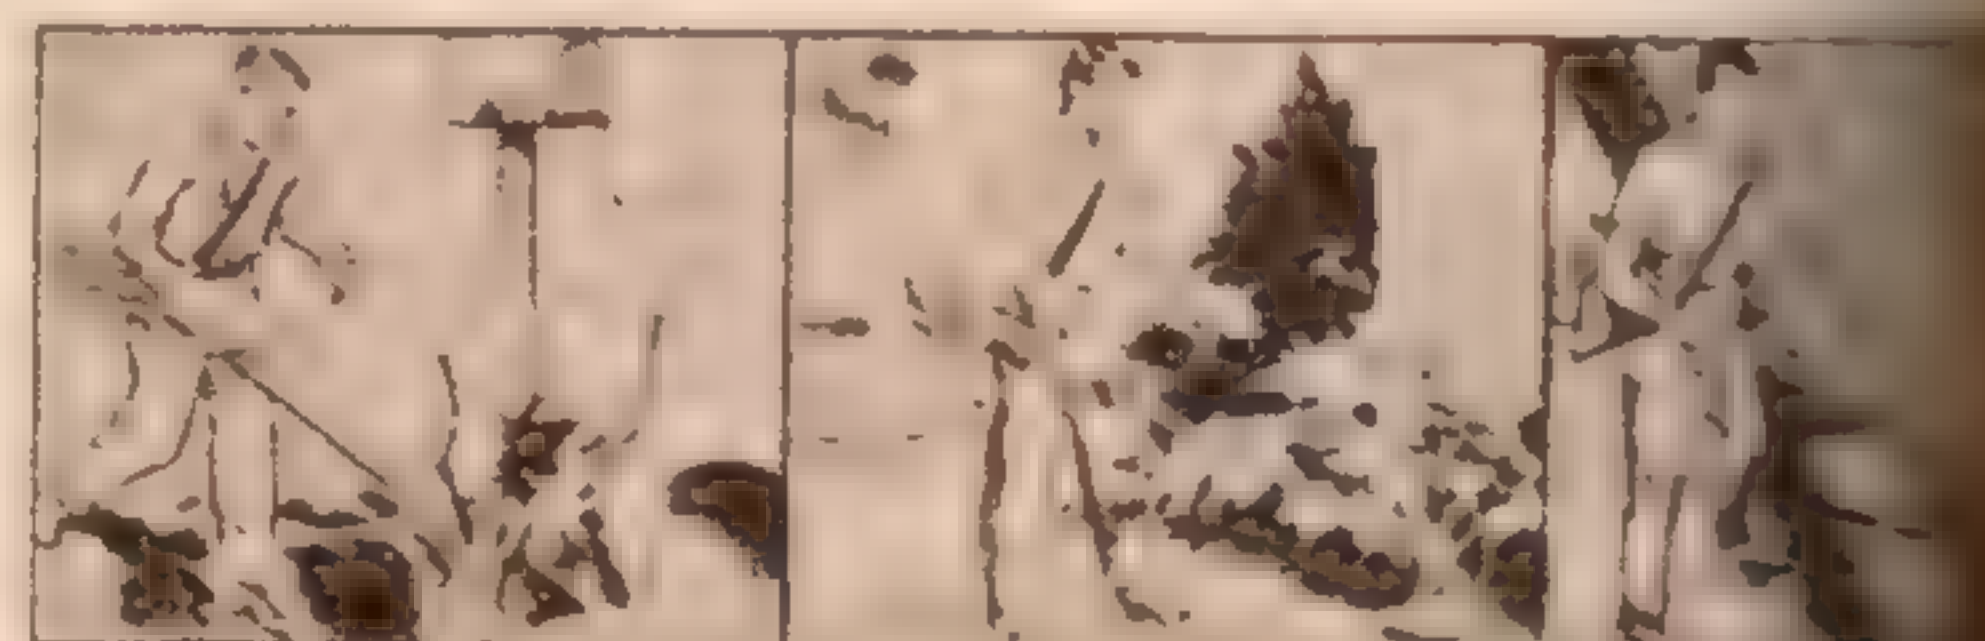

**D** This brush cutter lets you work alone—your hands are free to guide the blade easily over ground.

Just sling it over your shoulder and walk. Swings in under trees, turns sideways for steep grades. 52-in. alum. alloy tube. Plastic grip handlebars keep operator back from blade. Perfectly balanced—handlebars and shoulder strap adjust to fit any build. 11-in. tri-cut blade gives

50% more cutting action than conventional. Sharpens with file right on machine.

Ward-Clinton A-490, 2 1/2-HP, 2-cycle, air-cooled alum. engine has industrial bearings. Transmits power through blade by heavy-duty chrome vanadium flexible drive shaft in armored cable. ## ECONOMICAL Ward CHAIN SAWS

- Your Choice of 4-HP or 6-HP, Both Ruggedly Constructed Yet Light in Weight
- Accurately Balanced to Cut Straight Through the Toughest Timber
- Light Weight and Accurate Balancing Helps Reduce Operator Fatigue

**[J] Powerful, Dependable Engines Packed With Outstanding Features.** Nationally known single cylinder two-cycle air-cooled engine. Double-diaphragm carburetor pumps and meters the fuel to permit efficient cutting in any position. Direct drive utilizes full engine HP by connecting it directly to cutting chain. The chain actually floats through cut without operator pressure that is usually needed. Improved clutch holds engine speed higher—no stalling from overloads; restarts automatically when overload is removed. 14,000-volt magneto gives super hot spark for quick, sure starts. Cast-iron liner in cylinder block resists wear for longer engine life. Reduces maintenance cost for greater yearly savings. Extra-large fins, larger air passages keep engine cool under heavier loads. Large air cleaner located up out of way, designed for fast easy servicing. Keeps dirt, snow, water out of engine. Anti-spark muffler.

**Easy to Operate.** Light weight means it is very easy to carry. Riveted strut support mortised flush to sideplate—chain clears sawdust, prevents binding and hanging. Conveniently grouped finger-tip controls permit instant control of power at all times. Handy trigger throttle built into handle. On-off safety switch. Quick, simple chain tension adjustment. Large diameter rewind starter. Foot plate steadies saw when starting.

**Special Guide Bar and Chain.** Solid molly steel bar has exclusive Nitro Ebonize gun blue finish—resists corrosion. Thumb plunger type chain oiler. Fast-cutting planer-type chain made of high grade tool steel, heat-treated for extra toughness. Buy extra chain from Wards 1961 Farm Book, Page 70.

**4-HP\* All Purpose Saw, Improved Model WD-45.** Economical, lightweight, provides plenty of power for general purpose use on farms, resorts, estates.

## 15-In. Gas Engine Direct-Drive Utility Chain Saw

- Guide bar "molly treated" to resist friction wear.
- 2 1/2-HP 2-cycle air-cooled aluminum engine with cast-iron cylinder liner. Easy-access air cleaner.
- Round planer chain cuts fast—easily sharpened.

**[L] Biggest engine in low priced class!** Ideal for farmer, sportsman, handyman—where economy, dependability and ease of operation rather than high output are most important. Big displacement engine (5.77 cu. in.) runs at slow speed to deliver 2 1/2 HP directly to chain, automatic oiler keeps chain properly lubricated, governor controls speed for long life—all most wanted features for trouble-free general cutting. Single diaphragm carburetor assures adequate fuel supply for all normal cutting.

Unique, patented molding, reduced metal flow-in process lessens thermal distortion, warpage. Shock resistant crankcase. Cylinder liner, governor, oil pump, bearings, etc. same as (B).

**Long Life Vertical Shaft Engines.** Similar to (A) in appearance. Gray iron cylinder and crankcase. Standard 8-in. bolt circle mounting base. Valve shrouds heavy-duty automotive dry-type air cleaner—assures smooth running. Adjustable pneumatic type governor, statically balanced for accurate operation. Positive pressure supplied by automotive type oil pump. Bronze main bearings, I-beam, aluminum alloy connecting rod with extra-large bearings. 3-ring piston. Forged steel valves.

alloy I-beam connecting rod. Improvements made by Clinton may slightly vary appearance of current engines from catalog pictures. See Wards 1961 Farm Book; complete dimensions, more details.

**(B) Aluminum Vertical Shaft Engines.** For maximum power with minimum weight. Aluminum die castings and cast-iron cylinder liner (see small inset above). Have lightweight low-cost advantages of 2-cycle engines plus 4-cycle convenience. Use on lawn mowers, garden tillers, pumps, concrete mixers, etc.

**Metallic mesh dry type air cleaner.** Adjustable pneumatic type governor. Heavy-duty ductile iron crankshaft with replaceable bearings. Fuel filter shut-off built into tank.

**(C) Horizontal Cast-Iron Engines.** 4-cycle single cylinder L-head design. Fully enclosed adjustable governor, runs in oil. Efficient air cleaner. Automotive type dipstick. Model 990 has ball thrust bearing on PTO end of crank. Engine models 960, B1260, A1660 and B2560 with reduction gear have bronze sleeve bearings. All other Models have high load capacity. TIMKEN bearings on both ends of crank. Splash-type lubrication. Available with 6-to-1 reduction gear.

# Your Best Dollar Buy

is a **GUARANTEED RIVERSIDE**

That Fits Your Kind of Driving

## Ward's Riverside S-112—Guar. 30 Months

### When You Want the Best

A premium Riverside Nylon tire . . . built to take the toughest punishment, including high-speed turnpike driving over long distances. You get greater safety, better stability, more riding comfort for only a few dollars more than you'd pay for a regular first-line tire. See P. 1141.

## Ward's Riverside Tyrex® 64—Guar. 24 Months

### Equals New Car Service

If you pile up the mileage under ordinary driving conditions, then Riverside Tyrex 64 is the tire for you. It's identical to quality of 1961 new-car tires. Guaranteed for a full two years—see complete guarantee below (Tyrex® is a collective trademark of Tyrex, Inc. for tire yarn and cord). Page 1142.

## Ward's Riverside Safety Nylon—Guar. 20 Months

### For Normal Driving

Meets average driving needs. Delivers many miles of service for those hundreds of local errands and those few long trips you make each year. Low profile construction, with wider, higher shoulder "King Row" tread for more stability, easier handling on curves. See Page 1143.

## Ward's Riverside Air Cushion—Guar. 15 Months

### For Moderate Driving

If your driving is mostly light driving, shopping errands around town and occasional distance trips, then you can count on dependable service from the Riverside Cushion Nylon. Available in 14-inch size, too, for late model cars. An outstanding value with Nylon strength. Page 1144.

## Ward's Riverside Good Tyrex®—Guar. 12 Months

### For Low Initial Cost

Dependable service and safety at a thrifty low price. A full size tire with full width, full depth tread—provides good traction and skid resistance. Sizes available for late-model cars PLUS hard-to-find sizes for older cars. (Tyrex® is a collective trademark of Tyrex, Inc. Page 1145.

## Ward's Riverside Power Grip—Guar. 24 Months

### For Mud or Snow

Pulls you through when the going is toughest. Husky, deep-biting, self-cleaning tread gets a powerful grip in snow or mud for extra traction you need for winter driving. Smooth riding on clean city streets or rough roads. Super-strength Nylon cord body takes the pounding of winter driving. Page 1146.

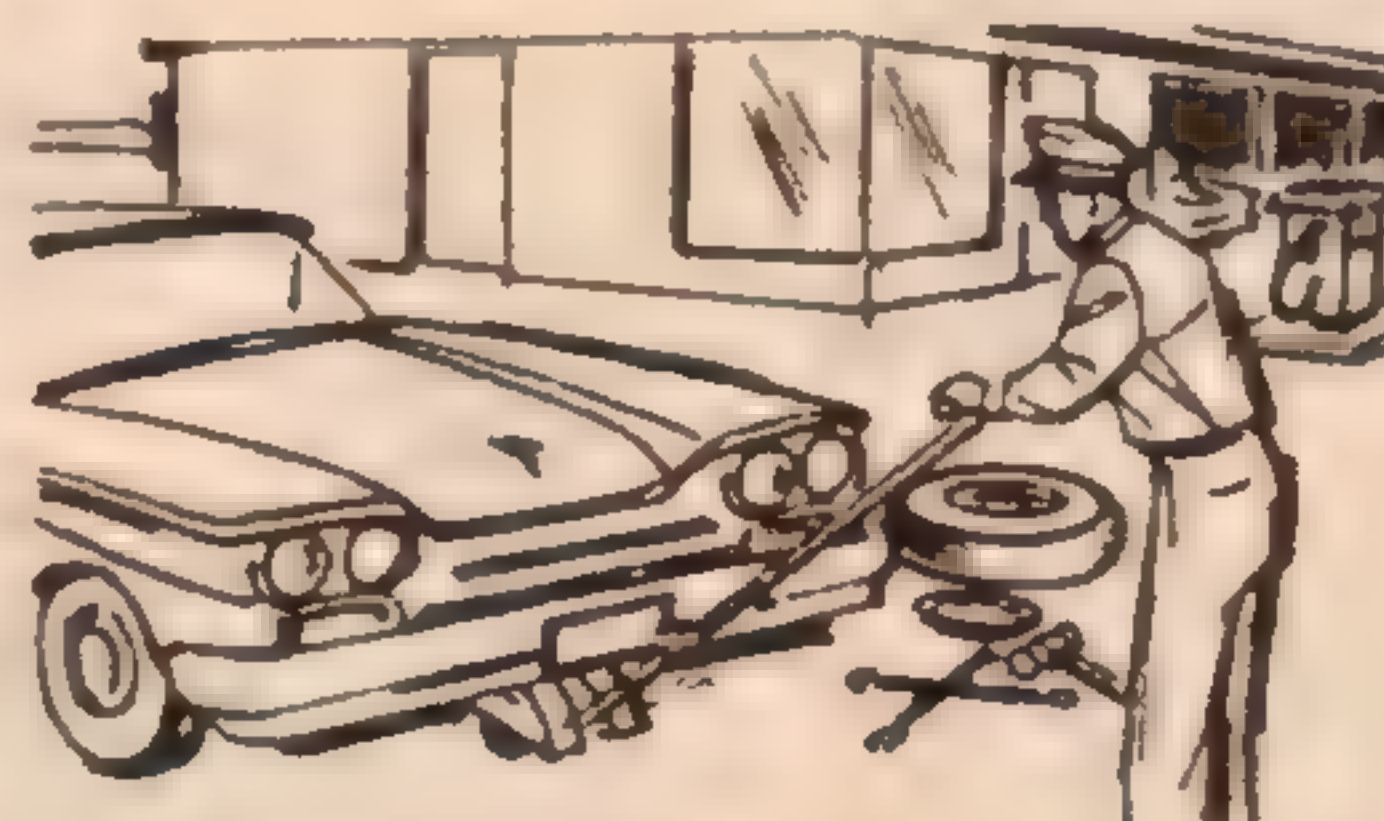

### Tires Are Stocked

Most Ward Catalog Stores carry Riverside Tires in stock for on-the-spot sale. Check your nearby Ward Catalog Store when you need tires in a hurry. If the size you need is not in stock, they'll rush your order through for fast delivery.

### Free Installation

Want your new Riverside tire mounted? Order through your nearby Ward Catalog Store—they'll arrange for expert mounting service in exchange for your old tires . . . saves time, trouble and extra fees having tires mounted.

## Ward's Riverside 4-SQUARE GUARANTEE

**1 TIME:** Every Riverside passenger tire is guaranteed against road hazards for a specified period from purchase date—12, 15, 20, 24 or 30 months. Tires used commercially are guaranteed for one-half of these periods. If unsatisfactory within that period, return the tire to the nearest Ward Branch. We will repair it free of charge or replace it with a new tire, charging for each month you have had the tire, a proportionate part of the price in effect at the time of adjustment. This guarantee covers failure due to cuts, bruises, or other injuries, but does not cover ordinary punctures, loss by theft or fire, or damage from collisions and other accidents.

**2 AGAINST DEFECTS:** We guarantee every Riverside passenger tire to be free from defects in workmanship and materials for the full term of the original tread, without limit of months or miles, or we will replace it with a new tire charging for the amount of tread wear, a proportionate part of the price in effect at the time of adjustment.

**3 SATISFACTION:** Riverside tires are also covered by Ward's policy of complete customer satisfaction.

**4 NATION-WIDE SERVICE:** This guarantee will be honored at all Ward Branches. It does not cover consequential damages. No agent or employee may change this guarantee.

PLUS EXCISE TAX

- A Truly Premium Nylon Tire, Built for Those Who Demand the Very Best.
- 12% Deeper Tread for Up to 31% More Mileage.
- Lower, Wider for Greater Stability even at Turnpike Speeds, Better Control on Curves.
- Softer, Quieter Riding... Less Driver Fatigue.
- Over 5,000 Hook-Like Tread Edges Mean Surer Starts and Safer Stops.

### the Best by Test

#### Proven on the Highway

Riverside Nylon S-112 Tires were put through exhaustive skid-resistance tests over wet road surfaces. The wider, deeper highly inserted tread with interlocking "sipes" has over 5,000 gripping edges to stop faster, safer.

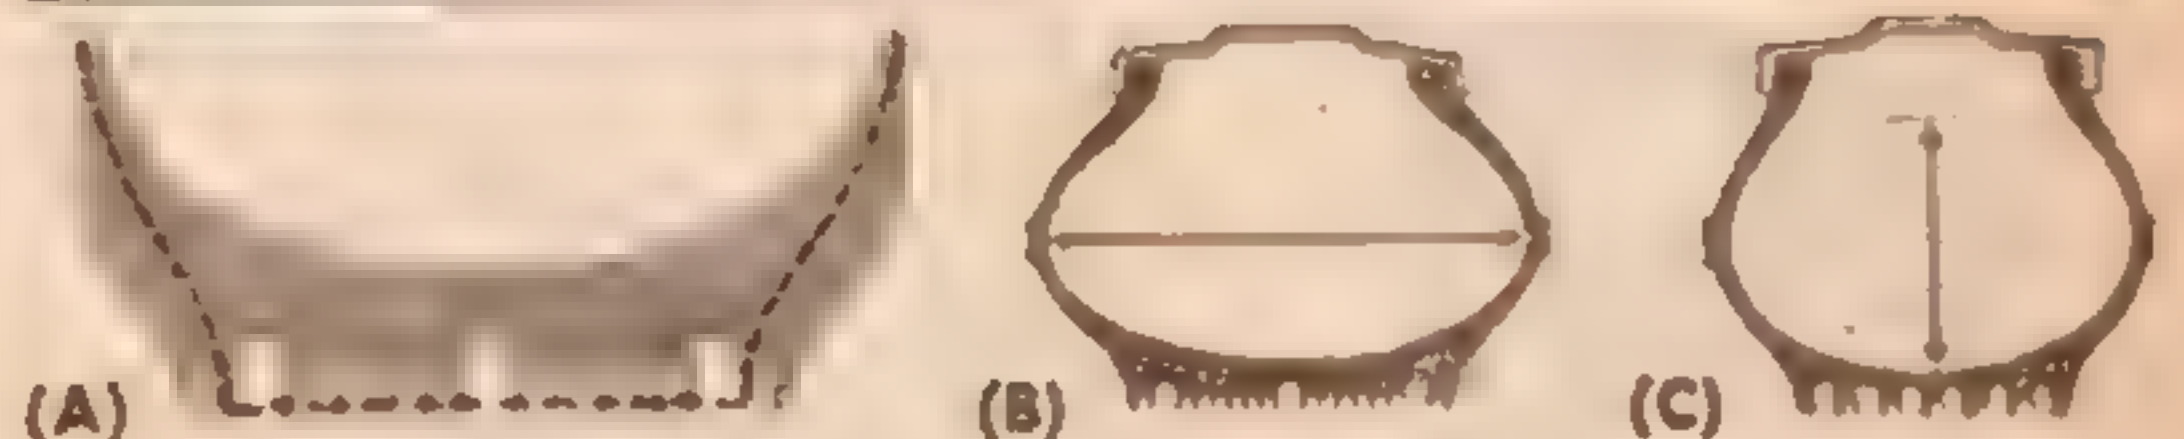

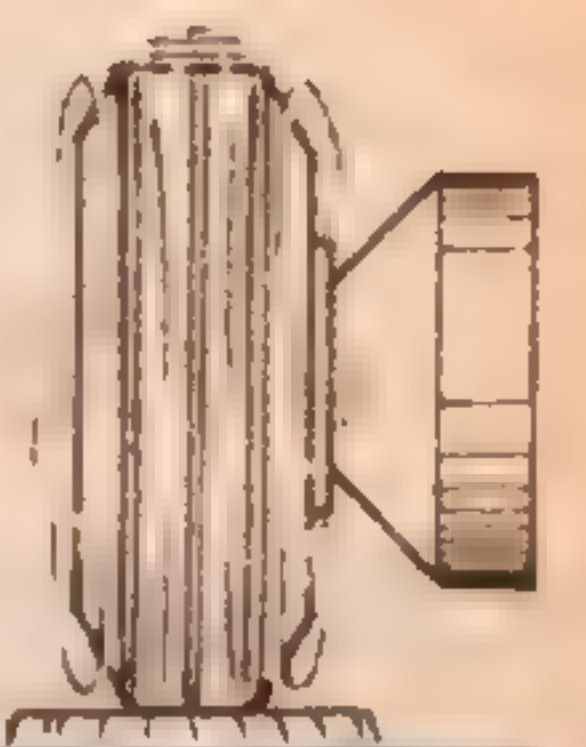

#### Proven on the Test Track

Riverside Nylon S-112 Tires were run at sustained high speeds at Lancaster, California test track. During this test, the Nylon S-112 proved its superior blowout resistance, stability, better car handling and over-all performance.

#### Proven in the Laboratory

Placed on a high speed laboratory testing wheel, the Nylon S-112 showed less than normal tread distortion... means a safer, cooler running tire that increases mileage up to 31%... extends the "safe-life" period of the tire.

#### Wider, Deeper Tread... Low Profile, Too

**Wide Tread is 12% Deeper.** See how much extra tread you get in the Riverside Nylon S-112. Compare it to the tread thickness of other tires (as in dotted line in section A above). The S-112 has an ultra-soft, longer-wearing, softer riding tread rubber, too—compounded to a greater stress and strain than ordinary tires.

**Profile Design.** The Riverside Nylon S-112 is built lower and wider for greater stability, longer mileage, smoother riding and an extra margin of safety. See the cross-section above. Ordinary tire (C) supports the car with a narrow vertical column of air. The S-112 (B), with its wider base of air, gives a greater area of support to resist disturbing forces created by the car's weight and speed... means safer, easier driving.

## TYREX "64"

- For Safer Driving at any speed!  
Same Quality as 1961 New-Car Tires.
- Perma-Sized to Minimize "Growth"—runs free of tension in use . . . means safer driving.
- 20% Longer Guaranteed Service than our Safety Nylon tire.

### Super Non-Skid Tread

Over 3,000 Gripping Edges provide sure-footed traction over almost every kind of road surface . . . knife their way through slippery road film for an extra margin of stopping safety. 7-row tread gives better steering control even at high speeds, holds curves with less sway for greater safety.

### Improved Tread Rubber Compound

gives a softer, more comfortable ride . . . absorbs bumps and jolts for smoother driving. Quieter riding, too . . . reduces noisy squeal on sharp turns. Yet it wears longer for more miles with greater safety.

### With P.C.C. for Greater Safety

P.C.C. (Perma-sized Controlled Contour) means the tire has been inflated as it cools, after the curing process at the factory. Your tire size is "set" at the factory so that it will run free of tension on your car. This eliminates undesirable growth while the tire is in use. You get "true-circling sizing" for safer driving, longer mileage.

**Super-Strength Tyrex®** cord construction for dependable service and long mileage.

(Tyrex® is a collective trademark of Tyrex, Inc. for tire yarn and cord.)

JUST SAY "Charge It" SEE PAGES 1281, 1282

New "Low Profile" Tire with Nylon Cord  
Added Safety at a Moderate Price

Riverside

SAFETY NYLON

- Meets Average Driving Needs for local driving plus the longer trips you take each year.
- Low-Profile Construction for greater stability on curves—increases safety even at high speeds.
- Wider, Higher-Shoulder "King Row" Tread for sure-footed get-aways and safer, quicker stops.
- 33 1/3% Longer Guaranteed Service than our Riverside Air Cushion tire.

Outstanding in the Medium-Priced Field

A Quality Tire at a Modest Price! Built with Nylon cord for best protection against bruising, flex fatigue, heat and moisture damage . . . won't rupture or break when you hit curbs or chuck holes.

"Low Profile" Construction. Lower, wider contour means safer driving because it provides greater stability and faster steering response on curves or when passing.

Size 7.50-14

RIVERSIDE TUBES for \$290 Plus Excise Tax

## NYLON

**POWER GRIPS**

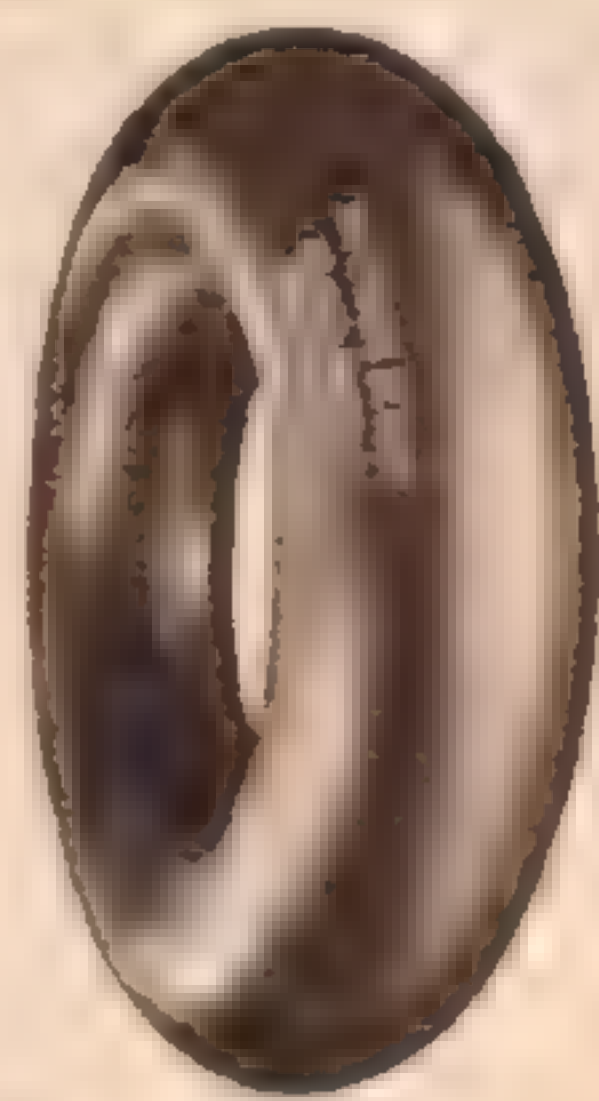

- Pulls You Through When the Going Gets Toughest.
- Wide, Deep, Self-Cleaning Tread with improved tread design for greater stability, longer mileage, excellent continuous traction.
- Super-Strength Nylon Cord Body is built to take the heavy pounding of rough winter driving.
- Guaranteed Two Full Years—see Page 1140.

Husky, Deep-Biting Lugs get a powerful grip in snow or mud ... make bad weather driving so much easier and safer. "Skid resisters" in tread reduce spinning and slipping on ice or wet pavement, too. There's no excessive sway or noise common to many mud and snow tires. Longer wearing tread combines super traction in mud and snow with quieter riding on city streets.

A Truly Rugged Extra-Traction Tire, built for a full 24 months of guaranteed service expectancy. Shipped promptly from Stock in Mail Order House. *Mailable.*

### Need New Tubes?

Protect Your New Tire Investment. Order new butyl tubes for them too! Don't gamble with old, stretched tubes ... they may wrinkle or fold in new tires. Order from Riverside Tube listings on Page 1143.

## SAVE GAS... Change Plugs Every 10,000 Miles

**Auto Manufacturers Recommend New Plugs Every 10,000 Miles.** New plugs give the full spark your engine needs for complete combustion. Help keep your engine operating at top efficiency—let it deliver all the pep and power it was built to give. New plugs are a sound investment, too—pay for themselves in gasoline savings.

**Over 42% of the Cars on the Road Today have 1 or more plugs that misfire.** One spark plug misfiring in a 6-cyl. engine means one gallon of gasoline out of six is wasted.

**Check Spark Plugs Now.** Look for (a) Cracked or broken insulator; (b) Dirty insulator; (c) Cracked or broken firing ends; (d) Burned electrodes; (e) Sludgy deposits.

### Safety Sure . . . For Your Family's Sake

Get Surer Traction . . . Greater Stopping Safety. According to tests made by the National Safety Council, only chains give the go-ahead traction and safer stops required when driving on or hard-packed snow. Riverside Tested Chains are made of quality case-hardened steel with electronically welded cross for longer wear. Mailable from Mail Order House.

(1) and (2) have positive locking fasteners—include handy wrench. (1) Reinforced Lug-Grip Type for heaviest use. Reinforced wedge-lug teeth dig into ice and packed snow for more traction, more protection against skidding. (2) Twist-Link Type for road wear. Links lie flat on tread.

### A Charge In Time Saves . . .

. . . Irritating and Costly Service Calls. With a low cost, top efficiency Home Charger you can keep your battery at peak performance with regular recharging—adds months of service.

**Ends "Guess Charging."** Every Riverside has either an Easy-View Meter or pilot lamp to show charger in operation. Charging rate tapers as battery life is restored.

**Easy to Use.** Just plug charger into any 110-120 volt AC outlet; connect clips to terminal and charge. No need to remove battery from car—charge overnight. Charger can be hung on wall or set right on car fender.

**Smartly Styled.** Charcoal and white enameled ventilated steel case. With 6-ft. battery cords with clips and 8-ft. outlet cord. All Riversides are UL Approved.

### DeLuxe 2-in-1 Charger (6-12 volt)

(3) **Your Best Buy.** Full 6 ampere charge rate on either 6 or 12 volt batteries. Tapers to 3 amperes. Deluxe Easy-View Meter shows correct charging rate. Simply set switch for either 6 or 12-volt charge. Charger has "No-Mar" rubber feet (see C); built-in cord rack keeps charger cords neatly in place when not in use (see A); handy hang-on-wall features (see B). With deluxe easy-grip handle.

## NEW CLIMATE CONTROL RIVERSIDE BATTERY

### Like Having 2 Batteries . . . 1 For Winter—1 For Summer

The Only "2-in-1" Battery . . . provides super start power in winter—prevents "heat-damage" in summer. During winter driving a battery needs more acid concentration for added starting power . . . Climate Control allows you to scientifically lower the water level to provide a higher concentration of acid—to give "more kick" for super starts. Summer driving requires less acid concentration and more plate protection . . . with Climate Control you can increase this water level to prevent sulfation of plates—your battery is always "power-peaked."

New Double Filler Caps provide this corrected water level for each season . . . lower level for winter—higher level for summer. This simple change-over procedure is fully explained on the battery top—a new one-piece cover with a permanent seal for better rigidity and greater protection from corrosion.

Guaranteed For The Life Of Your Car. (See Climate Control Guarantee a right). The all-new Riverside Super Power with Climate Control is sold only at Wards. Not Mailable. To Order See "Ward-Ways" for buying.

### Double-Life Custom-Coated Mufflers COATED INSIDE AND OUT FOR GREATER LIFE

- (A) STEEL OUTER SHELL, CUSTOM-COATED INSIDE AND OUT** (With Aluminum-Zinc) Assures Longer Muffler Life.
- (B) ASBESTOS LINING**—Insulates Against Body Noises and Heat—A Riverside Value-Plus Feature!
- (C) STEEL INNER SHELL, CUSTOM-COATED INSIDE AND OUT** (With Aluminum-Zinc). Protects Against Rust INSIDE Where It Starts... Means Riverside's Last Longer!
- CUSTOM-COATED HEADS (Coated Inside and Out) Are Spun and Locked to Shells For Most Effective Gas Seal.
- CUSTOM-COATED END PIPES. Made for Precision Fit.
- MULTIPLE INTERNAL SUPPORTS, With End Supports Custom-Coated, Too, for Increased Muffler Life.
- SLOTTED PERFORATIONS for Correct Dispensation of Gases. Minimum Back Pressure, Effective Silencing.

Custom-Coated With Zinc and Aluminum Inside and Out for extra-long protection. Custom-coated INSIDE where the rust begins... resists the corrosive action of exhaust deposits. Designed with all the latest engineering developments to last longer, operate quietly and efficiently.

**Riverside Mufflers Last Longer.** Custom-Coated heavy-duty outer shell provides extra strength and service; inlet and outlet pipes are constructed of heavy 18-gauge steel.

**Riverside Mufflers Operate Quietly and Efficiently.** The large full length tubes are electronically tuned for quiet-like tone of operation. Each chamber is tested to provide for fast exhaust flow with a minimum of back pressure.

**Riverside Mufflers Have Head-To-Shell Seal, Muffler-To-Pipe Fit.** Compressed layers of steel around end caps along with perfect pipe fit provides the most effective possible seal against deadly carbon monoxide leakage.

**Note:** Illustration is a typical Riverside Muffler. Variations occur according to original equipment. Order new clamps with new muffler. Check clamp needs on Opposite Page. Mufflers Mail.

### Mufflers for all Types Exhaust Systems

**Factory Installed Dual-Exhaust Type.** Replacement for dual exhaust systems that were installed on passenger cars at the Factory before shipment to car dealers.

**Non-Factory Installed Dual-Exhausts.** For dual exhaust systems installed by the car or truck dealer, or purchased at Wards and installed by the car owner.

**For Single Exhaust Systems.** For cars and trucks not equipped with a factory installed dual exhaust system.

# Fiberglas-Packed Hollywoods

**D Precision Engineered With A Longer Body.** Expertly designed "nervy" action mufflers for better, quieter, longer wear. New exhaust. Eliminates back pressure and muffler congestion. Lasts longer. Guaranteed to deliver all the power, speed and economy it was built to deliver. Kyles has built for more than 40 years in business, his values are your "all around" efficiency.

**Expertly Constructed for Lasting Quiet Performance.** Study heavy-duty, tested construction with expertly fitted, close out-fitted, locked locking mechanism. Well finished with two types of enameled interior to work up interior sound waves back. Long fillets absorb noise, damp resonance, absorb vibration, deaden high frequency noises. Protective film on exterior.

**Note:** Buy two for deal. Check for all we on the type Muller.

**Clamps Not Included**—Check present muffler for sizes needed or see list-  
ings of Double-Life mufflers on Pages 1160-1161 for clamp sizes shown for  
your model—order clamps separately from Page 1161.

## DUAL PIPE KITS For More Power and Economy

**Cross-Over Exhaust.** Builds up back pressure as entire exhaust flow is restricted to a single outlet. Means loss of power, poor gas mileage.

**Dual Exhaust.** Reduces exhaust back pressure. 2 separate outlets permit unrestricted exhaust flow. Means greater power, better gas mileage.

## Riverside Engines

NOT JUST REBUILT BUT  
100% RE-MANUFACTURED

### HERE'S WHAT "RE-MANUFACTURED" MEANS

- Completely Dismantled. Every bolt, stud and plug removed—worn parts are junked—all others are cleaned and re-sized to original specifications. Re-assembled by experts and thoroughly tested for like-new performance.
- Brand New Pistons. New Rings and Pins completely installed.
- Crank shaft Reground, polished, then fitted with realigned rods for precision-balance.
- New Main Bearings and Rod Bearings.
- Fully Guaranteed by Wards New Car Guarantee below.
- Cylinder Walls Rebored to exact new engine tolerances and honed to satin finish to meet S.A.E. specifications.
- Cylinder Head Surfaces Reground for tight fit.
- Camshaft Reground restores accuracy, original tolerances. New Bushings.
- New Timing Gear or Chain as required by carmake.
- Oil Pump re-manufactured.
- Precision Craftsmanship for complete dependability.

### FACTS ON USED CARS, OVERHAULS

Engine Wear on a Used Car is Usually Unknown. It may have had a cheap overhaul—or none at all. You know your own car—the care it has had. If body and chassis of your car are good you can get more years of service by installing a Riverside engine.

A Used Car Depreciates Rapidly. In less than one year, depreciation will usually equal or exceed the price of a rebuilt engine.

An Overhaul Won't Do The Job . . . a few rings and reground valves can't put a worn engine into "top" condition—it takes a re-manufactured engine will all the new parts. In some cases, Wards install up to 197 new parts.

Compare These Facts. When you buy a rebuilt engine, make sure it's a re-manufactured engine . . . not just an overhaul.

### HOW YOU SAVE ON RIVERSIDE

About Riverside Piston Rings. These exclusive rings are better because they are pre-sealed at factory to assure quick run-in.

How You Save. Compare Wards offering with any other exchange price deal anywhere. No hidden extra costs—no return freight charges because you do not return your old engine to Wards . . . sell it locally and pocket the savings. Add up the "Return Freight" and average scrap value of your engine . . . see how you save an extra \$15 to \$17 on any Riverside engine.

Note: Additional parts are shown in listing, (heads and pans so included are factory installed, and gasketed). Where parts are not included, reuse from your engine. No heads or lifters on overhead valve engines.

### HOW TO ORDER RIVERSIDE ENGINES

State Make, Year, Model of Car and Type of Transmission. We will include with your engine (1) Guarantee; (2) Bill of Sale (send order in name of person who will apply for registration); (3) Installation certificate (fill out and return).

Shipping Information: Numbers ending with "R" shipped from Stock; numbers ending with "F" are shipped promptly from the Factory in New Brunswick, N.J. or Chicago, Ill.

### NEW-CAR ENGINE GUARANTEE

Riverside Re-manufactured Engines for Cars are Guaranteed for 90 days or 4,000 miles (whichever occurs first) against any defects in material and workmanship, when installed and run according to instructions . . . defective parts to be returned to Wards prepaid. Labor cost will be allowed only if engine proves defective within 30 days. Riverside re-manufactured engines for truck or commercial vehicle installation are guaranteed for 30 days, if installed and run according to instructions. Guarantee and instructions included with each Riverside.

NOTE: Do Not Send Your Old Engine to Wards, Sell it Locally and Pocket the Savings. See "How You Save" Information Above.

## Why Pay More...

### FOR TOP QUALITY PISTON RINGS

Riverside Chromagic and Super Chromoil Piston Ring Sets equal nationally advertised brands. Why pay more for same quality?

Save \$40 to \$60 by installing yourself. Average mechanics charge from \$5 to \$7 an hour. Do the job yourself and pocket the additional savings.

Check These Danger Signals: Excessive oil use and frequent oil checks; excessive gas consumption; lack of car pep—low compression. Restore power and economy with Riverside Piston Rings.

Rings Sets 1A, 1B  
Chrome Plated on  
Friction Areas

Chromagic

Chrome-Plating Gives Double Ring Life. Riverside Ring Sets (1A and 1B) have chrome-plating on vital friction areas. Ring life is increased 2 to 4 times because chrome-plating on these vital areas fights friction, heat, abrasion, corrosion—you get thousands of trouble-free, higher-economy miles from Riversides at far less cost.

Pre-Seated at the Factory... the equivalent of 5,000 miles of actual operation with rings which are not "run in". Seat fast, deliver instant oil control, start performing their function in just a few miles.

**1A** Our Newest and Finest... Riverside Chromagic All-Purpose Ring Sets. The same type of chrome rings used in many 1960 cars. Engineered to meet the demands of today's high compression autos. Restores the power and economy of operation in older cars, too! Abutment-type expanders maintain contact at every point around the inside diameter of the ring with a uniform pressure. Conform to any cylinder, whether rebored, resleeved, honed or worn. Chromagic Rings are fully chromed... give 2 to 4 times longer wear and resistance to friction, heat and corrosion. Pre-seated at the factory to speed "run in".

Available in Standard or .020, .030, .040, or .060 Oversize and consist of the following rings. See "How to Order" at top of page.

**Top Groove:** Cast-alloy iron compression ring. Upper inside edge is grooved to give torsional twist for quicker, more positive seal. Solid chrome-plating on face. Pre-seated at the factory.

**2nd Groove:** Combination cast-iron ring, chrome-faced steel rail and steel expander. Extra flexible to conform to cylinder for greater support to both top ring and oil ring below.

**3rd Groove:** Latest design 4-piece, all-steel oil control ring. Features abutment type expander (see above), independent of groove depth. The most conformable, fastest draining, longest lasting, best performing oil ring on the market. Both steel rails are chrome-faced and pre-seated. (For 4-ring pistons, sets include cast iron oil ring with wide channel and larger size slots for quick oil drainage).

Super Chromoil

Available in Standard or .020, .030, .040, .060 Oversize and consist of the following rings. See "How to Order" at top of page.

**Top Groove:** Cast-alloy-iron compression ring. Solid chrome plating on face, pre-seated. Torsional twist by groove in upper inside edge.

**2nd Groove:** Combination cast-iron ring, chrome-plated steel rail, steel expander for extra flexibility.

**3rd Groove:** A 4-pc. all-steel, flexible oil control ring of good conformity. Steel rails chrome-plated. Spacer, expander for added drainage. (4-ring piston sets include extra-wide slot oil ring.)

Steel-Flex

**Top and 2nd Ring:** Silcoated cast iron—fast seating and positive seal. **Oil Ring:** A steel-section flexible 3-piece ring and expander. Gives excellent oil control, compensates for worn or distorted cylinders.

FOR CARS, STATION WAGONS AND TRUCKS—STATE SIZE

### HOW TO ORDER

Measure cylinder below bottom of ring travel with inside micrometer to determine whether bore is standard or oversize.

All Words Piston Ring Sets are available in the following sizes. Standard, .020, .030, .040 or .060 oversizes. Be sure to state size wanted. Order Your Piston Rings on Credit. Buy now—pay later, for Complete Details see Pages 1281 to 1283.

### ABOUT RING SIZES

"Standard" means new-car cylinder diameter. Always order "Standard" size if car cylinders have not been rebored, regardless of car age or mileage. "Standard" fits standard to .019 oversize. If cylinders have been honed, resleeved or rebored, and oversize pistons are installed, or if motor has been rebuilt, determine actual oversize. Check pistons for number and type of rings required.

# Order Riverside Pistons and Flexible Expander Rings Here

AVAILABLE FOR MOST CARS, STATION WAGONS, AND TRUCKS—STATE SIZE

## HOW TO ORDER PISTONS

Number of pistons wanted. Also State Standard Size or Oversize you want. Take exact micrometer measurement of hole at bottom of bore. When reboring or re honing, rebore or rehone to the next regular Oversize; order of the same rebored or re honed Oversize.

## SHIPPING INFORMATION

Catalog numbers not ending in "K" are shipped promptly from Stock in Standard Size only. All Oversize (.020, .030, .040 and .060) are shipped from Factories in Elgin, Illinois—allow Factory 10 days extra. You pay shipping charges from Factory. Order from table below.

Riverside Pistons

Perfect Replacements of Original—with or without rings. Fit both cars and trucks. Made by one of America's foremost manufacturers. Heat-treated, precision machined. Made of low-expansion aluminum alloy. Ring grooves are cut to exact width and depth to avoid strain or fracture of ring lands. Finished on precision cam grinder. Piston pin hole is diamond bored for noiseless operation and perfect fit.

Pins are heat-treated steel, precision ground and lapped.

See "How to Order" and "Shipping Information" at top of page. Pistons are furnished in Standard Size, .020, .030, .040, .060 Oversize.

SHIPPING WEIGHTS: Piston alone—each 2 lbs. Piston with Rings—each 2 lbs. 4 oz. Average ship. wt. complete set—15 lbs.

## Riverside Flexible Expander Rings

Sold Only With Pistons

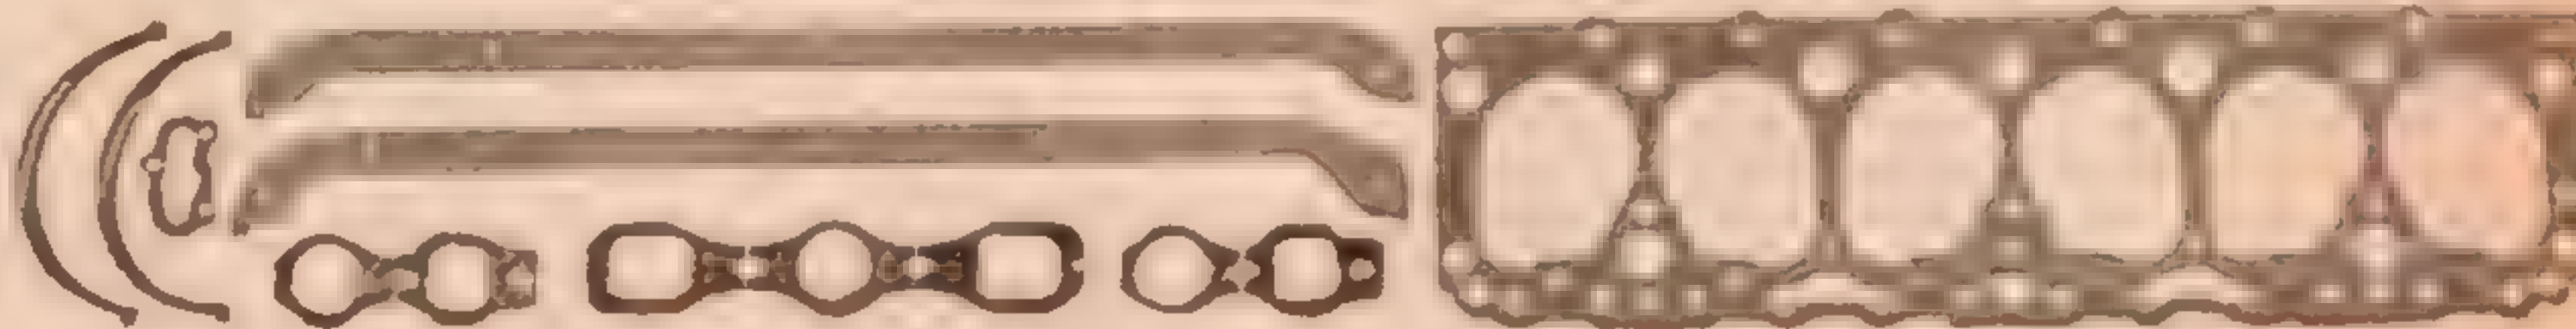

Good Quality Rings—save extra when you buy rings with pistons. Riverside Expander Rings are sold only with Riverside Pistons (9) above. For cylinders tapered up to .005; also for resleeved, rebored or rebored installations.

Designed for fast seating to give top performance and efficiency—but without the extra-long life and flexibility of chrome-plated pistons listed on opposite page. Top rings and second rings are silcoated cast iron of modern design for fastest seating. Expander-type oil ring compensates for irregularities in cylinder wall for good oil economy.

See "How to Order" and "Shipping Information" at top of page. These rings are not sold separately.

## FLUID DRIVE FAN... SAVES GAS

- Thermostatic Control
- Saves on Gasoline
- Gives Effective Cooling at All Running Speeds
- Greater Engine Power
- Less Engine Noise
- No Maintenance . . . Only One Moving Part

Save Engine Power . . . Save Gasoline . . . Get proper cooling at all speeds . . . minimize fan noise. Fluid drive Fan controls fan speed—moves more air at low speed than original equipment fan for better cooling in low speed range; runs fan slower when car is in higher speeds where fan cooling is needed less. Limits fan speed to below rate at which annoying fan roar occurs. Does not disengage fan at any time. Same unit as currently being installed on many air-conditioned cars as original equipment. Easy to install. Fits Only These Cars:

## NEW! Pressure Auto Radiator Caps

Pressure Radiator Caps Protect Your Car—be sure they're doing the job properly. Modern radiators are designed to cool with water under pressure controlled by radiator cap. Worn gaskets, weak springs in old cap destroy control.

Is your car overheating? A faulty cap may be causing it. Check today—avoid "boil-over breakdowns," unnecessary aggravation, permanent damage to your car's radiator and cooling system. Fit these cars:

Buick 1940-60 Dodge 1950-60 Nash 1949-57  
Cadillac 1949-60 Ford, Mercury 1949-60 Olds. 1941-60  
Chevrolet 1948-60 Hudson 1949-58 Plymouth 1949-60

## Pressure-Clutch Plate Combinations . . . Clutch Plates

Today's Trend Toward High-speed Engines Demands Perfectly Balanced Equipment. Unbalanced rotating parts cause vibration, often too slight to be noticeable, but enough to cause poor performance and excessive wear on bearings. Riverside clutch parts are precision machined to meet and exceed specifications set by other manufacturers of clutch parts.

18 Pressure Plate—Clutch Plate Combination. Fully rebuilt original units. 60% of old parts replaced by all-new ones. New Springs in every unit. New, heavy-duty wire-reinforced or molded lining on clutch plates. Accurately adjusted. Tolerance held at .003 to .005.

19 Spring Center Clutch Plates. Free springing center (ex. Hudson). Drop-Forged hub broached to S.A.E. Specs. Wire reinforced facings for longer wear. Av. Ship. wt. 4 lbs.

Where Exchange Price is shown, return old unit later for difference. See "How To Order" at right—send information requested.

How To Order: On Nos. ending in "K", State Car Make, Year, Model, Ser. No., and if with or without Overdrive—Shipped promptly from Fact. in Chicago, Ill. or Detroit, Mich.—pay postage only from nearest Mail Order House.

### Rebuilt Car and Truck Transmissions

#### Check These Features

✓ **Rebuilt Like New** by one of America's leading transmission rebuilders. Guaranteed 4000 miles or 90 days—whichever occurs first—or replaced free.

✓ **Genuine Original Transmissions.** Same as came in car. Each disassembled, cleaned and inspected. All worn parts replaced with new parts.

✓ **Tested After Assembly** on Dynamometer under actual loads, as well as free running, to assure proper operation in your car.

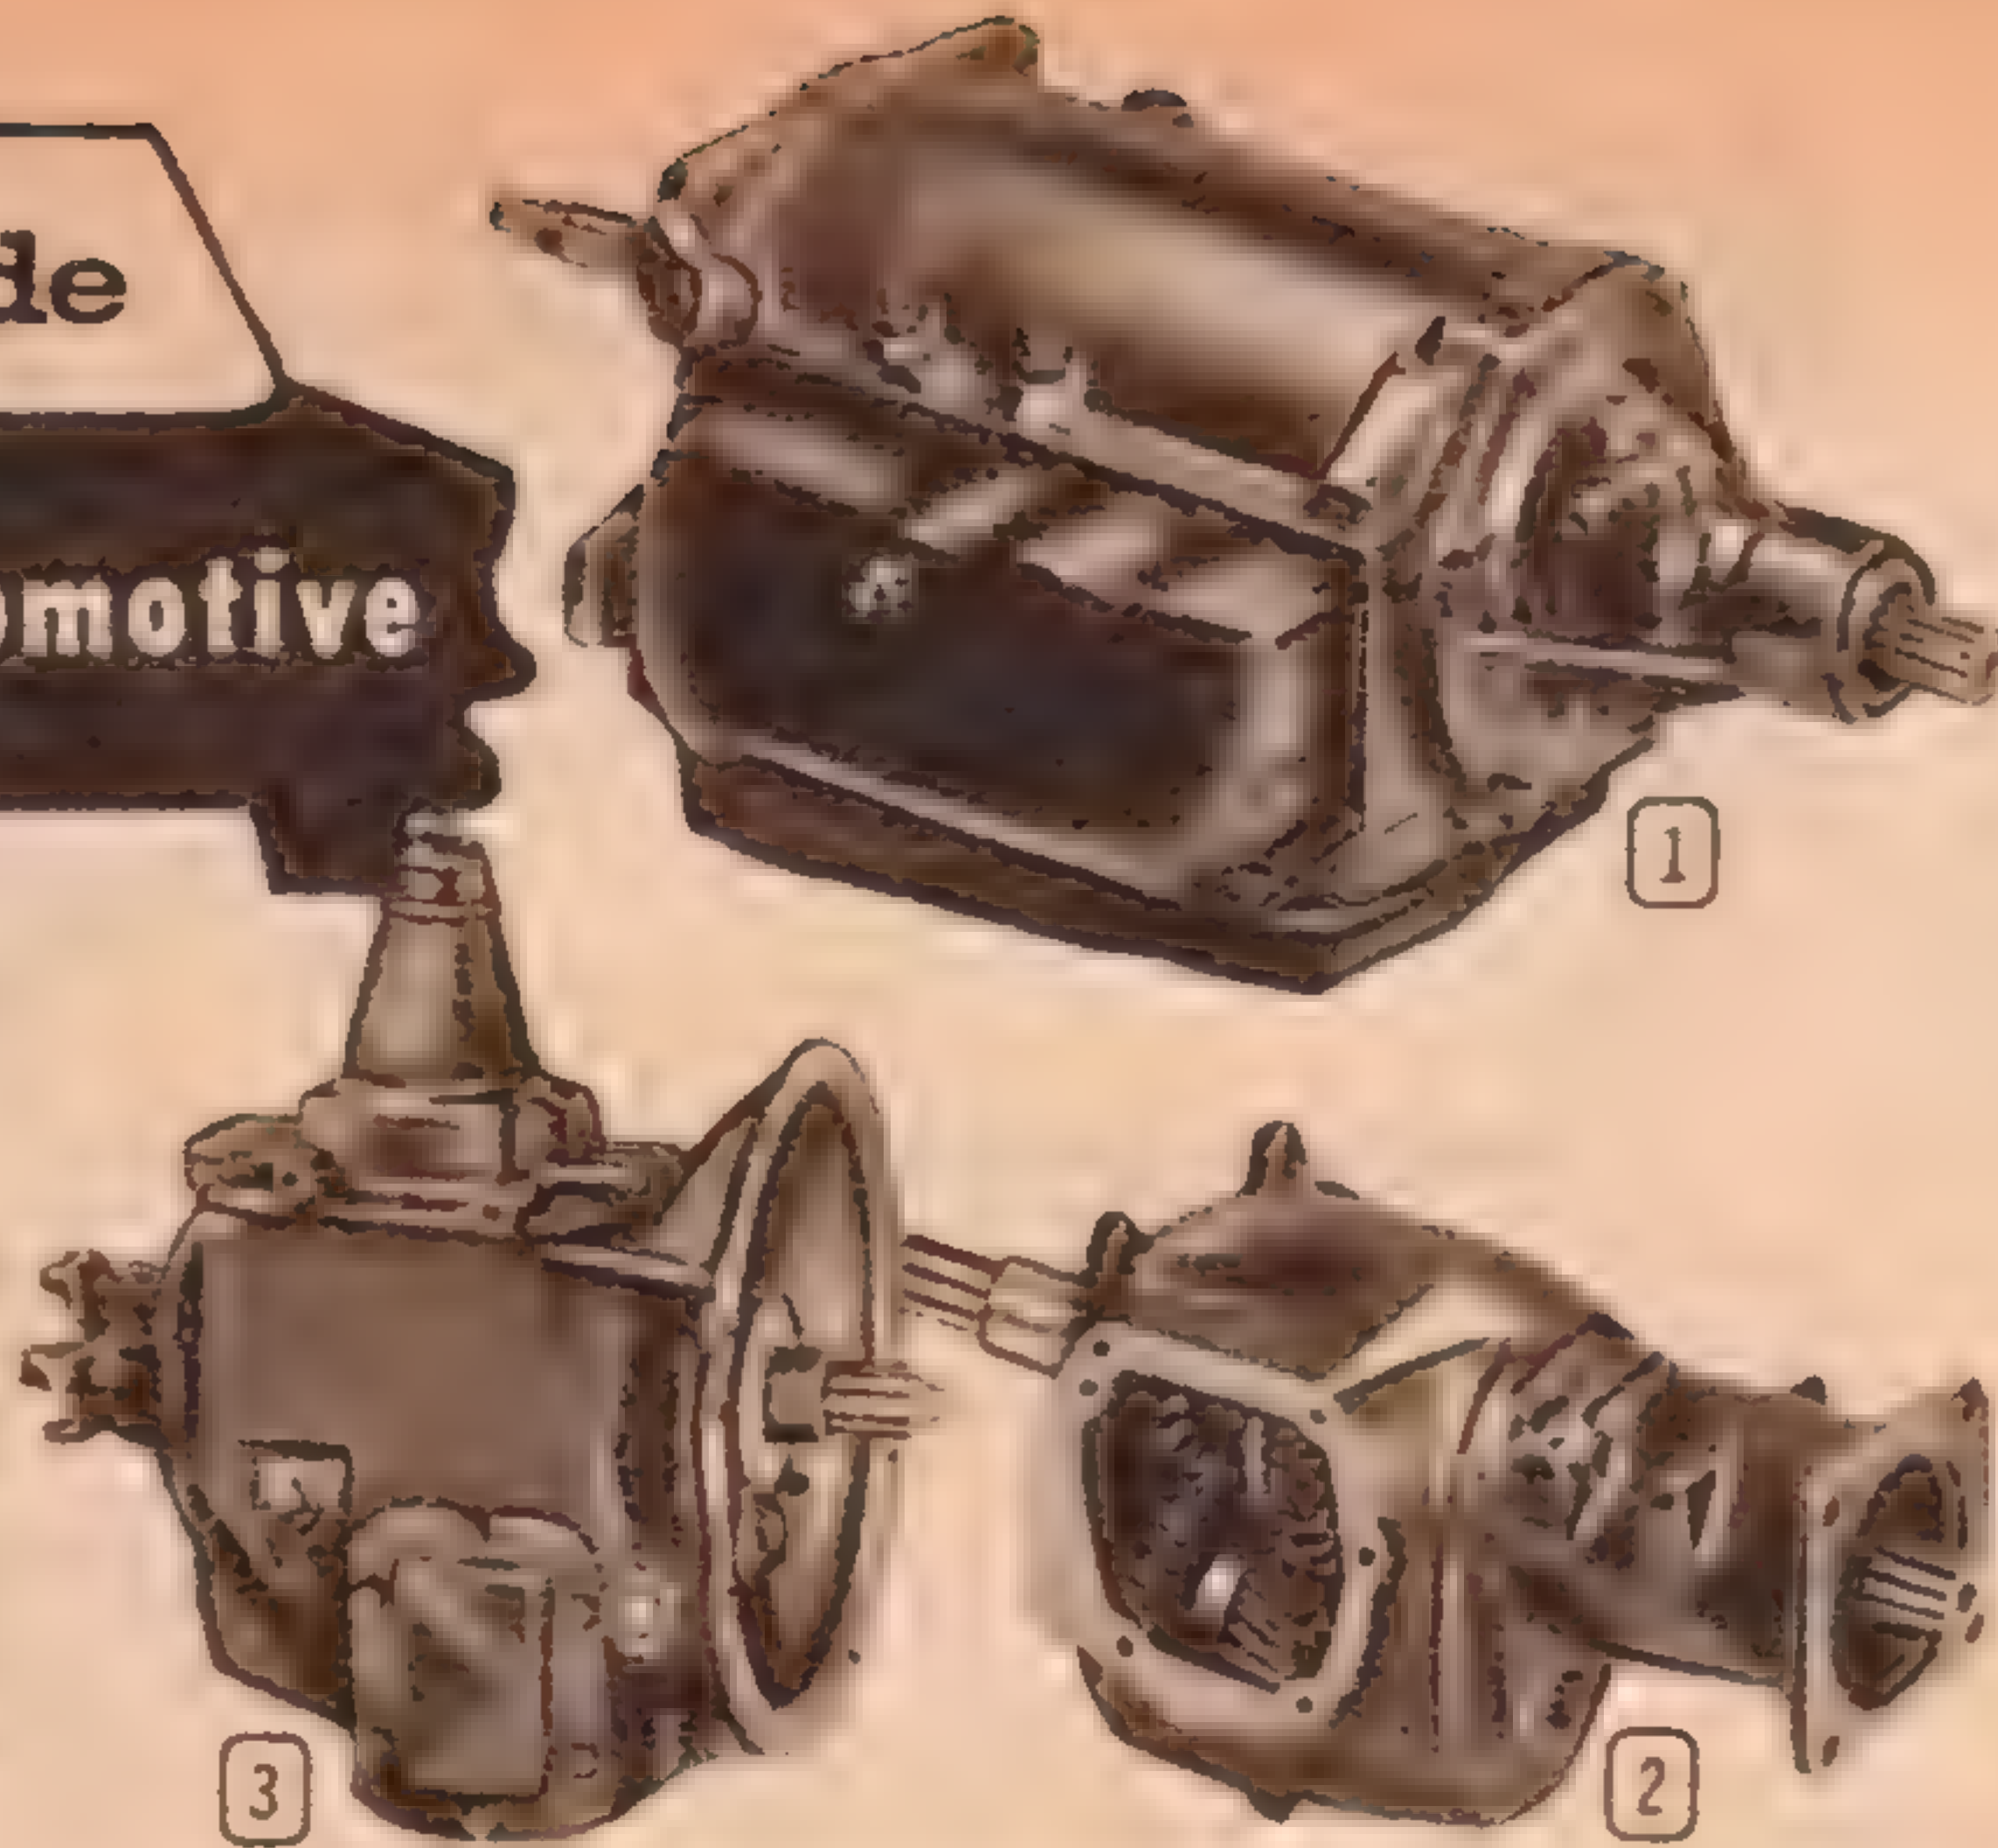

✓ **Ready to Install.** Just add the necessary lubricant. Order multi-purpose gear lubricant on page 1189 for standard transmissions; automatic transmission fluid below.

✓ **Instructions Included.** Tells how to remove and install transmission.

### HIGH SPEED TRANSMISSIONS

4 For Ford V-8, Mercury Cars. Completely rebuilt with high speed first and second gears for faster pick-up. Save gas. Our regular 90-day or 4,000 mile guarantee does not apply because of unusual type of service to which these units are subjected. State make, year. See "Ship. Infor." (right). 61 A 3731F—For Ford V-8 1932-48. Wt. 60 lbs.. \$74.95 61 A 3731F—For Mercury 1939-48. Wt. 60 lbs.. \$74.95

## Your Best Buy In Brake Lining Is Riverside

### HERE'S WHY...

- Low Riverside Prices Mean Big Savings for You. Why Pay More?
- Riverside ready-lined Bonded Brake Shoes equal nationally-known brake shoes in quality, dependability.
- You Save \$12 to \$25 Extra By Installing Shoes Yourself. Easy to Do... All you need is a wrench, pliers, screwdriver and hammer. Full, easy-to-read instructions are included.
- You Save Even More When You Trade In Your Old Brake Shoes. See "How to Order" below. Your old brake shoes bring you a liberal trade-in refund.
- You Save, with 60% to 75% Greater Useful Lining Depth. Bonded construction means Extra Life... Greater Dependability... Lower Cost-per-Mile of Use. No wasted lining depth.
- Prevent Possible Brake Drum Damage... Bonded-on linings eliminate rivets that can gouge or score, damage your drums.
- Get 1/3 MORE Braking Area... Greater Efficiency, extra stopping ease... longer life... more dependability, freedom from pedal "fade" in severe use.
- Finest Quality... by one of America's leading friction materials producers. Assembled on re-manufactured shoes (only sound shoes used). Each relined shoe fully, individually Bond-Tested for dependability.

### Fully Guaranteed

You take no chances when you buy Riversides. If a Riverside Bonded Brake Shoe or Lining should fail within its guarantee period (barring misuse or accident) We will Replace It Free of Charge.

### How To Order

TO ORDER RIVERSIDE BONDED BRAKE SHOES: Select the quality shoe sets you prefer—either Riverside "25" or "40". Each set has 4 shoes (for 2 wheels, front or rear). When ordering, state Cat. No.—send Wards the Full Price. You will receive a refund Coupon (for whatever the table "Trade-In Credit" shows).

Return old shoes with this Coupon, for refund, to nearest Ward Retail or Catalog Store, or Prepaid, to Wards Mail Order House.

NOTE: Changing Brake Shoes. We recommend, for maximum safety, that you drain and refill your hydraulic system with Riverside Super Heavy Duty Fluid on opp. page. Order the Quart size—drain and refill instructions included.

## Brake Fluid

WHY PAY MORE?

12-oz. Can ONLY 59c

- New, Improved Formula
- Exceeds New S.A.E. Spec. 70R3 for Extra-Heavy Duty Use.

Riverside Super Heavy-Duty Brake Fluid. Now... a better-than-ever formula that exceeds S.A.E. specifications for extra-heavy-duty service in today's high-speed cars. Exceeds Specifications 70R3 and 70R1.

Recommended for All Cars, especially for 1955 and later models needing high temperature brake fluid. Boiling point exceeds 375°—pours freely at 60° below zero. Assures you of positive protection against brake failure due to vapor lock or sluggish sub-zero flow.

Chemically Balanced for safe operation. Will not rust nor corrode metal parts or cause swelling of rubber parts in brake system. Mixes perfectly with all other leading brake fluids. Registered and legally approved in all States where required.

Spring is Change-over Time for Brake Fluid. For maximum safety during the coming hot weather season drain out the old fluid—refill with Wards Super Heavy Duty Fluid. Instructions included with each 1-quart can.

## Signs of Worn Springs

**HITTING BOTTOM.** Springs hit car frame going over bumps—cause shock and passenger discomfort.

**WORN TIRES.** Worn springs can cause inner edge of front tire to wear unevenly, reduces tire life greatly.

**CAR LISTS.** Worn springs can cause your car to slant to one side—means harder steering, less car control. Increases chance of a serious accident.

**Replace Your Worn Springs NOW!** Riverside Springs are original equipment quality at Wards low, low prices.

## Riverside—Equal Original

**Ride Safer on Riverside Original Quality Springs.** If car leans to one side or jolts against axle over rough areas, its springs need replacing. Always replace in pairs, as paired springs distribute car weight equally to protect against excessive tire wear. Riverside's duplicate original in materials, size, shape, fit. Machine forged of the best S.A.E. alloy steel. Oil-tempered, heat treated for proper resiliency, uniformity, strength, arch, fit.

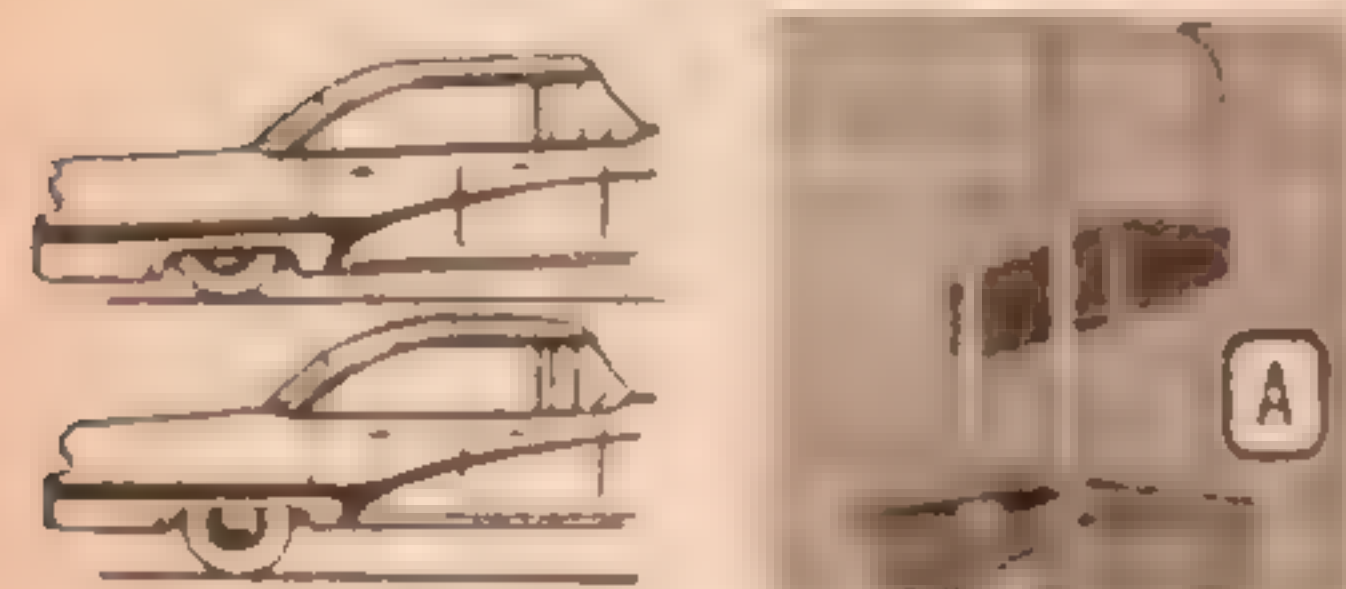

Ship. Wts.: MAIN LEAVES: front—6 lbs., rear—10 lbs.; COMPLETE SPRINGS: as shown in tables.

Cat. Nos. ending in "M," "MO," or "MB" Mailable from Stock. Nos. ending in "R" Not Mailable—shipped from stock by freight, truck or express.

For Super Shock Control

Guaranteed for 30,000 miles. Exceed original shocks by 100%. Working cyl. diam. 1 5/8 in. After 20,000 miles shocks often need replacing. We recommend this super-service shock absorber for greatest comfort and durability on rough roads or heavy loads. Suitable for bigger cars, trucks, or lighter cars wanting big-car control. Easy to install—fit standard mountings without redrilling or special brackets. Rubber bushings included. Average ship. wt. pair, 12 lbs.

**Heavy Service**  
Low **\$5.44** Each in  
as Pairs

Heavy Loads—Towing Trailers

Guaranteed for 24,000 miles. Exceeds original shock by 50%. Working cylinder diam. 1 3/16 in. If you give your car or truck hard service, these give the extra-strength required. More fluid capacity, bigger piston area for better shock absorption. A smoother ride on most types of surfaces, and more comfortable driving and longer life than standard-type shocks provide. Easy to install. Rubber bushings included. Average ship. wt. pair 9 lbs.

**Regular Service**  
Low **\$3.59** Each in  
as Pairs

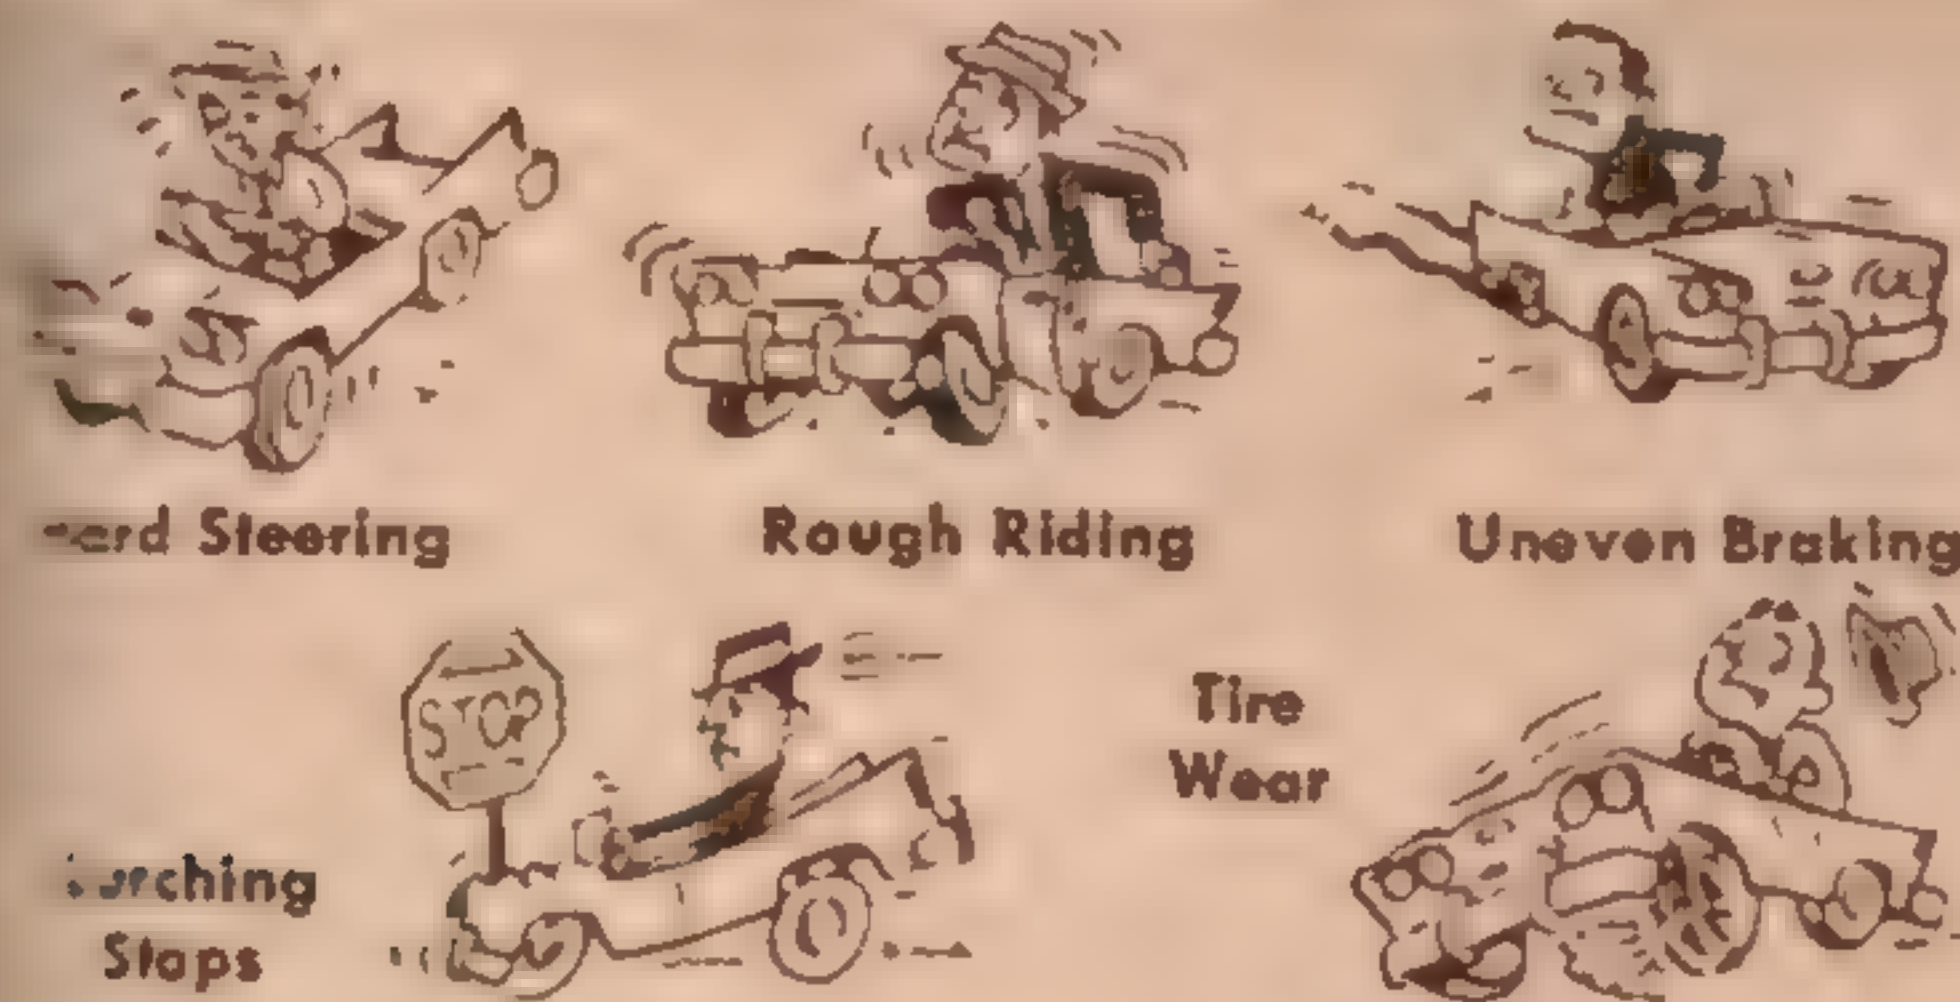

Equal or Better Than

Guaranteed for 15,000 miles. Equals original shock on car. Used as replacement on many truck models. Superior fluid capacity, bigger piston diameter 1 in. Superior valving for better control on rough roads, sorption. Easy to install. Buy in 1 lb. units. Live rubber bushings included. Average ship. wt. 4 lbs.

## SAFER, STRONGER than New-Car Jacks

### TWIN-LEG AND 3-LEG MECHANICAL BUMPER JACKS

Riverside 3-Leg and Twin-Leg Jacks Assure a Firm, Safer Foundation—because car weight is distributed evenly over a larger base area . . . provides a foundation which is more stable on any surface or grade than most new-car jacks. Low height permits lifting of all cars, including those with 14-in. wheels. Bumper hook holds bumper firmly in place. Jack will not tip or slip under load. Make tire changes quickly and easily—hook on bumper, operate handle . . . car raises; operate handle . . . car lowers. Jack folds to fit car trunk.

**1 3-Leg Ratchet Type Bumper Jack.** Lifting capacity up to 3,000 lbs. Swinging contour lifting hook hugs every style bumper. Lifts all cars. Attached sliding handle for quick operation. 6x6-in. base prevents car from rolling. Lift range: 5 to 33 in. Leverage assures easy lifting. Luminous red reflective finish for added safety.  
61 A 5613 M—Mailable. Ship. wt. 19 lbs.. \$6.25

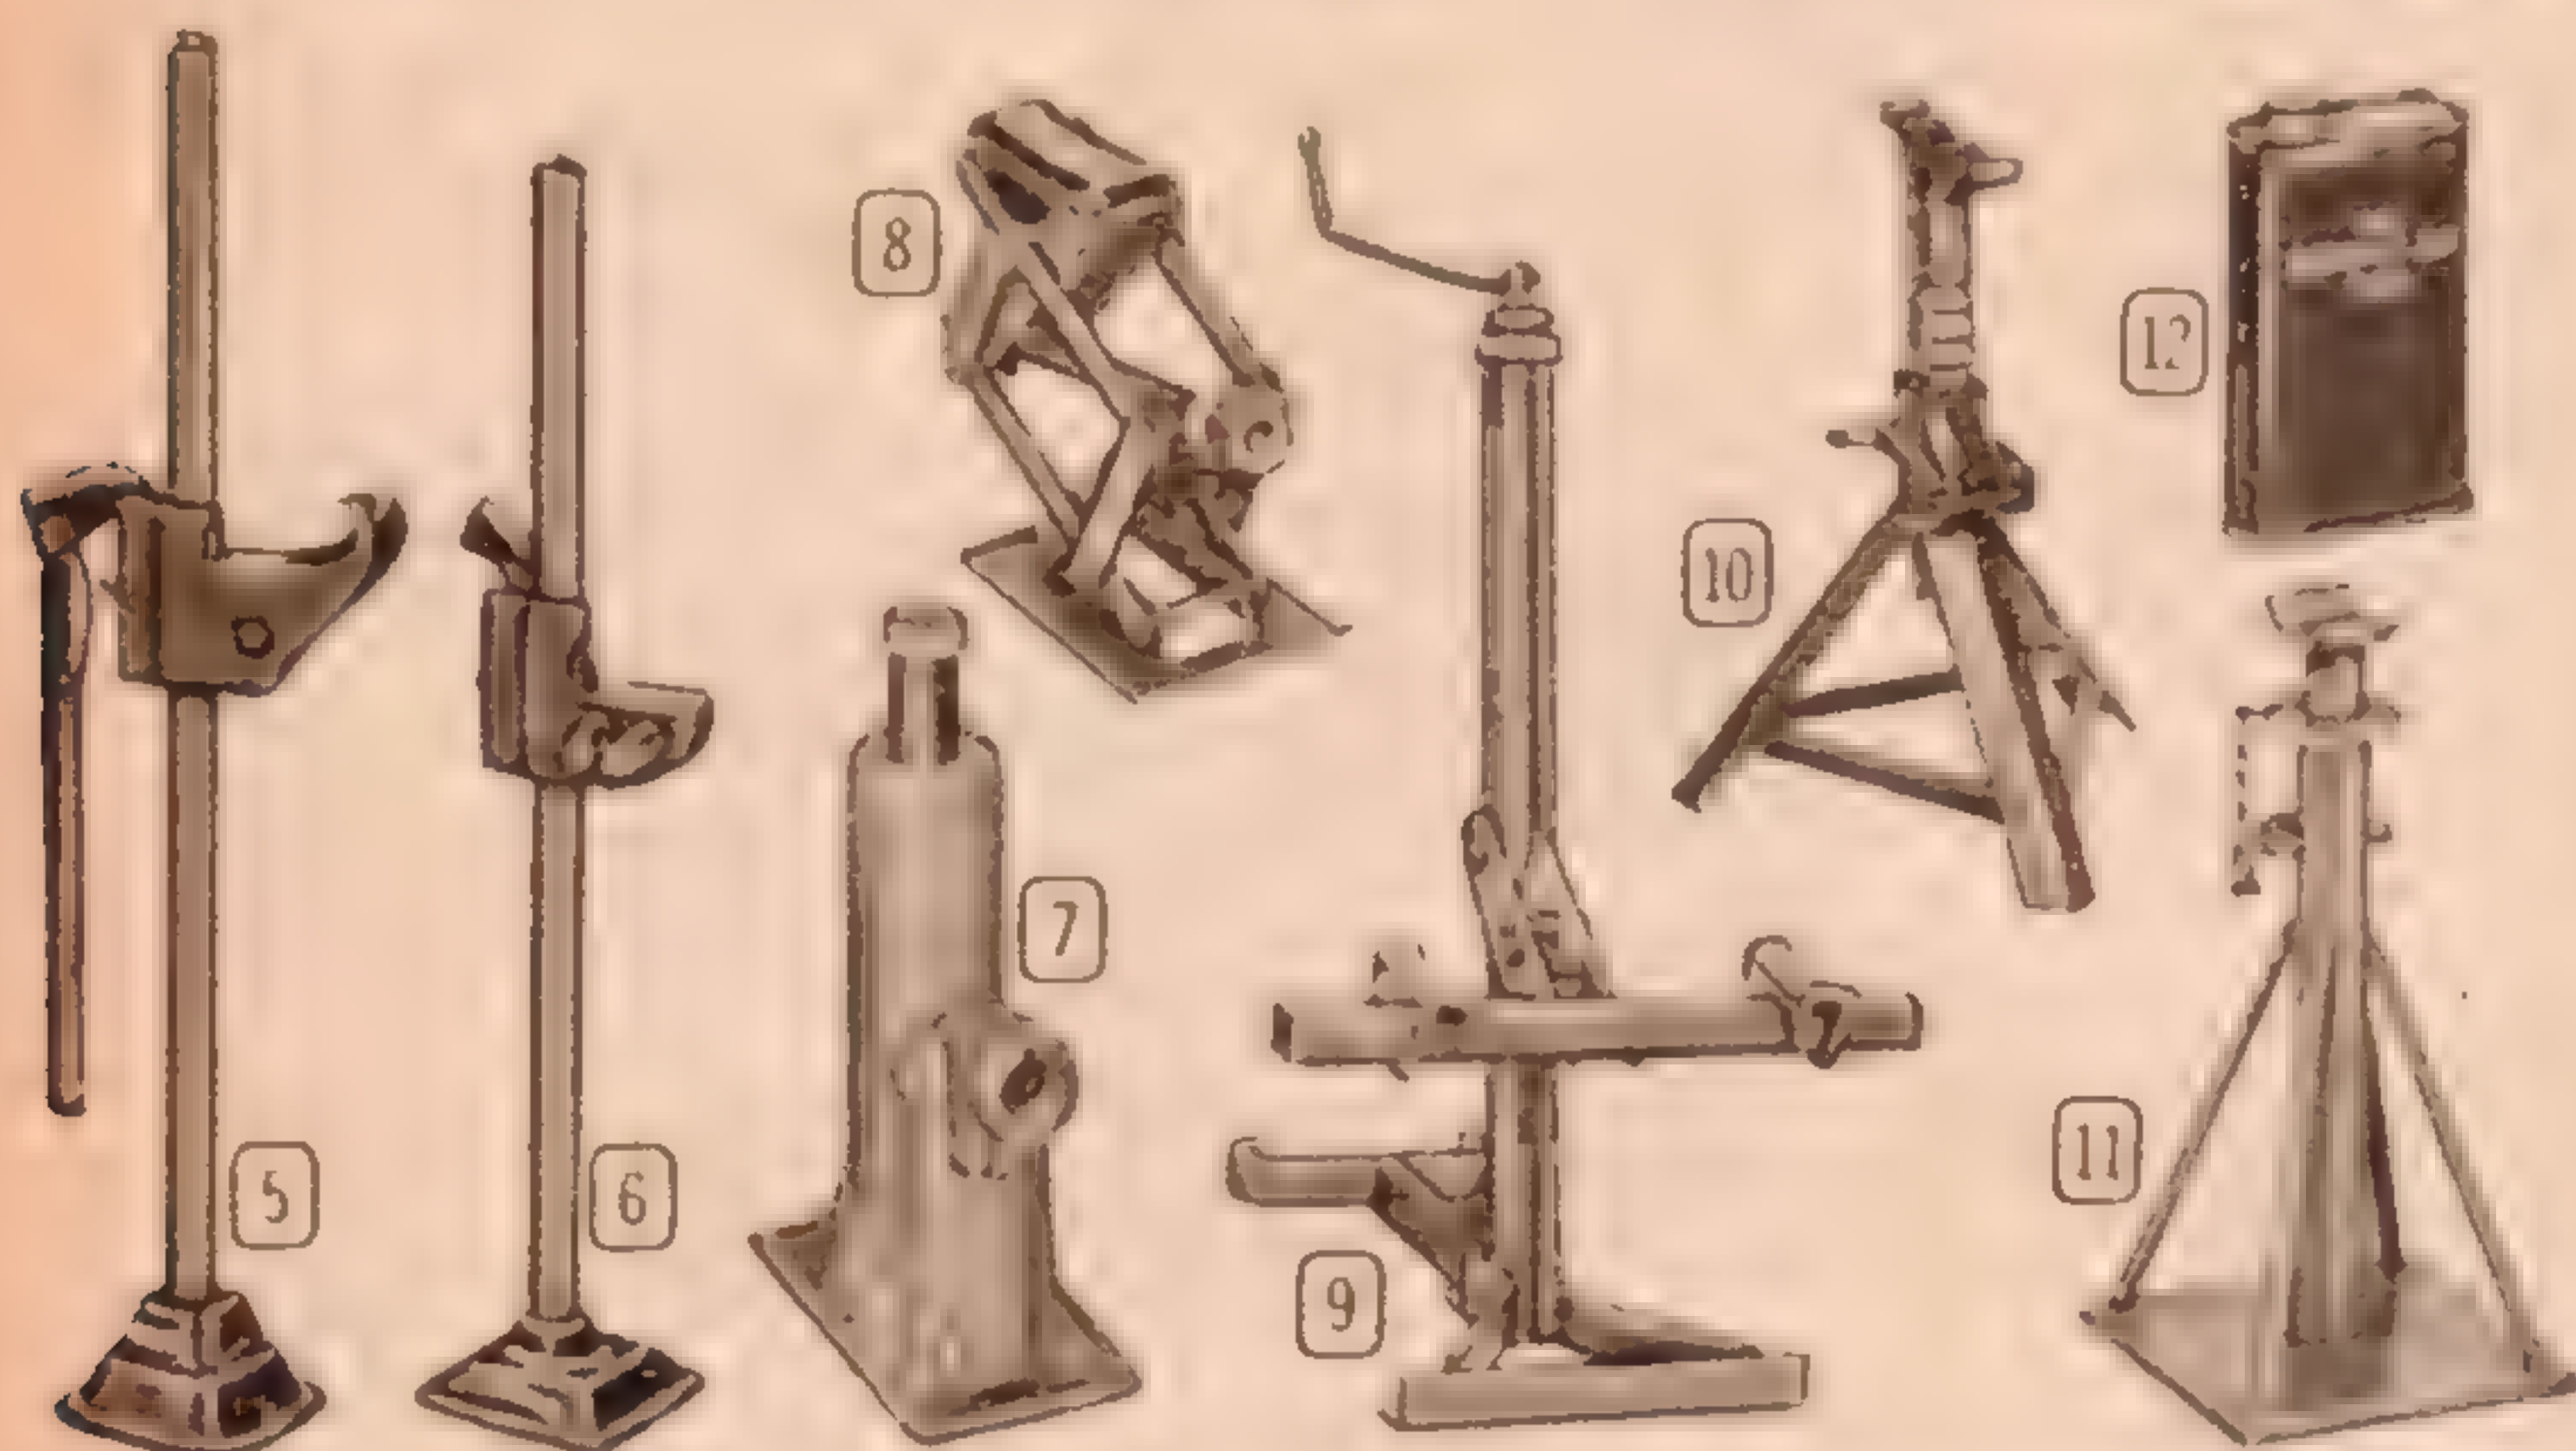

**2 3-Leg Mechanical Bumper Jack.** Easy screw-lift operation. Roll threaded screw precision machined. Ball thrust bearings give extra safety by locking load into position.

**1½-TON CAP.** Heavy-duty. Lift range 6½-30¾ in.  
61 A 5648 M—Mailable. Ship. wt. 17 lbs.. \$7.39

**1¼-TON CAP.** Lift range 6½ to 30½ in.  
61 A 5647 M—Mailable. Ship. wt. 14 lbs.. \$5.85

**3 Twin-Leg Bumper Jack.** 3000 lb. capacity . . . strong and reliable. Screw threads are precision cut. Ball bearing suspension reduces cranking effort. Safety lock keeps legs apart. Folds to fit into trunk. Lift range 5¼ to 31 inches. Mailable.  
61 A 5612 M—Ship. wt. 19 lbs.. \$9.95

**4 Our Finest Quality Twin-Leg Bumper Jack.** Saginaw Screw makes it easy to operate. Lifts up to 1½-tons with half normal effort. Screw is precision threaded and cadmium-plated. Revolving knob on handle. Square steel tubing protects jack from dirt, moisture. Self-locking spreader bar keeps load balanced. Lift range 5½ to 28¾ in. Mailable.  
61 A 5607 MB—Wt. 21 lbs.. \$12.95

# MAKE THE DIP STICK TEST

## Clogged Filters Can't Clean Oil

1000 Quarts of Oil pass through your car's engine in 2 hours of normal driving. If your oil filter is clogged it can't do its job properly... trap harmful dirt and grit particles that cause excessive engine wear. Next time you check your oil make the 'dip stick' test—put a drop or two on a clean blotter and note the many hard abrasives you find.

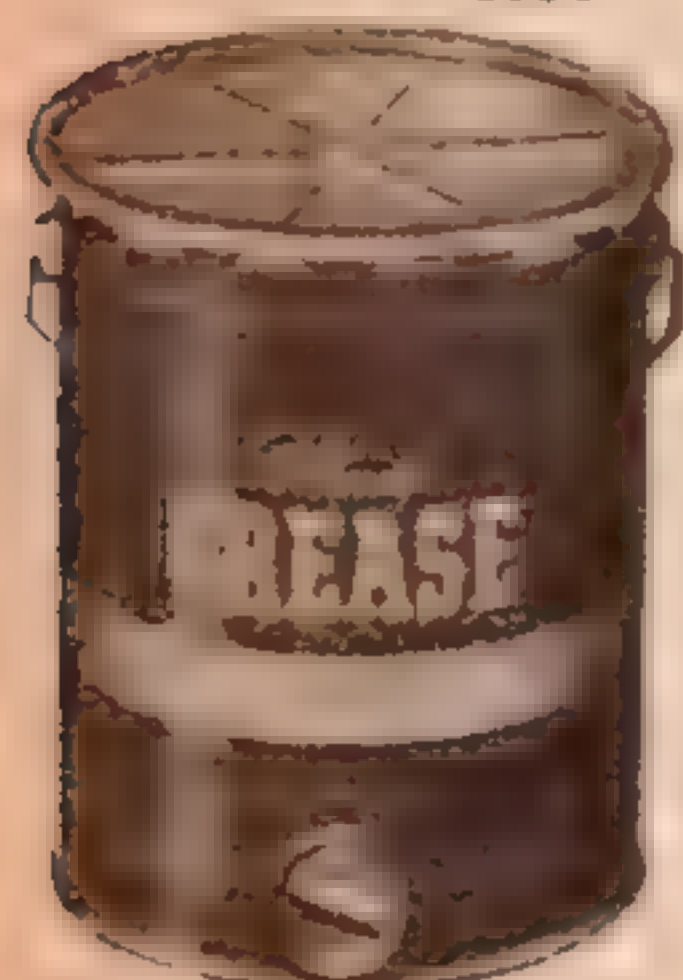

Keep Your Motor Oil Clean with Wards "Quick Change" Filter Cartridges. All cartridges are pleated paper type except those marked (†), which are cotton sock waste-filled and duplicate original equipment. With gaskets if needed.

HOW TO ORDER: If your car's filter make is shown in "Original Filter" column order by car make, year from Table "A". If your car has different filter than shown, order by filter make, model from Table "B". If your car is unlisted, use Table "B". Ship. wt.: Paper Pleated 1 lb.; Cotton Sock Type, 1 lb. 4 oz.

**Riverside ALL-SEASON OIL  
SERVICE STATION QUALITY  
AT LOW RIVERSIDE PRICES**

**BUILT-IN FLOW CONTROL...** Gives Year 'Round Lubrication. Riverside All-Season Motor Oil flows freely even under the most extreme temperatures. When wintry winds bring sub-zero weather it works like a 10-W oil, giving you quick starts for less battery drain. In soaring summer temperatures it acts like a full-bodied 30-W oil, giving maximum lubrication without thinning-out. And for just plain "every-day driving" it acts as a 20-W oil, ideal for those hard wearing starts and stops. Only latest detergent additives have been used to prevent sludge and wash from depositing on vital engine parts—giving you greater anti-rust protection. Order from table below at right. Can Opener spout not added with 1-quart cans (order extra below).

**20c qt.**  
In 55 Gal. Drums

## 100% Pure Pennsylvania Oil

**Premium Quality.** A fine quality 100% pure Pennsylvania Oil. Offered under the Riverside name as your assurance of the same top-quality lubrication as nationally-known brands... yet at prices far lower.

**Triple Filtered** to free oil from impurities that form carbon deposits. Protects against expensive engine damage. Low pour point, double de-waxed for free flow, full lubrication.

State SAE Grade Wanted: SAE 10W, 20-20W or 30. Order from table at right.

**16c qt.**  
In 55-Gal. Drums

## Vitalized Heavy Duty Oil

**Heavy Duty Type.** Recommended for all engines. For high speed, long distances, extreme climates. Same type as that used by auto makers when Heavy Duty Oil is specified. No finer detergent type.

**Meets American Petroleum Institute Service Classification MS and DG. (MS):** Service typical of spark ignition engines under severe conditions and requirements for deposit and corrosion control. **(DG):** Service typical of Diesel engine with no severe wear or deposit control needs.

State SAE Grade Wanted: SAE 10 W, 20-20W or 30. Order at right.

All oil shipped promptly from Stock. ALL PRICES INCLUDE FEDERAL TAX OF 6c PER GALLON.

## NOTICE: HOW TO ORDER WHEELS—RIMS—SPOKES

**Wheels and Rims.** Measure outside diameter of old wheel. *State* sprocket ½ or 1-in. pitch. See Diagram at right—upper view shows 1-in. pitch, lower ½-in. pitch. Rear wheel sprocket with 1-in. pitch has from 7 to 15 teeth; ½-in. pitch has 15 to 20 teeth—check old rear sprocket.

**Spokes.** Measure very carefully the actual length of your old spokes.

**20 Riverside Tubes.** Heavy-duty double thickness Butyl, better than natural rubber. Valve vulcanized to tube.

# Does Your Boat Meet The New Federal And State Safety Regulations?

HERE ARE SOME BASIC RULES BOAT OWNERS SHOULD KNOW—CONSULT LOCAL STATE LAWS TOO!

## 1958 Federal Boating Laws—Requirements Affecting You As A Boat Owner.

**Numerical Registration.** Generally speaking, if you own a boat powered by 10 or more horsepower, you are required to register it with your State Agency which issues approved number series. 3-inch block style numbers and letters must be displayed prominently on your boat. In addition, you are required to carry proper certification aboard whenever you use your boat.

**States May Require The Numbering and Registration of Any Watercraft.** (For example, sailboats or rowboats. Check local State law for proper action.)

**Where To Register.** The place of principal use determines where you should register your boat, and not where you live or where you store your boat. These general requirements are subject to State change. Check local laws.

**Mandatory Boat Equipment:** Boating laws require: (1) Stern and bow lighting for all motorboats; (2) The proper type and number of Coast Guard prescribed fire extinguishers for all motorboats, except outboards of open construction that are less than 26 ft. long; (3) At least one approved life preserver for each person on board a motorboat; (4) An efficient whistle or sound producing appliance for every motorboat that is 16 ft. or more in length; (5) Carburetor flame arrestors on all motorboats other than outboards and (6) ventilators on inboard motorboats capable of removing gases from the bilges in the engine and fuel tank compartments, unless the greater portion of such bilges are open and exposed to the natural atmosphere at all times.

These regulations have been set up in order to promote the greater safety of all who operate power or non-power boats and watercraft on all navigable waterways in the U.S. Check your State Agency for local modifications.

# LOOK TO SEA KING IN 1961

New Low Prices For "1961" OUTBOARD MOTOR Power And Performance. Plus Wards Easy Monthly Terms—Pages 1281-83.

2 Introducing A Powerful New 40 HP OUTBOARD MOTOR Scientifically Engineered To Sea King's Famous Standards of Quality.

3 Inspiring New Modern Design That Trims Motor Bulk and Weight with Clean Dynamic Lines and Functional Styling of the Future.

## 25 HP Sea King Twin

3 Power-Economy Leader of The Sea King Line. The outboard that budget minded families have chosen above other sizes. Costs less to buy... costs less to operate. Snappy power pulls skiers effortlessly, performs quietly for relaxing cruises, and when it comes to fuel consumption, motor for motor, it's a real "penny-pincher." OBC Certified 25 HP at 4500 RPM.

Speeds Up To 30 MPH. "Sonic Quiet" silencing—see below. 35.7 cu. in. displacement. Full gear shift—Forward, Neutral, Reverse. Adapts to remote control. "Torpedo" under-water design. Completely sealed-in powerhead. Automotive type fuel system. Lytanite corrosion protection. Durable luster finish. Tilt and trail lock. Rubber "slip clutch." Battery not included with electric starting model with auto-rewind auxiliary starter. State Freight, Truck or Express.

## 15 HP Sea King Twin

D The Motor That Goes Where You Go because it's lightweight and easily transportable—and because it's an outstanding combination of low price, big power and famous Sea King quality you'll find hard to beat.

And Look Where It Goes—sassy, big motor performance takes you in shallow, weeded bays; through fast, clear currents; or out to deep, open water. It delivers speeds up to 25 MPH yet slows to 1½ MPH for trolling. OBC Certified 15 HP at 4500 RPM. Full gearshift. "Sonic Quiet" silencing—see below. Waterproof ignition system. Rubber "slip clutch." Electric stop switch. Sealed-in powerhead. Lytanite corrosion protection. Durable luster finish. Manual starting, auto-rewind; nylon pull cord. State Freight, Truck or Express. Only \$29 Down.

60 A 18737 R-Ship. wt. 111 lbs. \$289.00

## 5 HP Sea King Twin

E Compact Dependable Power at Low Cost. Enduring in stamina and economical in performance, it performs at speeds up to 12 MPH and slows to 1½ MPH for trolling. No wonder it's the fishing favorite of the Sea King family. It gets you where you want to go in most types of fishing waters—and its low price, lightweight, and Wards guarantee and service are all part of the Sea King quality fishermen and boaters alike have learned to depend on.

Low Price Plus Big Motor Features Mean Top Value. Full gearshift action. "Sonic Quiet" silencing—see below. OBC Certified 5 HP at 4000 RPM. Waterproof ignition system. Lytanite corrosion protection. Manual starting, auto-rewind; nylon pull cord. State Freight, Truck or Express. Only \$19.00 Down.

60 A 18736 R-Ship. wt. 77 lbs. \$188.00

## 3 HP Sea King Single

F Single Cylinder Utility Motor. Ideal size for duck boats, small fishing boats, rowboats, bracketed or square stern canoes. Excellent auxiliary power for dinghy and small sailboats. It's rugged and Sea King dependable. OBC Certified 3 HP at 4000 RPM.

Carry It Anywhere—Weights only 29 lbs. 360° pivot steering gives full range of maneuvering. Motor vibration and noise are minimized by rubber cushion mounts and quiet beveled gears. Waterproof ignition system. Lytanite corrosion protection. Manual starting, automatic rewind; nylon pull cord. State Freight, Truck or Exp. \$11.50 Dn.

60 A 18735 R-Ship. wt. 43 lbs. \$112.00

## Color Matched Chest, Jug

### 3 Big Deluxe Features

**1** New "Positemp" Foam Insulation. Chest keeps food cold for 4 days—jug keeps liquids piping hot for at least 8 hours!

**2** New "Royalite" Plastic base—seamless design. It's rustproof and so easy to keep clean! Combines lighter weight plastics with strength of steel sides for longer service.

**3** Molded Polyethylene Liner is gleaming White! Stain resistant... won't absorb food odors.

Completely New! 30-50% lighter than regular Steel jugs and chests. New Polyethylene liner adds extra insulating value. New "Positemp" insulation more efficient than fiber glass—seals up all air spaces... bonds liner and Steel outside into one unit for extra strength. Red and White color.

## Last Minute Special

### 2-CHANNEL ALUMINUM COMBINATION WINDOWS

- Glass Inserts are Vinyl Weatherstripped
- Insect-Proof All-Aluminum Screen Insert
- Extra-wide Rails for Maximum Strength

Custom-Made to Your Measurement at a low, low special price. Convert instantly from weathertight storm window to screen. Positive lock stops for controlled ventilation. Inserts tilt inside house for easy washing in any weather. Finest heat-hardened extruded aluminum construction. With instructions.

**HOW TO MEASURE:** Measure opening into which storm sash normally fit. Width (A) is distance between edges of window casing (max. width 42 in.).

Height (B) is distance between top casing and window sill. Meeting rail (C) is distance between center of house window horizontal meeting rail and edge of top casing. For use with wood double-hung windows only. For inset installation only, not for overlapping.

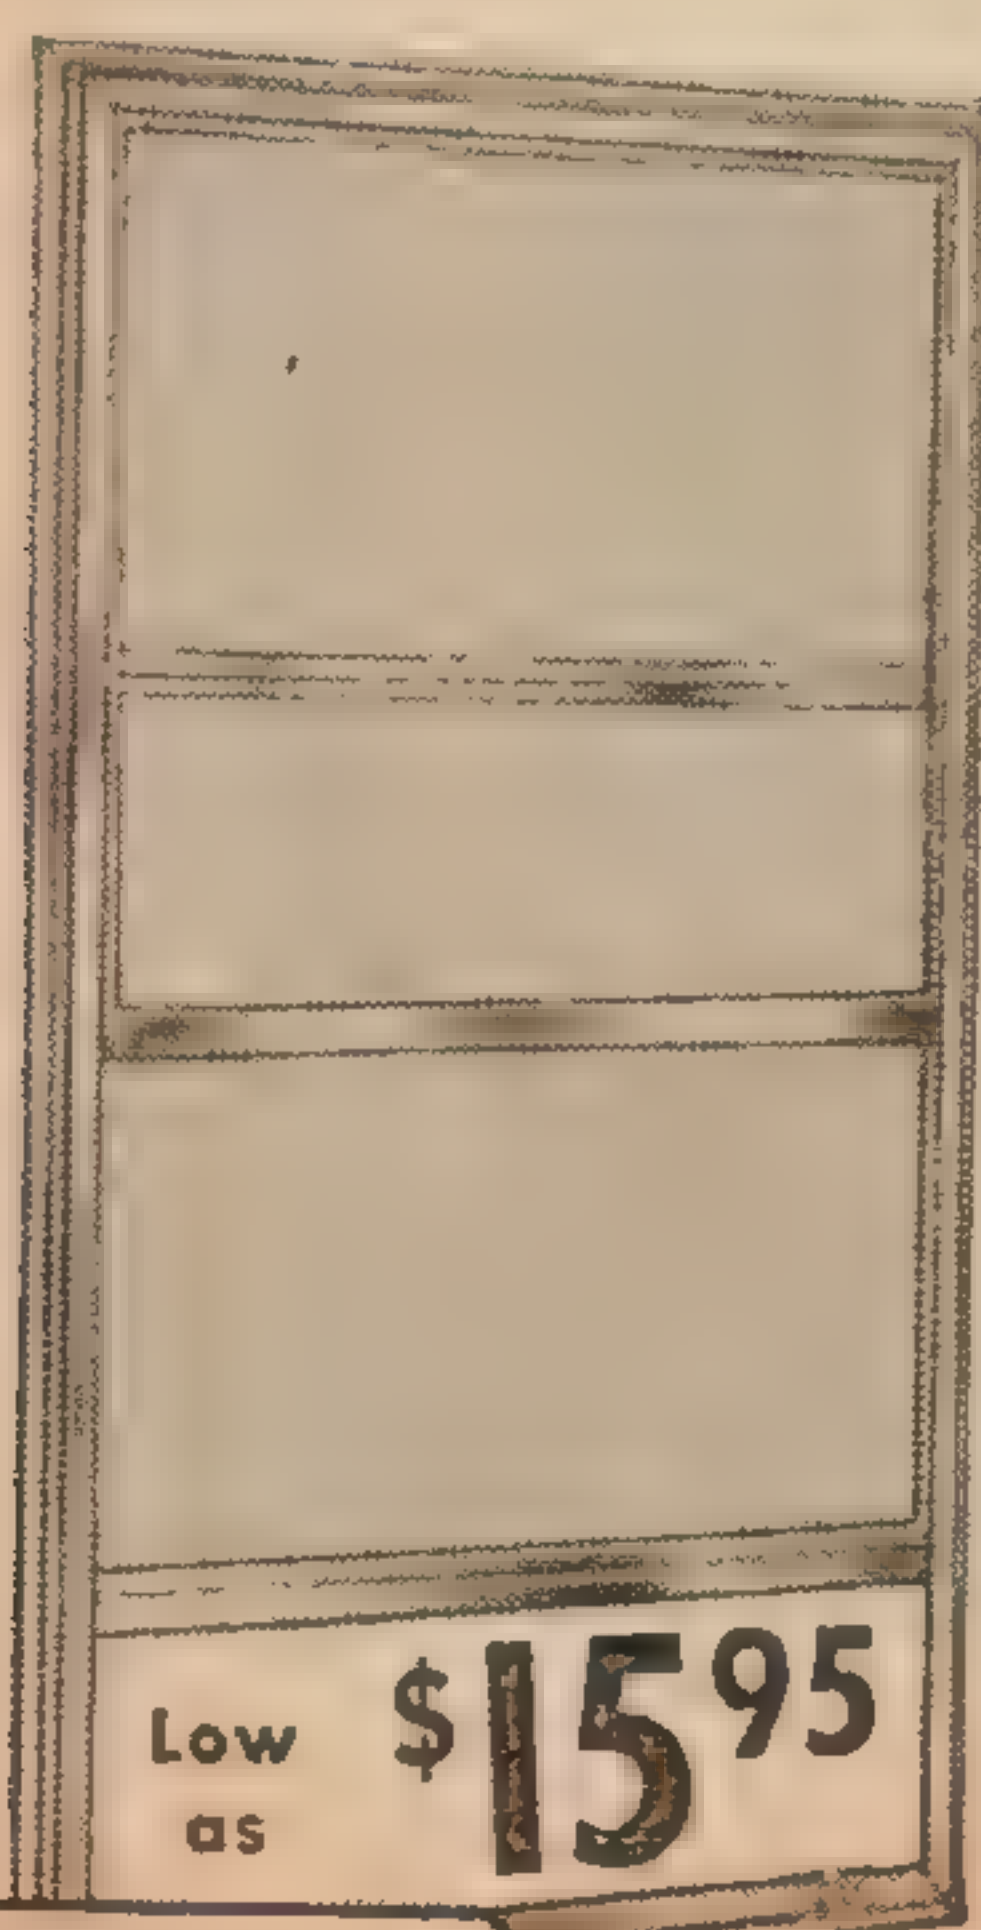

Shipped from Factories near New York City, Baltimore, Albany and Boston. Allow 14 days for preparation plus transit time. Aver. ship. wt. 20 lbs.

74 A 4517F—State measurements (A), (B) and (C).

If A plus B is up to 101 inches.....Each \$15.95

If A plus B is 102-115 inches.....Each 20.95

If A plus B is 116-130 inches.....Each 26.45

**FOR FORD,  
CHEV., PLYM.,  
RAMBLER**

**Clamps Not  
Included—Order  
from Page 1161**

Newest Muffler Discovery . . . A Major Advance in Anti-Rust Protection. Laboratory tested and field-proven. So good, it's guaranteed in writing for 5 years. A Riverside Exclusive.

**Ceramic-Bonded Steel.** Heavy gauge steel shell, ends, outlet pipes, internal pipes and supports are completely coated **INSIDE and OUT** with a specially perfected ceramic-bond . . . custom-applied to each muffler individually, and "heat-fused" at 1500 degrees to assure this long lasting service.

Outer Steel Shell is aluminum-zinc coated for added protection; full size insulating asbestos inner-liner insulates against high heat and exhaust noises. Included where required.

**Guaranteed for 5 years from date of original purchase against defects in material and workmanship causing wear out, rust out, or blow out. Muffler which fails due to such cause during 5 year period will be replaced free. Only a nominal charge for incidental parts needed for such reinstallation.**

Satisfaction Guaranteed or Your Money Back

# It's Easy to PHONE YOUR ORDER

STORES AND PHONE NUMBERS ARE LISTED BELOW

Pictured at the left is just one of the 1139 Montgomery Ward Catalog Departments where your telephone order (from any Ward catalog) will receive prompt service . . . from friendly, courteous, well-trained salespeople.

It's convenient, and time-saving, too. Just phone the Ward store nearest your home (see below or opposite page for number), and avoid traffic jams, parking difficulties and even the baby-sitting problem sometimes encountered when you dress up and go out to shop.

Easy, too . . . all you need do is to tell our telephone-shopper your selections (from this or any current Ward catalog); she will write your order for you and tell you the day you may expect your goods to arrive.

Whether you phone or come in, you can pick up your goods at the store and realize a saving. Or, you can have the order shipped direct to your home. And . . . in many communities, parcel delivery of your order right to your door is available—ask about this service.

Remember, too—everything Wards sell—even Service and Installation—can be purchased on your Charge or Monthly Payment Account. There's a plan to fit every budget (see pages 791, 960, 1281-1283 of this catalog for complete information on all plans).

## WARDS GUARANTEE

For almost 90 years, Wards time-honored policy of "Satisfaction Guaranteed or Your Money Back" has firmly backed every purchase made from Wards.

So . . . no matter where you buy from Wards—or how you buy from Wards, you can buy with confidence.

And . . . you only are the judge of "Satisfaction Guaranteed or Your Money Back"—just tell us if you are not entirely satisfied with your purchase.

Ward catalogs do "come to life" in all 1139 Ward Retail and Catalog stores. In the beautiful Eatontown, New Jersey (Monmouth Shopping Center) store, for example . . . pictured below.

When you visit the Ward store in your locality, you will also see displays of merchandise, swatch books of fabrics; samples of floor tile, broadlooms, wallpaper, paint colors, drapery hardware and others—and many special catalogs (the Camera Book, Outdoor Sports Book, Garden Book, Farm Book, others).

Experienced salespeople will help with your selections, answer questions, help measure sizes. Also, you can see and feel much of the merchandise before you make your selections.

And . . . don't forget that Wards time-honored guarantee protects your every purchase.

### WARDS LAY-AWAY PLAN

With only a small deposit, Wards will hold goods for you until you need it. During this time, you can make additional payments. Ask about this service when you visit the Ward store nearest your home.

### DEMONSTRATIONS

Now . . . Home Demonstrations of Major Appliances are available in most areas where Ward stores are located. This service allows you to see the Appliance in operation in your home, before you buy.

# Shop by Mail... for Happy Family-Shopping

## Helpful Hints — When Ordering from Wards Catalog

Yes . . . it's fun to shop at home, with the family—during the day or in the evening. It's fun to turn the pages of Wards big Catalog, and choose from the more than 100,000 items. Truly—a huge department store at your very finger-tips! So . . .

**Use an Order Blank** from any Ward Catalog. Write or print order, whichever is easier.

**Name and Address:** Use the same name on each order (head of household is best). Give your full address—zone number for towns; route number for rural areas.

**Have You Moved?** Please list *old* address.

**How Shall We Ship?** Parcel Post, Freight, Express or Metro Delivery. See pages 1267 and 1274, 1275 for shipping information.

**Catalog Number of Item:** Show complete number which appears on the last line of the catalog description of the goods.

**How Many:** Tell us the quantity you want.

**Name of Item:** Is it a dress—shoes—bed? List the name of the item in this space.

**Color:** If item comes in more than one color, these colors are listed in the catalog description of the merchandise.

Show choice here; give pattern, finish, etc.

**Size:** Give size, if needed—measuring charts appear on pages 139, 366, 448, 843, 1271.

**Price:** List the price of each item, as given on the last line of the catalog description. Often, prices are in "groups" of 3 for \$1.00, etc. In these cases, show the "group" price.

**Total Price:** Multiply "How Many" column by "Price" column. (This is "Total Price").

**Shipping Weight:** (For Cash Orders Only). List weight, in pounds and ounces. Add pounds and ounces, separately. Change ounces to pounds (16 oz. is 1 lb.) Enter total pounds in space marked, "Total Weight in lbs." Odd ounces are considered as next pound—8 lbs. 12 oz. would be 9 lbs.

**Total for Goods:** Add the dollar and cents columns in the "Total Price" column.

**Amount for Tax** (if any): See bottom of order blank under "Total Amount", for information on State and City Taxes.

**Postage:** If you are paying cash, refer to Parcel Post Chart on page 1275 for the amount to include for postage on "Total Weight in Pounds". Include cost for freight or Express *only* if there is no agent in your area. See page 1274 of this catalog for details on Freight and Express.

**Amount I Owe Wards from Previous Order:** Use this space *only* if you are including in your payment an amount due Wards from any previous order.

**Total Amount:** Add amount for goods, for tax (if any), for Postage (unless your order is on your Charge or Time Payment Account), plus "Amount I Owe Wards from Previous Order" (if any).

**Three Ways to Buy:** Check your preference—Cash, Charge, Time Payment. See pages 791, 960, 1281–1283 of this catalog for full details on Wards Credit Plans.

### HOW TO GET YOUR WARD CATALOGS REGULARLY

All you need do is to place two catalog orders, totaling \$10 or more, during the preceding 6 months. No matter whether you order by phone, by mail or in person, we'll credit you with these orders.

You will then automatically receive Wards big Spring and Fall general Catalogs, the special value-packed Sale Catalogs and the beautiful Christmas Gift Book.

When you order, please use the same name each time—preferably the head of the household. In this way, we can be sure to credit your account for every order you place from any current Ward catalog.

It's easy to get one of Wards Special Catalogs, too (Camera Book, Outdoor Sports Book, Garden Book, Farm Book, others). All you need do is to fill in the coupon you'll find on the pages in this catalog describing this kind of merchandise.

# Wards Guarantee You a Proper Shoe Fit!

SIMPLY ORDER ONE OF 3 EASY WAYS TO ASSURE YOU OF COMPLETE SATISFACTION

**A** If you know your correct shoe width and size, simply state them in your order. When you are ordering by size, please be sure to check the catalog to make certain that the style which you have selected is sold in the particular width and size which you have specified in your order.

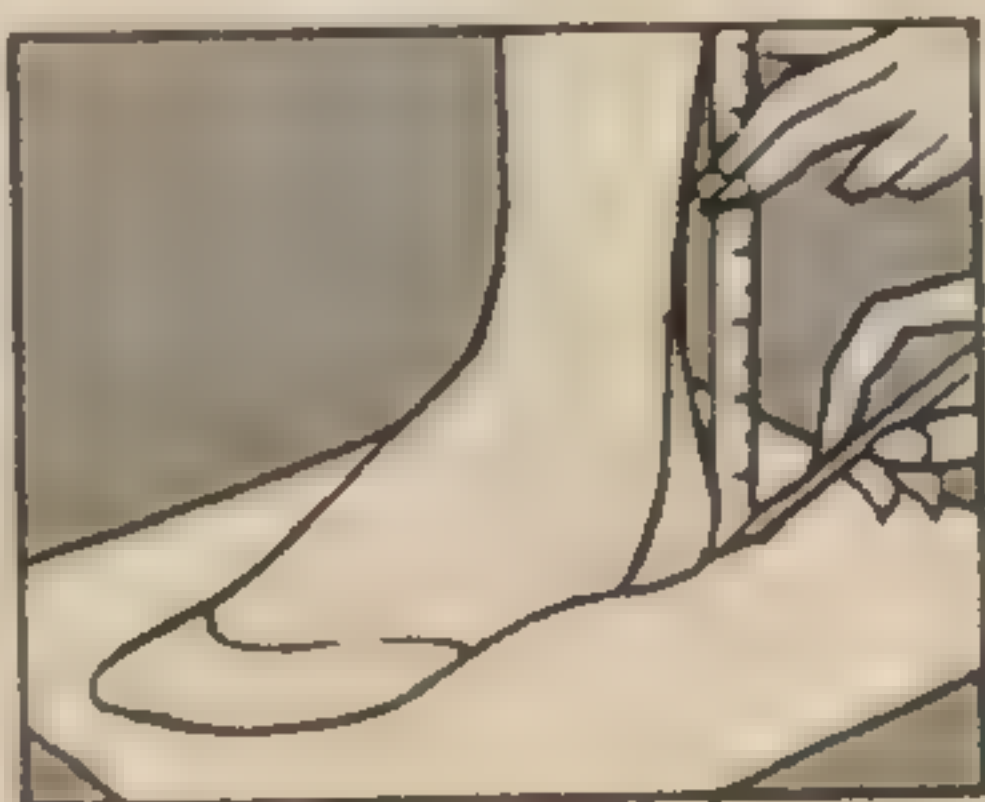

**B** If you have shoes that fit you comfortably, but don't know what width and size they are, follow this procedure: Write down all the numbers and letters exactly as they appear in these shoes. Be sure to include all numbers, letters and marks—such as dashes.

**C** If you don't know your width and size and don't have a pair of comfortable shoes you can copy the numbers from, get a piece of paper, a pencil and ruler. Sit in a straight-backed chair. Place your foot firmly on the paper and have someone help you follow the 4 simple steps below.

## 4 STEPS GUARANTEED TO GIVE YOU YOUR CORRECT WIDTH AND SIZE

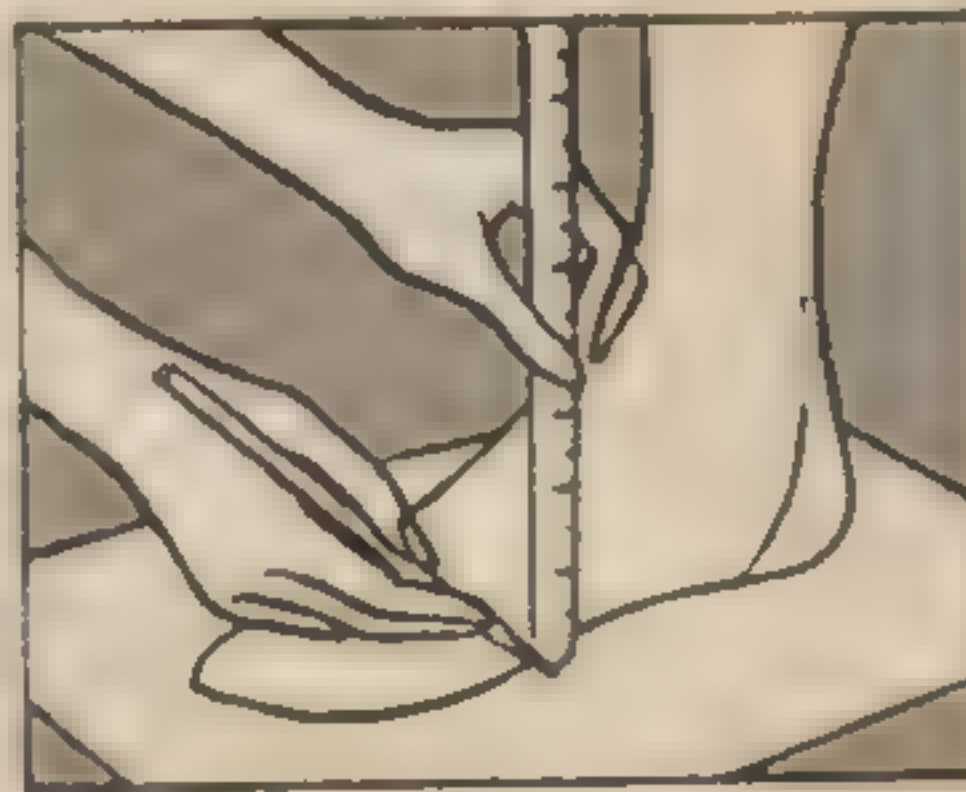

**1** Have another person hold the ruler, or any other guide, in a vertical position, against the tip of your longest toe. Then, draw a line along the outside edge of the ruler. Be careful not to move your foot.

**2** Then have the person move the ruler to the back of your heel and hold in the same vertical position. Draw another line with the pencil along the outside edge of the ruler. Keep your foot in same position.

**3** Next, have the ruler placed at the widest point along the inside of your foot. Draw another line along the edge. Be sure that the ruler is held straight up and down. Do not move your foot.

**4** And last, place the ruler at the very widest point along the outside of your foot. Draw a line outside the ruler, this completes the diagram of your foot. Enclose this paper with your order.

## Men's Tailored Clothing . . . Measuring Instructions

**How To Measure:** Give measurements asked at bottom of page. Make no allowances or garment will be too big. For best results have someone else measure you. **For Sport Coats:** State measurements 1 and 2 as asked at bottom of this page. **For Sport Outfits:** State all 5 measurements as asked at the bottom of page. **For Suits:** State all 5 measurements as asked at bottom of page. Check your measurements with Suit Size Scales below to be sure that your size is listed.

**How To Order:** First, fill out the Special Order Blank at the bottom of page. Then cut it out and attach it to one of our regular order blanks in back of the Catalog. Fill out the regular order blank as indicated on Pgs. 1277-1280. **30-Day Free Trial** on any Men's Suit we sell—if you're not completely satisfied, just return the suit to us and we'll promptly refund your money. We guarantee to fit any man of average body proportions or your money back.

# It's "Oven-Testing" Day

## IN WARDS MERCHANDISE TESTING LABORATORIES

## Satisfaction Guaranteed or Your Money Back...

Wards famous policy for almost 90 years, protects your every purchase. So no matter where you buy from Wards, or what you order (merchandise or service), you can always buy with confidence.

Home economists, engineers, chemists and other technicians in Wards Merchandise Testing Laboratories are constantly testing:—analyzing materials; measuring the performance, durability and wear of many of the 100,000 items in Ward catalogs.

The story on this page is primarily concerned with the testing of just one product—the ovens in the stoves that Wards sell . . .

It's truly "oven-testing day" when this test is made. Many cakes are baked, to test for uniformity of height and color. The same standard cake-mix is baked in each of the four corners of every oven, to prove that each oven bakes the same in all areas. (All four cakes from each oven must be the same in color, and the same in height.)

During the cake-baking test, oven temperatures are checked, too. Again—to test for uniformity . . . for *temperature*-uniformity.

The oven-uniformity tests described above are performed in accordance with officially approved methods, as outlined in American Standard Approval Requirements for Domestic Gas Ranges Z2.1.1.1-1959.

For even greater protection for you, Ward technicians test stoves for safety:—no shock hazards; no "burn" hazards (no hot handles).

Cooking-efficiency of the surface units is checked, too, as well as convenience of stove controls. Wards even turn-on at one time *all* the burners, including the oven, and heat the stove for a considerable period, to prove that trim and finish will stand up under intense heat.

### Wards Guarantee

We guarantee the quality of every article as described, and guarantee that it will give you the service you have a right to expect.

If, for any reason, you are not completely satisfied with any article purchased from us, you may return it at our expense. We will exchange it for what you want, or refund what you paid, including any transportation charges paid by you.

# The Facts Behind Wards Fabrics

## FACTS ON WASH-AND-WEAR

Wash-and-Wear clothing, and fabrics shed wrinkles and wear-creases in laundering, and with the proper care, dry smooth.

"Little or No Ironing," and "Minimum Care" garments and fabrics shed most wrinkles, but may require some light ironing.

Wash and Wear, "Little or No Ironing," and "Minimum Care" garments, and fabrics need no starch, stay fresh-looking longer, and have good shape-retention qualities.

### Hints on Caring for Wash-and-Wear Items:

1. Follow instructions included with item.
2. Wash often. Use soap or detergent solution on stains before washing. Use remover on grease spots, before washing.
3. Wash "whites" separately.
4. Use lukewarm wash and mild soap or detergent, unless garment is badly soiled. For heavy, greasy soil, use warm water, laundry detergent. Don't use chlorine bleach, unless the label states to do so.
5. Avoid setting-in "wash" wrinkles. Don't overload washing machine. Wash all hand-washables one at a time.
6. Avoid setting-in "spin" wrinkles. Set automatic washer at "wash and wear," with cool or cold final rinse. For single-speed automatic washer, rinse in cool or cold water, with final spin one minute or less. For wringer-type washers, squeeze by hand.
7. Follow drying suggestions in instructions. Some garments may be dried in tumble dryer, others by "drip" drying. Use "wash and wear" setting or medium heat. Hang garments while still slightly damp.
8. If stubborn wrinkles are set into wash and wearables by long spinning or tumbling, wash again and repeat drying process.
9. If touch-up ironing or pressing is required, use "low" setting for synthetics and blends; "medium" for cotton. If fabric shows tendency to shine, use press cloth.

## FACTS ON WASHABILITY

The following terms define colorfastness of washable garments and fabrics sold in Wards catalog, and will help you on "wash-day."

**Washfast:** Best washability. May be machine-washed with other clothing, using soap or detergent and hot water (160°F).

**Washable:** May be machine-washed with other colored washables. Use mild soap or detergent, and warm water (not over 120°F).

**Wash Separately:** Machine-wash alone, as dyes may stain. Remove contrasting trim. Use mild soap or detergent, and warm water (not over 120° Fahrenheit).

**Wash With Care:** Bulky items such as blankets, scatter rugs, require same care as hand-wash fabrics to prevent fraying, matting, color loss. Wash in lukewarm (100°F) suds. Agitate no more than 2 or 3 minutes. Rinse in lukewarm water. Dry promptly.

**Hand Washable:** Use lukewarm water, mild soap, detergent. Remove contrasting trim. Do not twist or rub. Rinse in lukewarm water and dry at once, preferably indoors.

## FACTS ON SHRINKAGE

Terms below describe the shrinkage to expect when washing fabrics sold by Wards.

Garments noted as Sanforized, Preshrunk will not shrink out of fit, when washed.

**Sanforized:** Shrinks less than 1% in length or width of fabric.

**Man-Made Fibers:** Show practically no shrinkage in washing.

**Other Fabrics:** Where no statement about shrinkage is given:—(1) Fabrics such as percale, sheeting, acetate or rayon may shrink up to as much as 5%.

(2) Knitted, napped, braided, sheer and yarn-dyed fabrics may shrink up to 10%. This group may include rugs, blankets, knitwear, flannels, ticking, etc.

## FACTS ON SUN-RESISTANCE

**Sunfast:** Colors have high resistance to sunlight and normal use will not cause noticeable color changes.

**Sun Resistant:** Colors have good resistance to sunlight, but may fade slightly in normal use. To prolong life, protect from the direct sunlight.

**Fast Color:** Items so labeled are both washfast and sunfast.

## FACTS ON WATERPROOF

**Waterproof:** Fabrics are impervious to water and air. In wholly waterproof garments, seams are "sealed", to insure this protection against water leakage.

**Water Resistant or Water Repellent:** Fabrics resist water penetration and allow some passage of air. "Durable" water resistant treatments withstand repeated washing or repeated dry cleaning.

## FACTS ON WOOL PRODUCTS

**New Wool or Virgin Wool:** Wool fibers which have never been previously processed in any way whatsoever.

**Wool:** Wool fibers which may have been previously spun or knit, but which have never been woven or felted.

**Reprocessed Wool:** Wool fibers reworked from woven or felted products but never used by the consumer. An example—trimmings from garment production.

**Reused Wool:** Wool fibers reclaimed from products used by consumers.

Reprocessed and reused wools are reduced to fibrous form and cleaned before use.

*We hope you will also read the facing page . . . for interesting Facts on the many tests made in Wards Merchandise Testing Laboratories.*

# FREIGHT SHIPMENTS by Rail or Truck

Rail freight is usually the most economical way to ship bulky, heavy merchandise. Truck freight may be slightly higher, but often provides faster delivery. Your local agent can tell you of service available to your town, and estimate the transit time from the Mail Order House, warehouse or the factory.

Freight shipments under 100 pounds will be charged the full hundred-pound rate, and the minimum for any shipment will be \$4.00, regardless of weight or distance. When shipment is by truck, minimum charges will vary some.

In most instances, goods are delivered to the freight agent, who notifies you of its arrival. He will collect shipping charges at time of delivery. Unless your town does not have an agent, your cash order need not include money for freight.

Many railroads and trucking companies offer delivery service from station-to-home (within city or village limits) . . . without charge, unless freight rates are unusually low in your area. When you have no street address, please include directions to your home—"south on highway 10 for five miles, turn right; first white house on left side of road."

You may include factory and warehouse merchandise on the same order with other goods, but this merchandise will be shipped separately, and will have separate shipping charges.

Let Wards figure the freight charges on your order. Simply use one of Wards Credit Plans (see pages 791, 960, 1283), or a Ward Revolving Charge Account (see pages 1281, 1282). We'll add the shipping charges to your account.

## Railway Express

Use this service for bulky, unmailable merchandise. Where Railway Express service is available, goods are delivered to your door, at no extra charge.

Do not send money for express unless there is no agent in your town. Avoid C.O.D. by Railway Express; these charges are higher than by parcel post or freight.

Use Table to Estimate Charges: if order weighs 150 lbs., and it is 190 miles to shipping point, express will be  $1\frac{1}{2}$  times the 100-lb. rate for that distance (\$6.72), or \$10.08.

## How To Estimate Freight Charges On Your Order

Use table at left—charges are per 100 pounds, based on the distance from the Mail Order House, warehouse or the factory.

Here is an example:

Suppose you order Farm Implements weighing 250 lbs., and the distance is 200 miles . . . freight charges will be \$1.76 (the 200 mile rate) multiplied by  $2\frac{1}{2}$  times the 100-lb. weight, or \$4.40.

If the distance is 250 miles, use half the difference between the 200 mile rate (\$1.76) and the 300 mile rate (\$2.11), or \$1.94.

When your order contains several types of merchandise with different rates, figure the charge for each type separately, and then add them together.

See facing page for Parcel Post Rates.

If you live in a metropolitan area, see page 1267, for fast truck delivery of your order to your door.

Freight and Express Rates shown on this page were in effect at time of printing, and are approximate.

# PARCEL POST Rates and Information

Parcel Post is best for packages weighing up to 40 or 50 lbs. Packages weighing as much as 70 lbs., and measuring not more than 100 inches in length plus girth (distance around at widest point) may also be mailed to all zones, with some exceptions.

Weight, size, or some other postal restrictions prevent some packages from being mailed to first class post offices. Your local postmaster or mail carrier will tell you if you live in such an area. Packages which cannot be sent by parcel post for these reasons will usually be shipped by freight or by express.

When you order, and use our Revolving Charge Account, or one of our Monthly Payment Plans, Wards will figure your postage and add it to your account. If you prefer to pay cash, please include money for postage. (We will return any money not needed.)

When Wards ship your order in more than

one package, we'll pay any extra postage.

Catalog descriptions of factory-shipped goods give location of factory. To figure the postage on these items, estimate the miles from factory to your town. Use the Parcel Post Rate Chart below to find the postal zone for the miles involved. To find the postage cost, move down the chart in this "zone" column to the weight of the goods you ordered.

Catalog goods described as "Not Mailable" cannot be sent Parcel Post because of size, weight or content, but this merchandise can be sent by Rail or Truck Freight, or Express.

## IF C.O.D. IS NECESSARY

Full cash price is required for all orders except when you buy on one of Wards convenient Credit Plans (see pages 791, 960, 1281-1283). When enclosing payment for your order, it is best to use Postal Money

Order, Express or Bank Money Order, Bank Draft, Cashier's Check, or your own check. When it is necessary to send cash through the mail, it is best to register your letter.

You may prefer to have your order shipped C. O. D. The post office collects a handling charge, plus a money order fee, in addition to the regular parcel post charge.

Here are the extra fees for C. O. D. orders:

Amount of Order Plus Postage	Postal Money Order Rates	Postal C.O.D. Fees
Up to \$5.00	....15c	....30c
\$5.01 to 10.00	....20c	....40c
10.01 to 25.00	....30c	....60c
25.01 to 50.00	....30c	....70c
50.01 to 100.00	....30c	....80c

See below, left, for items which cannot be sent C.O.D.

## Here's How to Figure Postage on Your Order:

List shipping weight of items you are ordering in columns (pounds and ounces); on order blank.

Total pounds and ounces; change ounces into pounds—16 ounces is 1 pound (the post office counts a part of a pound as a full pound—so, if weight adds to 8 lbs. 4 oz., show weight as 9 full pounds).

Now, find your parcel post zone on map at far right.

Refer to Parcel Post Rate Chart, at right, following down to total weight of order—9 lbs. Now, move across to your postal zone to find the amount for parcel post on your order.

PLEASE...No C. O. D. Orders for the Following:

1. Bees.
2. Game Birds.
3. Turkey Poults.
4. Ducklings.
5. Goslings.
6. Started Chicks.
7. Engraved Items.
8. Made-to-order Items.
9. Merchandise shipped from a factory.
10. Goods shipped to an address other than that of the person sending the order.

# Catalog Facts

## To Help Your Shopping

### The Facts About Ward Prices

From the day of Wards first catalog—almost 90 years ago, our policy has been to quote lower prices, wherever possible, than asked elsewhere for merchandise of comparable quality.

When you order, from any Ward catalog, an item whose price Wards have reduced since that catalog was printed, you receive the benefit of Wards lowest price. Such a reduction may be caused by a cut price in one of our Sale Books, or by the lowering or elimination of a governmental tax . . . Federal, State or Local. In the same way, if a new tax is added, or an old tax increased (after our catalog is printed), Wards prices on the items affected will be increased accordingly. Because of all these possibilities, it is necessary that all prices in this Book be subject to change without notice.

Prices in this catalog apply only to orders placed through a Ward Mail Order House, Catalog Store, or Retail Store Catalog Department.

### The Facts About Suffix Letters

Suffix letters are shown in the catalog, *after* the article number of the merchandise, to indicate special shipping (66 C 7509 R).

- F—Sent from factory or warehouse by freight or express.
- K—*Mailed* from factory by parcel post.
- M—Can be shipped from mail order house in separate package by parcel post.
- MB—Cannot be shipped by parcel post to first class post offices, beyond the third zone.
- MO—Cannot be shipped parcel post to first class post offices.
- R—Shipped by freight or express from mail order house.
- T—Shipped from a Ward mail order house, other than the one nearest your town.
- W—Shipped from a warehouse. Allow slightly more time for the shipment to reach you.

Unless otherwise stated in the catalog description, all other merchandise ordered from the catalog can be shipped by parcel post.

### The Facts About Color Pages

The color pages in this catalog show the merchandise as close as possible to its actual color. Reproduction, under modern, high-speed printing, sometimes causes slight variance. If these color-variances should ever make you displeased with what you ordered, by all means return it. "Satisfaction Guaranteed or Your Money Back."

### Here's Helpful Information on—How to Send Goods to Wards

When you have a question about any goods you receive from Wards, please read the information on the order copy or invoice included with your package, or mailed separately. Any changes on your order are usually carefully explained for your convenience.

When it is necessary to write us, or return the goods—please:

1. Give full name of item, and the catalog number.
2. List the quantity, color and size.
3. Include any other helpful information.
4. If it is necessary to return any goods, please let us know the reason. Tell us what articles you want in exchange, or if you want your money returned, or credited to your account.
5. Return all papers received with your order.

### The Facts About Factory Shipments

When you order an item from the catalog and the letter F or K appears *after* the article number (66 C 5654F), your merchandise will be shipped from a factory whose location is given on the catalog page describing the merchandise.

#### Why Wards Ship Direct From Factory To You:—

- To furnish items made to your exact specifications.
- To give you a wider choice of colors and fabrics.
- To permit you to order perishable items with the knowledge that they will reach you in good condition.
- To make available to you, from factory-warehouse stocks, complete assortments of exact replacement parts.

You may realize a saving on transportation charges on the factory-order when the town in which you live is closer to the factory than it is to your Ward Mail Order House.

Delivery of merchandise shipped directly from the factory to you takes a little longer than shipments to you from stock in Wards Mail Order House. To insure correct handling of your factory-order, Wards give the factory complete instructions to follow in filling your order to your specifications. The time required for this preparation is in addition to the time the factory needs to prepare and ship your goods. We will notify you of the approximate date you may expect your merchandise to be shipped from the factory.

### The Facts About Overseas Mailing

Your order to an address in a foreign country will receive prompt shipment by parcel post. Simply write your order, as you would for shipment in the United States. Please allow 20% of the order value for export handling, and international postage; allow slightly more on low-priced heavy items. We will promptly return any money not needed. (Custom duties are paid by addressee.)

Wards Big General Fall or Spring Catalog can be sent to a foreign address for \$2.00, and this amount will be credited on the first export order you place in the amount of \$20.00 or more.

### The Facts About Wards Guarantee

*You only* are the judge of, "Satisfaction Guaranteed or Your Money Back," on any purchase you make from Wards.

Helpful hints when shipping goods to Wards for exchange, refund, trade-in offers; or samples of repair parts:

**PARCEL POST**—Wrap and tie securely. Paste letter of explanation to outside of package under cord. (Postal regulations allow you to place letter of explanation inside package if statement "First Class Mail Enclosed" shows on outside of package *below* postage.) This requires addition of first class postage for letter. Do not seal or tape package unless statement "Contents Merchandise—may be opened for postal inspection if necessary," shows on outside of package.

**FIRST CLASS MAIL**—Wrap small parts or samples in paper and enclose in envelope with letter. Attach postage for first class rate.

**FREIGHT OR EXPRESS**—Please do not return items by freight or express until you write us. We'll tell you the best way to return goods.

## RETAIL INSTALMENT CONTRACT

Montgomery Ward & Co., Incorporated:

I agree to pay the time sale price for the goods and services, described in the Order Blank on the reverse side hereof, shipped or furnished to me. You may, at your option, consolidate the time balance of this contract and the time balance of any subsequent purchase, each of which shall constitute a separate contract, with the unpaid time balance of my prior contracts, together with a credit service charge. In such event, the instalment payments under the consolidated total shall be adjusted to your monthly payment schedule and the terms and conditions of this contract shall apply to such subsequent purchases. A down payment, as may be required by your catalog, is enclosed and I agree to pay the time balance on this contract, or the consolidated time balance, as the case may be, in accordance with your published terms. Title to the goods included in this contract shall be retained by you until the time balance is fully paid and title to the goods purchased under each prior and subsequent separate contract, the unpaid time balance of which is consolidated herewith, shall remain in you until the time balance under each such contract is fully paid. I agree not to dispose of the goods or encumber them without your written consent, and to protect you against all loss or damage to the goods from the time they are delivered to me until I have fully paid for them. If I fail to comply with any of the provisions of this contract, you may, at your option, declare the unpaid time balance on this contract or the unpaid consolidated time balance, as the case may be, immediately due and payable. In such event, I agree to pay such balance upon demand or you may, in the manner and as provided by law, retake the goods or pursue any further remedy provided by law. If more than one person signs this contract, the obligation shall be joint and several.

## NOTICE TO THE BUYER

1. Do not sign this agreement before you read it or if it contains any blank space.
2. You are entitled to a completely filled in copy of this agreement.
3. Under the law, you have the right to pay off in advance the full amount due and under certain conditions to obtain a partial refund of the credit service charge.
4. Liability Insurance coverage for bodily injury and property damage caused to others is not included in sales of motor vehicles.

# To Open A New Wards Monthly Payment Account

Sign Contract, Fill-in Credit Application below. For Add-ons, sign only on reverse side.

## RETAIL INSTALMENT CONTRACT

Montgomery Ward & Co., Incorporated:

I agree to pay the time sale price for the goods and services, described in the Order Blank on the reverse side hereof, shipped or furnished to me. You may, at your option, consolidate the time balance of this contract and the time balance of any subsequent purchase, each of which shall constitute a separate contract, with the unpaid time balance of my prior contracts, together with a credit service charge. In such event, the instalment payments under the consolidated total shall be adjusted to your monthly payment schedule and the terms and conditions of this contract shall apply to such subsequent purchases. A down payment, as may be required by your catalog, is enclosed and I agree to pay the time balance on this contract, or the consolidated time balance, as the case may be, in accordance with your published terms. Title to the goods included in this contract shall be retained by you until the time balance is fully paid and title to the goods purchased under each prior and subsequent separate contract, the unpaid time balance of which is consolidated herewith, shall remain in you until the time balance under each such contract is fully paid. I agree not to dispose of the goods or encumber them without your written consent, and to protect you against all loss or damage to the goods from the time they are delivered to me until I have fully paid for them. If I fail to comply with any of the provisions of this contract, you may, at your option, declare the unpaid time balance on this contract or the unpaid consolidated time balance, as the case may be, immediately due and payable. In such event, I agree to pay such balance upon demand or you may, in the manner and as provided by law, retake the goods or pursue any further remedy provided by law. If more than one person signs this contract, the obligation shall be joint and several.

## NOTICE TO THE BUYER

1. Do not sign this agreement before you read it or if it contains any blank space.
2. You are entitled to a completely filled in copy of this agreement.
3. Under the law, you have the right to pay off in advance the full amount due and under certain conditions to obtain a partial refund of the credit service charge.
4. Liability Insurance coverage for bodily injury and property damage caused to others is not included in sales of motor vehicles.

Your **WARD CHARGE ACCOUNT** makes shopping

**10 Ways Easier**

- 1 **IT'S EASY TO ORDER.** Just mention your account and say "Charge it." There's no down payment.
- 2 **IT'S EASY TO OPEN AN ACCOUNT.** Just fill-in the agreement below, and sign the application on the preceding page.
- 3 **IT'S EASY TO MAKE ADDITIONAL PURCHASES.** Just add them to your account. (There is no down payment.)
- 4 **YOU HAVE A 30-DAY CHARGE ACCOUNT.** You can "Charge it," and pay in full within 30-days, with no service charge.
- 5 **OR, YOU MAY EXTEND YOUR PAYMENTS.** You can spread payments over many months . . . with a small service charge.
- 6 **THERE IS NO DOWN PAYMENT.** Whether you pay in 30 days, or in monthly payments, you pay no money down.
- 7 **YOU CAN BUY MORE.** \$10 or less per month pays for \$100 in merchandise; \$25 or less pays for \$250.
- 8 **NO PICK-UP DELAYS.** Just show your Ward Revolving Charge Plate at the time you come in to pick-up your order.
- 9 **NO POSTAGE TO FIGURE.** Wards figure it for you. All shipping and delivery charges are included in your account.
- 10 **NO C.O.D. CHARGES TO PAY.** These charges, too, are included in your account. (No need to keep cash on hand.)

**Here's How It Works: —TO OPEN AN ACCOUNT.** Sign the agreement below, and fill-in the credit application blank on the preceding page. (Please note the table that lists the range of monthly payments.) You may mail your credit application and agreement to Wards, or bring it to any Ward catalog store or retail store. Your Ward Revolving Charge Identification Plate will be mailed to you promptly.

**A 30-DAY CHARGE ACCOUNT.** You may use your Ward Revolving Charge as a regular charge account. There is no service charge, if you pay your account in full within 30 days after billing date.

**OR, TAKE MONTHS TO PAY.** You may also handle your Revolving Charge as a no-money-down monthly payment account. In this case, there is a small service charge. The amount of your monthly payments will vary with your balance.

**A MONTHLY STATEMENT.** Wards will send you a statement each month, with copies of your sales-checks.

## WARDS REVOLVING CHARGE PLAN

### RETAIL INSTALMENT CREDIT AGREEMENT

Montgomery Ward & Co., Incorporated:

In consideration of your selling merchandise and services to me on Wards Revolving Charge Plan, I agree to the following regarding all purchases made by me or on my Revolving Charge Identification Plate:

1. I will pay the time sale price for all purchases, consisting of the cash sale price and a time price differential or service charge of  $1\frac{1}{2}\%$  on the monthly balances of my account on amounts up to \$500 and 1% on amounts in excess of \$500.\*
2. You will send me each month a statement as of a specified billing date, determined by you, which will show my unpaid balance as of said billing date, the time price differential or service charge based upon my balance on the preceding billing date, and the amount of the monthly instalment payable by me under this agreement.
3. The amount of my scheduled monthly instalment will be determined by the amount of the unpaid balance of my account from month to month, and I will pay the scheduled monthly instalment applicable to such balance in accordance with the following schedule of payments until my account is paid in full:

If the unpaid balance of my account is:	The scheduled monthly instalment will be:
.01-\$10.00	Balance
\$10.01-100.00	\$10.00
100.01-150.00	15.00
150.01-200.00	20.00
200.01-250.00	25.00
250.01-300.00	30.00
300.01-350.00	35.00
Over \$350.00	1/10 of the account balance

\*Accounts may not exceed \$500 under agreements made in Nebraska.

4. I will pay each monthly instalment computed as provided above within 20 days after the billing date of each statement.
5. If within 30 days from the date of any billing statement, I pay the full amount shown on the statement, no time price differential or service charge with respect to such amount will be charged on any subsequent billing statement.
6. You have the right to limit my account balance and future purchases made hereunder.
7. If I fail to comply with any of the provisions of this agreement, the entire unpaid balance shall, at your option, become immediately due and payable.

#### NOTICE TO THE BUYER:

1. Do not sign this credit agreement before you read it or if it contains any blank spaces. 2. You are entitled to an exact and completely filled in copy of this credit agreement. 3. You have the right to pay the full amount due or any part thereof in advance.

# AT WARDS YOU CAN CHOOSE THE CREDIT THAT'S CONVENIENT

For the Type and Size of Purchase You are Making

Whether you're buying a new Spring hat or a houseful of furniture, Wards have a Credit Plan to fit your purchase, and to make it easier to pay for. In other words, a *choice* of terms . . . to suit *your* convenience! You may pay nothing down, or as much as one-third down; \$3 a month or \$300 . . . complete your payment in 30 days, or as long as 3 years. Even a "harvest-time" payment plan for farmers whose income is seasonal. So whatever you are buying (or dreaming of buying) enjoy it sooner, enjoy it *while you're paying for it*, with the credit terms that suit your purchase best. Wards five Plans are summarized below, with the page-number where you'll find details on each.

## IT'S EASY TO OPEN AN ACCOUNT

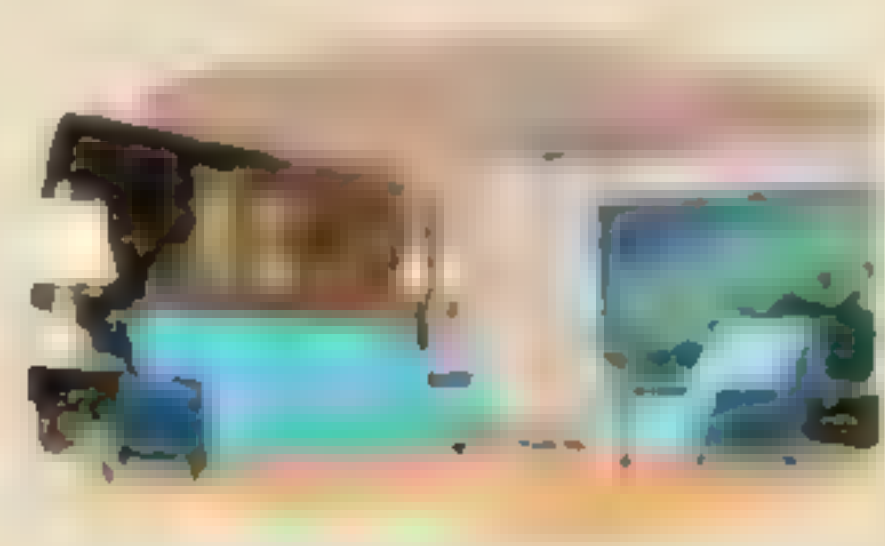

Write your order in the usual way. (Order blanks are on pages 1277-1280.) Check the correct down payment for the credit terms you are using. If your order includes merchandise that involves more than one type of terms, figure the down payment on each, and add them together. Turn the order blank over; after it is filled-in and signed, by the head of the household, write check or money order for down payment, and mail it to Wards. Subsequent orders, on most Ward Credit Plans, require no down payment.

## FIVE CONVENIENT CREDIT PLANS FROM WHICH TO CHOOSE:—

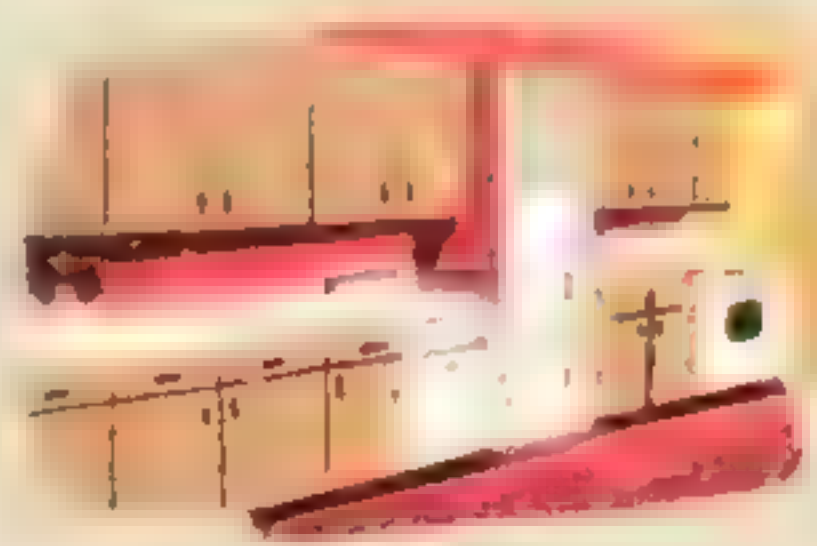

### REVOLVING Charge Account

Pay in 30 days, or extend payments over many months. See page 1281.

### TERMS FOR Major Purchases

\$5 or \$10 down; up to 24 months to pay. \$50 minimum. See page 791.

### TERMS FOR Home Improvement

No down payment; up to 36 months to pay. \$100 minimum. See page 960.

### TERMS FOR Farm Equipment

Payment dates to fit dates of farm income. See Wards Farm Book.

### TERMS FOR General Merchandise

10%\* down; up to 18 mo. to pay. Minimum initial order \$20. See below.

## General Merchandise Credit Terms (10%\* Down)
